## DESCRIPTIONS OF INDICES

**FTSE Capital Research Index (formerly known as Thomson Reuters Venture Capital Research Index)** tracks the performance of the US venture capital industry through a comprehensive aggregation of venture funded private company values. The index is market cap weighted and published quarterly. **TRVCI** (FTSE Venture Capital Index formerly known as Thomson Reuters Venture Capital Index) replicates the performance of our Venture Capital Research Index through a combination of liquid, publicly listed assets. **Swap contract** is a commitment between two parties to make or receive payments based on agreed upon terms, and whose value and payments are derived by changes in the value of an underlying financial instrument. Swap agreements may increase or decrease a Fund's exposure to long- or short-term interest rates, foreign currency values, corporate borrowing rates, or other factors. **1940 Act**, or the Investment Company Act of 1940, is an act of Congress that regulates the formation of investment companies and their activities.

## IMPORTANT RISK DISCLOSURE

**Mutual funds involve risk including possible loss of principal. There is no assurance that the Fund will achieve its investment objective. Diversification does not ensure profits or prevent losses.**

Mutual funds involve risks including the possible loss of principal. The Fund may invest in ETFs, ETNs and mutual funds, which are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. ETFs, ETNs and mutual funds are subject to issuer, fixed income and risks specific to the Fund. Venture capital investments involve a greater degree of risk; as a result, the Fund's returns may experience greater volatility than the overall market. The Fund does not invest in venture capital funds nor does it invest directly in the company funded by venture capital funds. The Fund seeks to generate returns that mimic the aggregate returns of U.S. venture capital backed companies as measured by the FTSE Venture Capital Index (TRVCI). There is a risk that Fund's return may not match or achieve a higher degree of correlation with the return of the TRVCI. Additionally, the TRVCI's return may not match or achieve a high degree of correlation with the return of the U.S. venture capital-based companies.

Investments in equity securities are subject to overall market risks. To the extent that the Fund's investments are concentrated in or significantly exposed to a particular sector, the Fund will be susceptible to loss due to adverse occurrences affecting that sector. Loss may result from the Fund's investments in derivatives. These instruments may be illiquid, difficult to value and leveraged so that small changes may produce disproportionate losses to the Fund. Over the counter derivatives, such as swaps, are also subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligation. In certain circumstances, it may be difficult for the Fund to purchase and sell particular derivative investments within a reasonable time at a fair price.

The AXS FTSE Venture Capital Return Tracker Fund (LDVIX) (the "Fund") has been developed solely by AXS Investments LLC.
