Fund (Ticker)	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
AXS FTSE Venture Capital Return Tracker Fund (Class C/LDVCX)	\$306	2.50%

### Management's Discussion of Fund Performance

#### HOW DID THE FUND PERFORM?

The Fund is available in class A, I, and C shares. For the fiscal year ended September 30, 2024, performance for the class C share returned 44.92%.

As an indexed-based strategy, the Fund is designed to track the performance of the FTSE Venture Capital Index which seeks to replicate the aggregate risk and performance profile of the Venture Capital space.

Fund performance was in line with the FTSE Venture Capital Index<sup>[1]</sup> gross performance of 48.82%. The Fund's prospectus benchmark NASDAQ Composite Total Return Index returned 38.64%

#### WHAT AFFECTED FUND PERFORMANCE?

The Fund replicates the exposures of its underlying index using U.S. listed equities and total return swaps to create economic leverage and to implement a relative-value overlay. U.S. listed equities provide exposures to the economic sectors represented by the universe of venture capital backed private companies.

The index is constructed using the FTSE Business Classification to classify and measure the direct economic exposures of the universe of venture capital backed companies. The index selects U.S. listed large cap equities among the respective sectors and weights the membership according to their market value subject to a 4.5% (ex-cash) weight constraint. Each sector is diversified in the number of securities within each sector and through use of the weight constraint. In this manner, the intent is to reduce idiosyncratic risks and to isolate the systemic risks of each sector. The Fund implements the index membership in both the security and relative target weights.

The index, and therefore the Fund, was weighted between 70-75% during the year in favor of the information technology, communication services and financial sectors. Another 18-20% was allocated to Health Care and Industrials. All of these sectors performed strongly during the year with Health Care trailing the others.

Top contributors for the period included Meta Platforms, Netflix, NVIDIA, Oracle and IBM while Adobe, Visa, Mastercard, Accenture and Snowflake were among the largest detractors.

[1] The FTSE Venture Capital Index utilizes a prosperity model designed by DSC Quantitative Group, LLC ("DSC"). The index: 1) identifies a set of publicly listed assets weighted in an attempt replicate the returns of the Venture Capital universe, 2) utilizes economic factors and market indicators to calculate optimal asset weights and 3) modifies the portfolio over time to reflect changes in the venture capital universe.

## Fund Performance

The following graph and chart compare the initial and subsequent account values at the end of each of the most recently completed 10 fiscal years of the Fund or for the life of the Fund, if shorter. It assumes a \$10,000 initial investment at the beginning of the first fiscal year in an appropriate, broad-based securities market index for the same period.

### GROWTH OF \$10,000

AVERAGE ANNUAL TOTAL RETURN	1 Year	5 Years	Since Inception <sup>1</sup>
AXS FTSE Venture Capital Return Tracker Fund (Class C/LDVCX)	43.92%	12.39%	16.36%
AXS FTSE Venture Capital Return Tracker Fund (Class C/LDVCX)- excluding sales load	44.92%	12.39%	16.36%
NASDAQ OTC Composite Index	38.64%	18.81%	17.16%

<sup>1</sup> Class C shares commenced operation on September 23, 2015.

**Keep in mind that the Fund's past performance is not a good predictor of how the Fund will perform in the future.**

The graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or redemption of Fund shares.
