## Supplement dated March 24, 2020, to each currently effective Prospectus, Statement of Additional Information (“SAI”) and Summary Prospectus.

*Effective immediately, the following changes are made to each Prospectus, SAI and Summary Prospectus of the Funds in response to the COVID-19 outbreak.*

*The following is added to the “Summary Section – Principal Risks of Investing” section of the Prospectus and Summary Prospectus for each Fund:*

**Market Turbulence Resulting from COVID-19.** An outbreak of an infectious respiratory illness caused by a novel coronavirus known as COVID-19 has negatively affected the worldwide economy, as well as the economies of individual countries, the financial health of individual companies and the market in general in significant and unforeseen ways. The future impact of COVID-19 is currently unknown, and it may exacerbate other risks that apply to the Fund. Any such impact could adversely affect the Fund’s performance, the performance of the securities in which the Fund invests and may lead to losses on your investment in the Fund.

*The following is added to the “More About the Funds’ Investment Objective, Principal Investment Strategies and Risks – Principal Risks of Investing” section of the Prospectus for each Fund:*

**Market Turbulence Resulting from COVID-19.** An outbreak of an infectious respiratory illness caused by a novel coronavirus known as COVID-19 was first detected in China in December 2019 and has spread internationally. This coronavirus has resulted in closing international borders, enhanced health screenings, healthcare service preparation and delivery, quarantines, cancellations, disruptions to supply chains and customer activity, as well as general public concern and uncertainty. The impact of this outbreak has negatively affected the worldwide economy, as well as the economies of individual countries, the financial health of individual companies and the market in general in significant and unforeseen ways. The future impact of COVID-19 is currently unknown, and it may exacerbate other risks that apply to the Fund, including political, social and economic risks. Any such impact could adversely affect the Fund’s performance, the performance of the securities in which the Fund invests and may lead to losses on your investment in the Fund.

*The following sentence is added to the “Market risk.” disclosure in the “Principal Risks of Investing” and “More About the Funds’ Investment Objective, Principal Investment Strategies and Risks – Principal Risks of Investing” sections of the Prospectus and Summary Prospectus for each Fund:*

In addition, local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, or other events could have significant impact on a security or instrument.

*The “MARKET CONDITIONS” disclosure in each SAI is deleted and replaced with the following:*

Events in certain sectors historically have resulted, and may in the future result, in an unusually high degree of volatility in the financial markets, both domestic and foreign. These events have included, but are not limited to: bankruptcies, corporate restructurings, and other events related to the sub-prime mortgage crisis in 2008; governmental efforts to limit short selling and high frequency trading; measures to address U.S. federal and state budget deficits; social, political, and economic instability in Europe; economic stimulus by the Japanese central bank; steep declines in oil prices; dramatic changes in currency exchange rates; China's economic slowdown; and circumstances such as pandemics or epidemics in one or more countries or regions. Interconnected global economies and financial markets increase the possibility that conditions in one country or region might adversely impact issuers in a different country or region. Such events may cause significant declines in the values and liquidity of many securities and other instruments. It is impossible to predict whether such conditions will recur. Because such situations may be widespread, it may be difficult to identify both risks and opportunities using past models of the interplay of market forces, or to predict the duration of such events.

An outbreak of an infectious respiratory illness caused by a novel coronavirus known as COVID-19 was first detected in China in December 2019 and has now been detected globally. This coronavirus has resulted in certain travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, prolonged quarantines, cancellations, supply chain disruptions, and lower consumer demand, as well as general concern and uncertainty. The impact of COVID-19, and other infectious illness outbreaks that may arise in the future, could adversely affect the economies of many nations or the entire global economy, individual issuers and capital markets in ways that cannot necessarily be foreseen. In addition, the impact of infectious illnesses in emerging market countries may be greater due to generally less established healthcare systems. Public health crises caused by the COVID-19 outbreak may exacerbate other pre-existing political, social and economic risks in certain countries or globally. The duration of the COVID-19 outbreak and its effects cannot be determined with certainty.

*The first paragraph of the “Changing Fixed Income Market Conditions.” disclosure in each SAI is deleted and replaced with the following:*

Changing Fixed Income Market Conditions. Following the financial crisis that began in 2007, the U.S. government and the Board of Governors of the Federal Reserve System (the “Federal Reserve”), as well as certain foreign governments and central banks, took steps to support financial markets, including by keeping interest rates at historically low levels and by purchasing large quantities of securities issued or guaranteed by the U.S. government, its agencies or instrumentalities on the open market (“Quantitative Easing”). Similar steps were taken again in 2020 in an effort to support the economy during the coronavirus pandemic. This and other government interventions may not work as intended, particularly if the efforts are perceived by investors as being unlikely to achieve the desired results. In addition, when the Federal Reserve determines to “taper” or reduce Quantitative Easing

and/or raise the federal funds rate, there is a risk that interest rates across the U.S. financial system will rise. Such policy changes may expose fixed-income and related markets to heightened volatility and may reduce liquidity for certain Fund investments, which could cause the value of the Fund's investments and share price to decline. If the Funds invest in derivatives tied to fixed income markets they may be more substantially exposed to these risks than a fund that does not invest in derivatives.

*Please file this Supplement with your records.*

**AXS Multi-Strategy Alternatives Fund**

Class I Shares: KCMIX

Class R-I Shares: KCMTX

*A series of Investment Managers Series Trust II*

**Supplement dated February 28, 2020 to the  
Summary Prospectus dated February 4, 2020.**

Effective March 1, 2020 (the “Effective Date”), the minimum initial investment for the AXS Multi-Strategy Alternatives Fund’s (the “Fund”) Class I Shares will be lowered from \$250,000 to \$5,000. As a result, all references to the minimum initial investment for the Fund’s Class I Shares in the Summary Prospectus are updated accordingly. For subsequent purchases of Fund Shares, there continues to be no required minimum investment amount.

*Please retain this Supplement for future reference.*

# AXS Multi-Strategy Alternatives Fund

**Class I: KCMIX**

**Class R-1: KCMTX**

## Summary Prospectus

February 4, 2020

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's Statutory Prospectus and Statement of Additional Information and other information about the Fund online at <http://www.axsinvestments.com>. You may also obtain this information at no cost by calling 1-833-AXS-ALTS (1-833-297-2587) or by sending an e-mail request to [info@axsinvestments.com](mailto:info@axsinvestments.com). The Fund's Prospectus and Statement of Additional Information, both dated October 18, 2019, as revised November 18, 2019 and February 1, 2020, as each may be amended or supplemented, are incorporated by reference into this Summary Prospectus.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from the Fund, if you hold your shares directly with the Fund, or from your financial intermediary, such as a broker-dealer or bank, if you hold your shares through a financial intermediary. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. If you hold your shares directly with the Fund, you may elect to receive shareholder reports and other communications from the Fund electronically by contacting the Fund at 1-833-AXS-ALTS (1-833-297-2587) or, if you hold your shares through a financial intermediary, by contacting your financial intermediary.

You may elect to receive all future reports in paper free of charge. If you hold your shares directly with the Fund, you can inform the Fund that you wish to continue receiving paper copies of your shareholder reports by contacting the Fund at 1-833-AXS-ALTS (1-833-297-2587) or, if you hold your shares through a financial intermediary, by contacting your financial intermediary. Your election to receive reports in paper will apply to all of the series of Investment Managers Series Trust II managed by AXS Investments LLC you hold directly or through your financial intermediary, as applicable.

### Investment Objective

The investment objective of the AXS Multi-Strategy Alternatives Fund (the "Fund") is long-term growth of capital. As a secondary goal, the Fund seeks to manage volatility and market risk.

### Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. Information about waivers and discounts is available from your financial professional and in the section titled "YOUR ACCOUNT WITH THE FUND - Purchase of Shares/Class I Shares" and in "APPENDIX A – Waivers and Discounts Available from Intermediaries" of the Statutory Prospectus.

	<b>Class R-1 Shares</b>	<b>Class I Shares</b>
<b>Shareholder Fees</b> <i>(fees paid directly from your investment)</i>		
Maximum sales charge (load) imposed on purchases	None	None
Maximum deferred sales charge (load)	None	None
Redemption fee	None	None
Wire fee	\$20	\$20
Overnight check delivery fee	\$25	\$25
Retirement account fees (annual maintenance fee)	\$15	\$15
<b>Annual Fund Operating Expenses</b> <i>(expenses that you pay each year as a percentage of the value of your investment)</i>		
Management fees	1.00%	1.00%
Distribution and service (Rule 12b-1) fees	0.25%	None
Other expenses <sup>1</sup>	0.22%	0.22%
Acquired fund fees and expenses <sup>1</sup>	0.01%	0.01%
<b>Total annual fund operating expenses</b>	<b>1.48%</b>	<b>1.23%</b>

<sup>1</sup> "Other expenses" and "acquired fund fees and expenses" have been estimated for the current fiscal year. Actual expenses may differ from estimates.

### **Example**

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in Class R-1 shares and \$250,000 (initial investment minimum) in Class I shares of the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The example reflects the Fund's contractual fee waiver and/or expense reimbursement only for the term of the contractual fee waiver and/or expense reimbursement.

Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	<b>One Year</b>	<b>Three Years</b>	<b>Five Years</b>	<b>Ten Years</b>
Class R-1 Shares	\$151	\$468	\$808	\$1,768
Class I Shares	\$3,133	\$9,758	\$16,891	\$37,216

### **Portfolio Turnover**

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the portfolio turnover rate of the Fund's predecessor fund, the KCM Macro Trends Fund was 838% of the average value of its portfolio.

### **Principal Investment Strategies**

The Fund employs a flexible investment strategy, meaning it has the freedom to invest globally in companies of all sizes and in all sectors, long or short, in equities, fixed income, certain derivatives futures, and cash. It is not restricted to any "style box" (e.g., large cap growth or small cap value). To achieve its investment objective, the Fund invests principally in domestic and foreign equity securities (common stock and depository receipts), exchange traded funds ("ETFs"), swaps, futures and options. The Fund may have investment exposure to a broad range of markets that are economically tied to U.S. and foreign markets (including emerging markets).

In selecting securities for the Fund's portfolio, the Fund's sub-advisor, Kerns Capital Management, Inc. ("KCM" or the "Sub-Advisor") focuses on the broad macroeconomic environment – specifically whether the equity market offers the potential for acceptable risk-adjusted returns. If so, the Fund typically invests in equities. If not, the Fund employs a market neutral strategy (a form of hedging that aims to generate returns that are independent or uncorrelated with the direction of the stock market) with respect to its equity holdings and/or invests in asset classes, including but not limited to fixed income securities of any maturity and credit quality, derivatives, and/or cash equivalents, that are not correlated with the stock market. Rules-based, quantitative systems are used to measure market risk and select individual securities.

KCM utilizes all or parts of a multi-faceted approach in managing the Fund, including fundamental, technical and quantitative analysis. KCM has developed rules-based quantitative models that apply systematic research to provide buy and sell signals. KCM adjusts the Fund's market exposure depending on how clearly its research reflects the market's direction. KCM then bases its investment decisions quantitatively on a wide array of fundamental and technical factors. Fundamental factors include measures such as earnings growth rates, return on capital and dividend yield. Technical factors include measures such as price performance, volatility and trading volume.

The Fund may sell equity securities short in amounts equal to up to 50% of its net assets if KCM believes the value of the equity securities are likely to depreciate in value. In addition, the Fund may purchase and sell futures contracts, and may purchase and sell options on securities, securities indexes, and futures contracts. These types of investments produce economically "leveraged" investment results. To hedge the Fund's short positions, the Fund may buy call options, which gives the Fund the right to buy a stock it has sold short at a predetermined price. Similarly, the Fund may sell futures to hedge a portion of the Fund's long positions.

As a part of its investment strategy and during periods in which the Fund has limited market exposure, the Fund may invest in money market funds or other short-term interest-bearing instruments. In pursuing its investment objective, the Fund may engage in frequent trading.

## Principal Risks of Investing

Risk is inherent in all investing and you could lose money by investing in the Fund. A summary description of certain principal risks of investing in the Fund is set forth below. Before you decide whether to invest in the Fund, carefully consider these risk factors associated with investing in the Fund, which may cause investors to lose money. There can be no assurance that the Fund will achieve its investment objective.

**Market risk.** The market price of a security or instrument may decline, sometimes rapidly or unpredictably, due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic or political conditions throughout the world, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. The market value of a security or instrument also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.

**Equity risk.** The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate, or factors relating to specific companies in which the Fund invests.

**Derivatives risk.** Derivatives include instruments and contracts that are based on and valued in relation to one or more underlying securities, financial benchmarks, indices, or other reference obligations or measures of value. Major types of derivatives include futures, options, swaps and forward contracts. Using derivatives can have a leveraging effect and increase fund volatility. Derivatives transactions can be highly illiquid and difficult to unwind or value, and changes in the value of a derivative held by the Fund may not correlate with the value of the underlying instrument or the Fund's other investments. Many of the risks applicable to trading the instruments underlying derivatives are also applicable to derivatives trading. However, additional risks are associated with derivatives trading that are possibly greater than the risks associated with investing directly in the underlying instruments. These additional risks include, but are not limited to, illiquidity risk and counterparty credit risk. For derivatives that are required to be cleared by a regulated clearinghouse, other risks may arise from the Fund's relationship with a brokerage firm through which it submits derivatives trades for clearing, including in some cases from other clearing customers of the brokerage firm.

**ETF and mutual fund risk.** Investing in ETFs or mutual funds will provide the Fund with exposure to the risks of owning the underlying securities the ETFs or mutual funds hold. Shares of ETFs typically trade on securities exchanges and may at times trade at a premium or discount to their net asset values. In addition, an ETF or a mutual fund, if the mutual fund is an index fund, may not replicate exactly the performance of the benchmark index it seeks to track for a number of reasons, including transaction costs incurred by the ETF or mutual fund, the temporary unavailability of certain index securities in the secondary market, or discrepancies between the ETF or mutual fund and the index with respect to the weighting of securities or the number of securities held. It may be more expensive for the Fund to invest in an ETF or mutual fund than to own the portfolio securities of these investment vehicles directly. Investing in ETFs and mutual funds, which are investment companies, involves duplication of advisory fees and certain other expenses. The Fund will pay brokerage commissions in connection with the purchase and sale of shares of ETFs. In addition, the Fund may invest in underlying funds which invest a larger portion of their assets in one or more sectors than many other mutual funds, and thus will be more susceptible to negative events affecting those sectors.

**Foreign investment risk.** The prices of foreign securities may be more volatile than the prices of securities of U.S. issuers because of economic and social conditions abroad, political developments, and changes in the regulatory environments of foreign countries. In addition, changes in exchange rates and interest rates may adversely affect the values of the Fund's foreign investments. Foreign companies are generally subject to different legal and accounting standards than U.S. companies, and foreign financial intermediaries may be subject to less supervision and regulation than U.S. financial firms. Foreign securities include American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs"). Unsponsored ADRs and GDRs are organized independently and without the cooperation of the foreign issuer of the underlying securities, and involve additional risks because U.S. reporting requirements do not apply. In addition, the issuing bank may deduct shareholder distribution, custody, foreign currency exchange, and other fees from the payment of dividends. Emerging markets tend to be more volatile than the markets of more mature economies and

generally have less diverse and less mature economic structures and less stable political systems than those of developed countries.

**Fixed income securities risk.** The prices of fixed income securities respond to economic developments, particularly interest rate changes, as well as to changes in an issuer's credit rating or market perceptions about the creditworthiness of an issuer. Generally fixed income securities decrease in value if interest rates rise and increase in value if interest rates fall, and longer-term and lower rated securities are more volatile than shorter-term and higher rated securities.

**Issuer-specific risk.** The value of a specific security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole. The value of securities of smaller issuers can be more volatile than that of larger issuers. The value of certain types of securities can be more volatile due to increased sensitivity to adverse issuer, political, regulatory, market, or economic developments.

**Leveraging risk.** Certain Fund transactions, including taking short positions in financial instruments, may give rise to a form of leverage. Leverage can magnify the effects of changes in the value of the Fund's investments and make the Fund more volatile. Leverage creates a risk of loss of value on a larger pool of assets than the Fund would otherwise have had, potentially resulting in the loss of all assets. The Fund may also have to sell assets at inopportune times to satisfy its obligations in connection with such transactions.

**Portfolio turnover risk.** Active and frequent trading of the Fund's portfolio securities may lead to higher transaction costs and may result in a greater number of taxable transactions than would otherwise be the case, which could negatively affect the Fund's performance. A high rate of portfolio turnover is 100% or more.

**Short sales risk.** In connection with a short sale of a security or other instrument, the Fund is subject to the risk that instead of declining, the price of the security or other instrument sold short will rise. If the price of the security or other instrument sold short increases between the date of the short sale and the date on which the Fund replaces the security or other instrument borrowed to make the short sale, the Fund will experience a loss, which is theoretically unlimited since there is a theoretically unlimited potential for the market price of a security or other instrument sold short to increase. Shorting options or futures may have an imperfect correlation to the assets held by the Fund and may not adequately protect against losses in or may result in greater losses for the Fund's portfolio.

**Small-cap and mid-cap company risk.** The securities of small-capitalization and mid-capitalization companies may be subject to more abrupt or erratic market movements and may have lower trading volumes or more erratic trading than securities of larger, more established companies or market averages in general. In addition, such companies typically are more likely to be adversely affected than large capitalization companies by changes in earning results, business prospects, investor expectations or poor economic or market conditions.

**Cybersecurity risk.** Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, customer data (including private shareholder information), or proprietary information, or cause the Fund, the Advisor, the Sub-Advisor and/or other service providers (including custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or loss of operational functionality. In an extreme case, a shareholder's ability to exchange or redeem Fund shares may be affected.

**New advisor risk.** The Advisor is a newly organized investment advisor and has no operating history or performance track record.

### **Performance**

The Fund acquired the assets and liabilities of the KCM Macro Trends Fund, a series of Northern Lights Fund Trust, (the "Predecessor Fund"), on October 18, 2019. As a result of the acquisition, the Fund is the accounting successor of the Predecessor Fund. Performance results shown in the bar chart and the performance table below.

The bar chart and table below provide some indication of the risks of investing in the Fund by showing changes in the Predecessor Fund's performance from year to year for Class R-1 shares and by showing how the average annual total returns of each class of the Predecessor Fund compare with the average annual total returns of the HFRX Equity

Hedge Index. The bar chart shows the performance of the Predecessor Fund's Class R-1 shares. Performance for classes other than those shown may vary from the performance shown to the extent the expenses for those classes differ. The Predecessor Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at the Fund's website, [www.axsinvestments.com](http://www.axsinvestments.com) or by calling the Fund at 1-833-AXS-ALTS (1-833-297-2587).

### Calendar-Year Total Return (before taxes) for Class R-1 Shares

For each calendar year at NAV

The year-to-date return for Class R-1 shares as of September 30, 2019 was 5.47%.

Class R-1 Shares		
Highest Calendar Quarter Return at NAV	12.25%	Quarter Ended 03/31/2012
Lowest Calendar Quarter Return at NAV	(17.11)%	Quarter Ended 09/30/2011

Average Annual Total Returns (for Periods Ended December 31, 2018)	1 Year	5 Years	10 Years	Since Inception	Inception Date
Class R-1 Shares - Return Before Taxes	(4.26)%	4.83%	7.25%	5.93%	08/04/2008
Class R-1 Shares - Return After Taxes on Distributions*	(10.53)%	1.68%	5.38%	4.12%	08/04/2008
Class R-1 Shares - Return After Taxes on Distributions and Sale of Fund Shares*	(1.55)%	2.70%	5.25%	4.18%	08/04/2008
Class I Shares - Return Before Taxes	(4.03)%	n/a	n/a	6.97%	03/20/2017
<b>HFRX Equity Hedge Index</b> (Reflects No Deductions for Fees, Expenses or Taxes)	(9.42)%	(0.25)%	1.38%	(0.94)%	08/04/2008

\* After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. After-tax returns are shown for Class R-1 Shares only and after-tax returns for classes other than Class R-1 will vary from returns shown for Class R-1.

### Investment Advisor

AXS Investments LLC (the "Advisor")

**Sub-Advisor**

Kerns Capital Management, Inc. (“KCM” or the “Sub-Advisor”)

**Portfolio Managers**

Martin L. Kerns II, President and Chief Executive Officer of the Sub-Advisor, has served as a portfolio manager of the Fund and the Predecessor Fund since the Predecessor Fund’s inception in August 2008. Parker Binion, Chief Investment Officer of the Sub-Advisor, has served as a co-portfolio manager of the Fund and the Predecessor Fund since January 2016. Messrs. Kerns and Binion are jointly and primarily responsible for the day-to-day management of the Fund’s portfolio.

**Purchase and Sale of Fund Shares**

To purchase shares of the Fund, you must invest at least the minimum amount.

<b>Minimum Investments</b>	<b>To Open Your Account</b>	<b>To Add to Your Account</b>
<b>Class R-1 Shares</b>		
Direct Regular Accounts	\$1,000	\$100
Direct Retirement Accounts	\$1,000	\$100
Automatic Investment Plan	\$1,000	\$100
Gift Account For Minors	\$1,000	\$100
<b>Class I Shares</b>		
All Accounts	\$250,000	None

Fund shares are redeemable on any business day the New York Stock Exchange (the “NYSE”) is open for business, by written request or by telephone.

**Tax Information**

The Fund’s distributions are generally taxable, and will ordinarily be taxed as ordinary income, qualified dividend income or capital gains, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. Shareholders investing through such tax-advantaged arrangements may be taxed later upon withdrawal of monies from those arrangements.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
