THE TRUST AND THE FUNDS

The Trust is an open-end management investment company organized as a Delaware statutory trust under the laws of the State of Delaware on August 20, 2013. The Trust currently consists of several other series of shares of beneficial interest. This SAI relates only to the Funds and not to the other series of the Trust.

The Trust is registered with the Securities and Exchange Commission (“SEC”) as an open-end management investment company. Such a registration does not involve supervision of the management or policies of the Fund. The Prospectus of the Fund and this SAI omit certain of the information contained in the Registration Statement filed with the SEC. Copies of such information may be obtained from the SEC upon payment of the prescribed fee.

Each of the Funds acquired all the assets and liabilities of the following funds (each a “Predecessor Fund”) as of the date listed below. Each Fund adopted the prior performance and financial history of the corresponding Predecessor Fund.

Fund	Predecessor Fund*	Acquisition Date
AXS Thomson Reuters Private Equity Return Tracker Fund	Leland Thomson Reuters Private Equity Buyout Index Fund	November 20, 2020
AXS Thomson Reuters Venture Capital Return Tracker Fund	Leland Thomson Reuters Venture Capital Index Fund	November 20, 2020

*Each Fund was a series of Northern Lights Fund Trust III.

Each of the Funds are classified as a diversified fund, which means it is subject to the diversification requirements under the Investment Company Act of 1940, as amended (the “1940 Act”). Under the 1940 Act, a diversified fund may not, with respect to 75% of its total assets, invest more than 5% of its total assets in the securities of one issuer (and in not more than 10% of the outstanding voting securities of an issuer), excluding cash, Government securities, and securities of other investment companies. A Fund’s classification as a diversified fund may only be changed with the approval of the Fund’s shareholders.

The Funds currently offer several classes of shares as described on the cover page of this SAI. Other classes may be established from time to time in accordance with the provisions of the Trust’s Agreement and Declaration of Trust (the “Declaration of Trust”). Each class of shares of a Fund generally is identical in all respects except that each class of shares is subject to its own distribution expenses and minimum investments. Each class of shares also has exclusive voting rights with respect to its distribution fees.

INVESTMENT STRATEGIES, POLICIES AND RISKS

The discussion below supplements information contained in the Funds’ Prospectus pertaining to the investment policies of one or more of the Funds. The Funds’ principal investment strategies and related risks are identified in the below table and described in detail following the table. A Fund may also invest, to a lesser extent, in investments other than those identified as its principal investments.

EQUITY SECURITIES

Common Stock

The Funds may invest in common stock. Common stock represents an equity (ownership) interest in a company, and usually possesses voting rights and earns dividends. Dividends on common stock are not fixed but are declared at the discretion of the issuer. Common stock generally represents the riskiest investment in a company. In addition, common stock generally has the greatest appreciation and depreciation potential because increases and decreases in earnings are usually reflected in a company's stock price.

The fundamental risk of investing in common stock is that the value of the stock might decrease. Stock values fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions. While common stocks have historically provided greater long-term returns than preferred stocks, fixed-income and money market investments, common stocks have also experienced significantly more volatility than the returns from those other investments.

Private Equity Investing

Additional special risks inherent in private equity-funded companies include that little public information exists for such companies. The Underlying Index's return may not match or achieve a high degree of correlation with the return of U.S. venture capital-backed companies. Because newly private companies inherently carry a degree of risk, including the risk that a company will fail, the returns of the private equity industry may be subject to greater volatility than the returns of more established publicly traded companies. As a result, the AXS Thomson Reuters Venture Capital Return Tracker Fund's returns also may experience greater volatility than a direct or indirect investment in more established public companies. The Fund does not invest in private equity funds nor does it invest in the companies funded by private equity funds.

Venture Capital Investing

Venture capital is a type of equity financing that addresses the funding needs of entrepreneurial companies that for reasons of size, assets, and stage of development cannot seek capital from more traditional sources, such as public markets and banks. Additional special risks inherent in venture capital-funded companies include that little public information exists for such companies, which are frequently private and thinly traded companies. Such a lack of information may lead to greater tracking error between the Underlying Index and the TR VC Research Index or adversely affect the correlation of the AXS Thomson Reuters Venture Capital Return Tracker Fund's performance to that of the U.S. venture capital industry, generally. In addition, because new or very early companies inherently carry a degree of risk, including the risk that a company will fail, the returns of the venture capital backed companies may be subject to greater volatility than the returns of more established publicly traded companies. As a result, the Fund's returns also may experience greater volatility than a direct or indirect investment in more established public companies. The Fund does not invest in venture capital funds nor does it invest in the companies funded by venture capital funds.

Preferred Stock

The Funds may invest in preferred stock. Preferred stock is a class of stock having a preference over common stock as to the payment of dividends and a share of the proceeds resulting from the issuer's liquidation although preferred stock is usually subordinate to the debt securities of the issuer. Some preferred stocks also entitle their holders to receive additional liquidation proceeds on the same basis as the holders of the issuer's common stock. Preferred stock typically does not possess voting rights and its market value may change based on changes in interest rates. If interest rates rise, the fixed dividend on preferred stocks may be less attractive, causing the price of preferred stocks to decline. Preferred stock may have mandatory sinking fund provisions, as well as call/redemption provisions prior to maturity, a negative feature when interest rates decline. In addition, a fund may receive stocks or warrants as a result of an exchange or tender of fixed income securities. Preference stock, which is more common in emerging markets than in developed

markets, is a special type of common stock that shares in the earnings of an issuer, has limited voting rights, may have a dividend preference, and may also have a liquidation preference. Depending on the features of the particular security, holders of preferred and preference stock may bear the risks regarding common stock or fixed income securities.

Small- and Mid-Cap Stocks

The Funds may invest in stock of companies with market capitalizations that are small compared to other publicly traded companies. Investments in larger companies present certain advantages in that such companies generally have greater financial resources, more extensive research and development, manufacturing, marketing and service capabilities, and more stability and greater depth of management and personnel. Investments in smaller, less seasoned companies may present greater opportunities for growth but also may involve greater risks than customarily are associated with more established companies. The securities of smaller companies may be subject to more abrupt or erratic market movements than larger, more established companies. These companies may have limited product lines, markets or financial resources, or they may be dependent upon a limited management group. Their securities may be traded in the over-the-counter market or on a regional exchange, or may otherwise have limited liquidity. As a result of owning large positions in this type of security, a Fund is subject to the additional risk of possibly having to sell portfolio securities at disadvantageous times and prices if redemptions require a Fund to liquidate its securities positions. In addition, it may be prudent for a Fund, as its asset size grows, to limit the number of relatively small positions it holds in securities having limited liquidity in order to minimize its exposure to such risks, to minimize transaction costs, and to maximize the benefits of research. As a consequence, as a Fund's asset size increases, a Fund may reduce its exposure to illiquid small capitalization securities, which could adversely affect performance.

The Funds may also invest in stocks of companies with medium market capitalizations (i.e., mid-cap companies). Such investments share some of the risk characteristics of investments in stocks of companies with small market capitalizations described above, although mid cap companies tend to have longer operating histories, broader product lines and greater financial resources and their stocks tend to be more liquid and less volatile than those of smaller capitalization issuers.

Large-Cap Stocks

The Funds may invest in stock of companies with large market capitalizations. Larger, more established companies may be unable to attain the high growth rates of successful, smaller companies during periods of economic expansion. In addition, large-capitalization companies may be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes, and may be more prone to global economic risks.

Warrants and Rights

The Funds may invest in warrants or rights (including those acquired in units or attached to other securities) that entitle (but do not obligate) the holder to buy equity securities at a specific price for a specific period of time but will do so only if such equity securities are deemed appropriate by the Advisor, as applicable. Rights are similar to warrants but typically have a shorter duration and are issued by a company to existing stockholders to provide those holders the right to purchase additional shares of stock at a later date. Warrants and rights do not have voting rights, do not earn dividends, and do not entitle the holder to any rights with respect to the assets of the company that has issued them. They do not represent ownership of the underlying companies but only the right to purchase shares of those companies at a specified price on or before a specified exercise date. Warrants and rights tend to be more volatile than the underlying stock, and if at a warrant's expiration date the stock is trading at a price below the price set in the warrant, the warrant will expire worthless. Conversely, if at the expiration date the stock is trading at a price higher than the price set in the warrant or right, a Fund can acquire the stock at a price below its market value. The prices of warrants and rights do not necessarily parallel the prices of the underlying securities. An investment in warrants or rights may be considered speculative.

Convertible Securities

The Funds may invest in convertible securities. A convertible security is a preferred stock, warrant or other security that may be converted or exchanged for a prescribed amount of common stock or other security of the same or a different issuer or into cash within a particular period of time at a specified price or formula. A convertible security generally entitles the holder to receive the dividend or interest until the convertible security matures or is redeemed, converted or exchanged. Before conversion, convertible securities generally have characteristics similar to both fixed income and equity securities. Although to a lesser extent than with fixed income securities generally, the market value of convertible

securities tends to decline as interest rates increase and, conversely, tends to increase as interest rates decline. In addition, because of the conversion feature, the market value of convertible securities tends to vary with fluctuations in the market value of the underlying common stocks and, therefore, also will react to variations in the general market for equity securities. A significant feature of convertible securities is that as the market price of the underlying common stock declines, convertible securities tend to trade increasingly on a yield basis, and so they may not experience market value declines to the same extent as the underlying common stock. When the market price of the underlying common stock increases, the prices of the convertible securities tend to rise as a reflection of the value of the underlying common stock. While no securities investments are without risk, investments in convertible securities generally entail less risk than investments in common stock of the same issuer.

REAL ESTATE INVESTMENT TRUSTS (“REITs”)

The Funds may invest in REITs. REITs are pooled investment vehicles that invest primarily in income producing real estate or real estate related loans or interests. REITs are generally classified as equity REITs, mortgage REITs, or a combination of equity and mortgage REITs. Equity REITs invest the majority of their assets directly in real property and derive income primarily from the collection of rents. Equity REITs can also realize capital gains by selling properties that have appreciated in value. Mortgage REITs invest the majority of their assets in real estate mortgages and derive income from the collection of principal and interest payments. Similar to regulated investment companies such as the Fund, REITs are not taxed on income distributed to shareholders provided they comply with several requirements of the Code. The Fund will indirectly bear its proportionate share of expenses incurred by REITs in which the Fund invests in addition to the expenses incurred directly by the Fund.

Investing in REITs involves certain unique risks in addition to those risks associated with investing in the real estate industry in general. Equity REITs may be affected by changes in the value of the underlying property owned by the REITs, while mortgage REITs may be affected by the quality of any credit extended. REITs are dependent upon management skills, are not diversified, and are subject to heavy cash flow dependency, default by borrowers and self-liquidation.

Investing in REITs involves risks similar to those associated with investing in small capitalization companies. REITs may have limited financial resources, may trade less frequently and in a limited volume and may be subject to more abrupt or erratic price movements than larger company securities. Historically, small capitalization stocks, such as REITs, have had more price volatility than larger capitalization stocks.

REITs may fail to qualify for the favorable federal income tax treatment generally available to them under the Code and may fail to maintain their exemptions from registration under the 1940 Act. REITs (especially mortgage REITs) also are subject to interest rate risks. When interest rates decline, the value of a REIT’s investment in fixed-rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a REIT’s investment in fixed-rate obligations can be expected to decline. In contrast, as interest rates on adjustable rate mortgage loans are reset periodically, yields on a REIT’s investments in such loans will gradually align themselves to reflect changes in market interest rates, causing the value of such investments to fluctuate less dramatically in response to interest rate fluctuations than would investments in fixed-rate obligations.

Effective for taxable years beginning after December 31, 2017, the recently enacted Tax Cuts and Jobs Act generally allows individuals and certain other non-corporate entities, such as partnerships, a deduction for 20% of qualified REIT dividends. Recently issued proposed regulations allow a RIC to pass the character of its qualified RIC dividends through to its shareholders provided certain holding period requirements are met.

DERIVATIVES

Each Fund may utilize a variety of derivatives contracts, such as futures, options, swaps and forward contracts, both for investment purposes and for hedging purposes. Hedging involves special risks including the possible default by the other party to the transaction, illiquidity and, to the extent the Advisor’s assessment of certain market movements is incorrect, the risk that the use of hedging could result in losses greater than if hedging had not been used. Nonetheless, with respect to certain investment positions, a Fund may not be sufficiently hedged against market fluctuations, in which case an investment position could result in a loss greater than if the Advisor had been sufficiently hedged with respect to such position.

The Advisor will not, in general, attempt to hedge all market or other risks inherent in a Fund's positions, and may hedge certain risks, if at all, only partially. Specifically, the Advisor may choose not, or may determine that it is economically unattractive, to hedge certain risks, either in respect of particular positions or in respect of a Fund's overall portfolio. Moreover, it should be noted that a Fund's portfolio always will be exposed to unidentified systematic risk factors and to certain risks that cannot be completely hedged, such as credit risk (relating both to particular securities and to counterparties). A Fund's portfolio composition may result in various directional market risks remaining unhedged, although the Advisor may rely on diversification to control such risks to the extent that the Advisor believes it is desirable to do so.

Recent legislation calls for new regulation of the derivatives markets. The extent and impact of the regulation is not yet fully known and may not be for some time. New regulations could adversely affect the value, availability and performance of certain derivative instruments, may make them more costly, and may limit or restrict their use by a Fund.

Certain additional risk factors related to derivatives are discussed below:

Derivatives Risk. Under recently adopted rules by the CFTC, transactions in some types of interest rate swaps and index credit default swaps on North American and European indices will be required to be cleared. In a cleared derivatives transaction, a Fund's counterparty is a clearing house (such as CME Clearing, ICE Clearing or LCH.Clearnet), rather than a bank or broker. Since a Fund is not a member of clearing houses and only members of a clearing house can participate directly in the clearing house, a Fund will hold cleared derivatives through accounts at clearing members, who are futures commission merchants that are members of the clearing houses and who have the appropriate regulatory approvals to engage in swap transactions. A Fund will make and receive payments owed under cleared derivatives transactions (including margin payments) through its accounts at clearing members. Clearing members guarantee performance of their clients' obligations to the clearing house. In contrast to bilateral derivatives transactions, following a period of advance notice to a Fund, clearing members generally can require termination of existing cleared derivatives transactions at any time and increases in margin above the margin that it required at the beginning of a transaction. Clearing houses also have broad rights to increase margin requirements for existing transactions and to terminate transactions. Any such increase or termination could interfere with the ability of a Fund to pursue its investment strategy. Also, a Fund is subject to execution risk if it enters into a derivatives transaction that is required to be cleared (or that the Advisor expects to be cleared), and no clearing member is willing or able to clear the transaction on a Fund's behalf. While the documentation in place between a Fund and its clearing members generally provides that the clearing members will accept for clearing all transactions submitted for clearing that are within credit limits specified by the clearing members in advance, a Fund could be subject to this execution risk if a Fund submits for clearing transactions that exceed such credit limits, if the clearing house does not accept the transactions for clearing, or if the clearing members do not comply with their agreement to clear such transactions. In that case, the transaction might have to be terminated, and a Fund could lose some or all of the benefit of any increase in the value of the transaction after the time of the transaction. In addition, new regulations could, among other things, restrict a Fund's ability to engage in, or increase the cost to a Fund of, derivatives transactions, for example, by making some types of derivatives no longer available to a Fund or increasing margin or capital requirements. If a Fund is not able to enter into a particular derivatives transaction, a Fund's investment performance and risk profile could be adversely affected as a result.

Counterparty Risk. Counterparty risk with respect to OTC derivatives may be affected by new regulations promulgated by the CFTC and SEC affecting the derivatives market. As described under "Derivatives Risk" above, some derivatives transactions will be required to be cleared, and a party to a cleared derivatives transaction is subject to the credit risk of the clearing house and the clearing member through which it holds its cleared position, rather than the credit risk of its original counterparty to the derivative transaction. Clearing members are required to segregate all funds received from customers with respect to cleared derivatives transactions from the clearing member's proprietary assets. However, all funds and other property received by a clearing broker from its customers are generally held by the clearing broker on a commingled basis in an omnibus account, which may also invest those funds in certain instruments permitted under the applicable regulations. The assets of a Fund might not be fully protected in the event of the bankruptcy of a Fund's clearing member because a Fund would be limited to recovering only a pro rata share of all available funds segregated on behalf of the clearing broker's customers for a relevant account class. Also, the clearing member transfers to the clearing house the amount of margin required by the clearing house for cleared derivatives transactions, which amounts are generally held in an omnibus account at the clearing house for all customers of the clearing member. For

commodities futures positions, the clearing house may use all of the collateral held in the clearing member's omnibus account to meet a loss in that account, without regard to which customer in fact supplied that collateral. Accordingly, in addition to bearing the credit risk of its clearing member, each customer to a futures transaction also bears "fellow customer" risk from other customers of the clearing member. However, with respect to cleared swaps positions, recent regulations promulgated by the CFTC require that the clearing member notify the clearing house of the amount of initial margin provided by the clearing member to the clearing house that is attributable to each customer. Because margin in respect of cleared swaps must be earmarked for specific clearing member customers, the clearing house may not use the collateral of one customer to cover the obligations of another customer. However, if the clearing member does not provide accurate reporting, a Fund is subject to the risk that a clearing house will use a Fund's assets held in an omnibus account at the clearing house to satisfy payment obligations of a defaulting customer of the clearing member to the clearing house. In addition, a clearing member may generally choose to provide to the clearing house the net amount of variation margin required for cleared swaps for all of the clearing member's customers in the aggregate, rather than the gross amount of each customer. A Fund is therefore subject to the risk that a clearing house will not make variation margin payments owed to a Fund if another customer of the clearing member has suffered a loss and is in default.

Regulation as a Commodity Pool Operator

Each Fund is a "commodity pool" under the U.S. Commodity Exchange Act ("CEA"), and the Advisor is registered as a "commodity pool operator" with the Commodity Futures Trading Commission ("CFTC") and is a member of the National Futures Association ("NFA") with respect to the Funds. As a registered commodity pool operator with respect to the Fund, the Advisor must comply with various regulatory requirements under the CEA, and the rules and regulations of the CFTC and the NFA, including investor protection requirements, antifraud prohibitions, disclosure requirements, and reporting and recordkeeping requirements. The Advisor is also subject to periodic inspections and audits by the CFTC and NFA.

Swap Transactions

A Fund may enter into interest rate, currency and index swaps and the purchase or sale of related caps, floors and collars. A Fund may enter into these transactions to preserve a return or spread on a particular investment or portion of its portfolio, to protect against currency fluctuations or to protect against any increase in the price of securities it anticipates purchasing at a later date. Swaps may be used in conjunction with other instruments to offset interest rate, currency or other underlying risks. For example, interest rate swaps may be offset with "caps," "floors" or "collars". A "cap" is essentially a call option which places a limit on the amount of floating rate interest that must be paid on a certain principal amount. A "floor" is essentially a put option which places a limit on the minimum amount that would be paid on a certain principal amount. A "collar" is essentially a combination of a long cap and a short floor where the limits are set at different levels.

A Fund will usually enter into swaps on a net basis; that is, the two payment streams will be netted out in a cash settlement on the payment date or dates specified in the instrument, with a Fund receiving or paying, as the case may be, only the net amount of the two payments. To the extent obligations created thereby may be deemed to constitute senior securities, a Fund will maintain required collateral in a segregated account consisting of U.S. government securities or cash or cash equivalents.

Total Return Swaps. A Fund may enter into total return swap contracts for investment purposes. Total return swaps are contracts in which one party agrees to make periodic payments based on the change in market value of the underlying assets, which may include a specified security, basket of securities or security indexes during the specified period, in return for periodic payments based on a fixed or variable interest rate of the total return from other underlying assets. Total return swaps may be used to obtain exposure to a security or market without owning or taking physical custody of such security or market, including in cases in which there may be disadvantages associated with direct ownership of a particular security. In a typical total return equity swap, payments made by a Fund or the counterparty are based on the total return of a particular reference asset or assets (such as an equity security, a combination of such securities, or an index). That is, one party agrees to pay another party the return on a stock, basket of stocks, or stock index in return for a specified interest rate. By entering into an equity index swap, for example, the index receiver can gain exposure to stocks making up the index of securities without actually purchasing those stocks. Total return swaps involve not only the risk associated with the investment in the underlying securities, but also the risk of the counterparty not fulfilling its obligations under the agreement.

Credit Default Swaps. A Fund may enter into credit default swap transactions for investment purposes. A credit default swap may have as reference obligations one or more securities that are not currently held by a Fund. A Fund may be either the buyer or seller in the transaction. Credit default swaps may also be structured based on the debt of a basket of issuers, rather than a single issuer, and may be customized with respect to the default event that triggers purchase or other factors. As a seller, a Fund would generally receive an upfront payment or a fixed rate of income throughout the term of the swap, which typically is between six months and three years, provided that there is no credit event. If a credit event occurs, generally the seller must pay the buyer the full face amount of deliverable obligations of the reference obligations that may have little or no value. The notional value of the credit default swap will be used to segregate liquid assets for selling protection on credit default swaps. If a Fund were a buyer and no credit event occurs, a Fund would recover nothing if the swap is held through its termination date. However, if a credit event occurs, the buyer may elect to receive the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference obligation that may have little or no value. When a Fund buys credit default swaps it will segregate an amount at least equal to the amount of any accrued premium payment obligations including amounts for early terminations. The use of swap transactions by a Fund entails certain risks, which may be different from, or possibly greater than, the risks associated with investing directly in the securities and other investments that are the referenced asset for the swap transaction. Swaps are highly specialized instruments that require investment techniques, risk analyses, and tax planning different from those associated with stocks, bonds, and other traditional investments. The use of a swap requires an understanding not only of the referenced asset, reference rate, or index, but also of the swap itself, without the benefit of observing the performance of the swap under all the possible market conditions. Because some swap transactions have a leverage component, adverse changes in the value or level of the underlying asset, reference rate, or index can result in a loss substantially greater than the amount invested in the swap itself. Certain swaps have the potential for unlimited loss, regardless of the size of the initial investment.

A Fund may also purchase credit default swap contracts in order to hedge against the risk of default of the debt of a particular issuer or basket of issuers, in which case a Fund would function as the counterparty referenced in the preceding paragraph. This would involve the risk that the investment may expire worthless and would only generate income in the event of an actual default by the issuer(s) of the underlying obligation(s) (or, as applicable, a credit downgrade or other indication of financial instability). It would also involve the risk that the seller may fail to satisfy its payment obligations to a Fund in the event of a default. The purchase of credit default swaps involves costs, which will reduce a Fund's return.

Interest Rate Swaps. A Fund may enter into an interest rate swap in an effort to protect against declines in the value of fixed income securities held by a Fund. In such an instance, a Fund may agree to pay a fixed rate (multiplied by a notional amount) while a counterparty agrees to pay a floating rate (multiplied by the same notional amount). If interest rates rise, resulting in a diminution in the value of a Fund's portfolio, a Fund would receive payments under the swap that would offset, in whole or in part, such diminution in value.

Options on Swaps. A Fund may enter into options on swap agreements. An option on a swap agreement, or a "swaption," is a contract that gives a counterparty the right (but not the obligation) to enter into a new swap agreement or to shorten, extend, cancel or otherwise modify an existing swap agreement, at some designated future time on specified terms. In return, the purchaser pays a "premium" to the seller of the contract. The seller of the contract receives the premium and bears the risk of unfavorable changes on the underlying swap. A Fund may write (sell) and purchase put and call swaptions. A Fund may also enter into swaptions on either an asset-based or liability-based basis, depending on whether a Fund is hedging its assets or its liabilities. A Fund may write (sell) and purchase put and call swaptions to the same extent it may make use of standard options on securities or other instruments. A Fund may enter into these transactions primarily to preserve a return or spread on a particular investment or portion of its holdings, as a duration management technique, to protect against an increase in the price of securities a Fund anticipates purchasing at a later date, or for any other purposes, such as for speculation to increase returns. Swaptions are generally subject to the same risks involved in a Fund's use of options.

Depending on the terms of the particular option agreement, a Fund will generally incur a greater degree of risk when it writes a swaption than it will incur when it purchases a swaption. When a Fund purchases a swaption, it risks losing only the amount of the premium it has paid should it decide to let the option expire unexercised. However, when a Fund writes a swaption, upon exercise of the option a Fund will become obligated according to the terms of the underlying agreement.

OTC Derivatives Transactions

A Fund may enter into OTC derivatives transactions. The Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”), which was signed into law on July 21, 2010, established a new statutory framework that comprehensively regulated the OTC derivatives markets for the first time. Key Dodd-Frank Act provisions relating to OTC derivatives require rulemaking by the SEC and the CFTC, not all of which has been proposed or finalized as at the date of this SAI. Prior to the Dodd-Frank Act, the OTC derivatives markets were traditionally traded on a bilateral basis (so-called “bilateral OTC transactions”). Now certain OTC derivatives contracts are required to be centrally cleared and traded on exchanges or electronic trading platforms called swap execution facilities (“SEFs”).

Bilateral OTC transactions differ from exchange-traded or cleared derivatives transactions in several respects. Bilateral OTC transactions are transacted directly with dealers and not with a clearing corporation. Without the availability of a clearing corporation, bilateral OTC transaction pricing is normally done by reference to information from market makers, which information is carefully monitored by the Advisor and verified in appropriate cases. As bilateral OTC transactions are entered into directly with a dealer, there is a risk of nonperformance by the dealer as a result of its insolvency or otherwise. Under recently adopted CFTC regulations, counterparties of registered swap dealers and major swap participants have the right to elect segregation of initial margin in respect of uncleared swaps. If a counterparty makes such an election, any initial margin that is posted to the swap dealer or major swap participant must be segregated in individual customer accounts held at an independent third-party custodian. In addition, the collateral may only be invested in certain categories of instruments identified in the CFTC’s regulations. Agreements covering these segregation arrangements must generally provide for consent by both the counterparty and the swap dealer or major swap participant to withdraw margin from the segregated account. Given these limitations on the use of uncleared swaps collateral, there is some likelihood that the electing counterparty will experience an increase in the costs associated with trading swaps with the relevant swap dealer or major swap participant. Certain other protections apply to a counterparty to uncleared swaps under the CFTC’s regulations even if the counterparty does not elect segregation of its initial margin. These regulations are newly adopted, and it remains unclear whether they will be effective in protecting initial margin in the manner intended in the event of significant market stress or the insolvency of a swap dealer or major swap participant.

Furthermore, a bilateral OTC transaction may only be terminated voluntarily by entering into a closing transaction with the dealer with which a Fund originally dealt. Any such cancellation may require a Fund to pay a premium to that dealer. In those cases in which a Fund has entered into a covered transaction and cannot voluntarily terminate the transaction, a Fund will not be able to sell the underlying security until the transaction expires or is exercised or different cover is substituted. A Fund will seek to enter into OTC transactions only with dealers which agree to, and which are expected to be capable of, entering into closing transactions with a Fund. There is also no assurance that a Fund will be able to liquidate an OTC transaction at any time prior to expiration.

The requirement to execute certain OTC derivatives contracts on SEFs may offer certain advantages over traditional bilateral OTC trading, such as ease of execution, price transparency, increased liquidity and/or favorable pricing. However, SEF trading may make it more difficult and costly for a Fund to enter into highly tailored or customized transactions and may result in additional costs and risks. Market participants such as a Fund that execute derivatives contracts through a SEF, whether directly or through a broker intermediary, are required to submit to the jurisdiction of the SEF and comply with SEF and CFTC rules and regulations which impose, among other things disclosure and recordkeeping obligations. In addition, a Fund will generally incur SEF or broker intermediary fees when it trades on a SEF. A Fund may also be required to indemnify the SEF or broker intermediary for any losses or costs that may result from a Fund’s transactions on the SEF.

INVESTMENT COMPANY SECURITIES

A Fund may invest in shares of other investment companies (each, an “Underlying Fund”), including open-end funds, closed-end funds, unit investment trusts (“UITs”) and exchange-traded funds (“ETFs”), to the extent permitted by applicable law and subject to certain restrictions set forth in this SAI.

Under Sections 12(d)(1)(A) and 12(d)(1)(B) of the 1940 Act, a Fund and any companies controlled by a Fund may hold securities of an Underlying Fund in amounts which (i) do not exceed 3% of the total outstanding voting stock of such Underlying Fund, (ii) do not exceed 5% of the value of a Fund’s total assets or (iii) when added to all other Underlying

Fund securities held by a Fund, do not exceed 10% of the value of a Fund's total assets. A Fund may exceed these limits when permitted by SEC order or other applicable law or regulatory guidance, such as is the case with many ETFs.

Generally, under Sections 12(d)(1)(F) and 12(d)(1)(G) of the 1940 Act and SEC rules adopted pursuant to the 1940 Act, a Fund may acquire the securities of affiliated and unaffiliated Underlying Funds subject to the following guidelines and restrictions:

- A Fund may own an unlimited amount of the securities of any registered open-end fund or registered unit investment trust that is affiliated with a Fund, so long as any such Underlying Fund has a policy that prohibits it from acquiring any securities of registered open-end funds or registered UITs in reliance on certain sections of the 1940 Act.
- A Fund and its "affiliated persons" may own up to 3% of the outstanding stock of any fund, subject to the following restrictions:
 - i. the Fund and each Underlying Fund, in the aggregate, may not charge a sales load greater than the limits set forth in Rule 2830(d)(3) of the Conduct Rules of the Financial Industry Regulatory Authority ("FINRA") applicable to funds of funds;
 - ii. each Underlying Fund is not obligated to redeem more than 1% of its total outstanding securities during any period less than 30 days; and
 - iii. the Fund is obligated either to (i) seek instructions from its shareholders with regard to the voting of all proxies with respect to the Underlying Fund and to vote in accordance with such instructions, or (ii) to vote the shares of the Underlying Fund held by the Fund in the same proportion as the vote of all other shareholders of the Underlying Fund.

Acquired funds typically incur fees that are separate from those fees incurred directly by a Fund. A Fund's purchase of such investment company securities results in the layering of expenses as Fund shareholders would indirectly bear a proportionate share of the operating expenses of such investment companies, including advisory fees, in addition to paying Fund expenses. In addition, the securities of other investment companies may also be leveraged and will therefore be subject to certain leverage risks. The net asset value and market value of leveraged securities will be more volatile and the yield to shareholders will tend to fluctuate more than the yield generated by unleveraged securities. Investment companies may have investment policies that differ from those of a Fund.

Under certain circumstances an open-end investment company in which a Fund invests may determine to make payment of a redemption by a Fund wholly or in part by a distribution in kind of securities from its portfolio, instead of in cash. As a result, a Fund may hold such securities until the Advisor determines it is appropriate to dispose of them. Such disposition will impose additional costs on a Fund.

Investment decisions by the investment advisors to the registered investment companies in which a Fund invests are made independently of a Fund. At any particular time, one Underlying Fund may be purchasing shares of an issuer whose shares are being sold by another Underlying Fund. As a result, under these circumstances a Fund indirectly would incur certain transactional costs without accomplishing any investment purpose.

Exchange-Traded Funds ("ETFs")

A Fund may invest in ETFs. ETFs are pooled investment vehicles that generally seek to track the performance of specific indices. ETFs may be organized as open-end funds or as UITs. Their shares are listed on stock exchanges and can be traded throughout the day at market-determined prices.

An ETF generally issues index-based investments in large aggregations of shares known as "Creation Units" in exchange for a "Portfolio Deposit" consisting of (a) a portfolio of securities designated by the ETF, (b) a cash payment equal to a pro rata portion of the dividends accrued on the ETF's portfolio securities since the last dividend payment by the ETF, net of expenses and liabilities, and (c) a cash payment or credit ("Balancing Amount") designed to equalize the net asset value of the shares and the net asset value of a Portfolio Deposit.

Shares of ETFs are not individually redeemable, except upon the reorganization, merger, conversion or liquidation of the ETF. To redeem shares of an ETF, an investor must accumulate enough shares of the ETF to reconstitute a Creation Unit. The liquidity of small holdings of ETF shares, therefore, will depend upon the existence of a secondary market for such shares. Upon redemption of a Creation Unit, the investor will receive securities designated by the ETF (“Redemption Securities”) and a cash payment in an amount equal to the difference between the net asset value of the shares being redeemed and the net asset value of the Redemption Securities.

The price of ETF shares is based upon (but not necessarily identical to) the value of the securities held by the ETF. Accordingly, the level of risk involved in the purchase or sale of ETF shares is similar to the risk involved in the purchase or sale of traditional common stock, with the exception that the pricing mechanism for ETF shares is based on a basket of stocks. Disruptions in the markets for the securities underlying ETF shares purchased or sold by a Fund could result in losses on such shares. There is no assurance that the requirements of the national securities exchanges necessary to maintain the listing of shares of any ETF will continue to be met.

Leveraged and Inverse ETFs

A Fund may invest in leveraged ETFs, inverse ETFs and inverse leveraged ETFs. Leveraged ETFs seek to deliver multiples of the performance of the index or other benchmark they track and use derivatives in an effort to amplify the returns of the underlying index or benchmark. While leveraged ETFs may offer the potential for greater return, the potential for loss and the speed at which losses can be realized also are greater. Inverse ETFs seek to negatively correlate with the performance of a particular index by using various forms of derivative transactions, including by short-selling the underlying index. An investment in an inverse ETF will decrease in value when the value of the underlying index rises. A number of factors may affect an inverse ETF’s ability to achieve a high degree of inverse correlation with the benchmark index, and there can be no guarantee that an inverse ETF will achieve a high degree of inverse correlation. By investing in leveraged ETFs and inverse ETFs, a Fund can commit fewer assets to the investment in the securities represented on the index than would otherwise be required.

Leveraged ETFs and inverse ETFs present all of the risks that regular ETFs present. In addition, such ETFs determine their return over a specific, pre-set time period, typically daily, and, as a result, there is no guarantee that the ETF’s actual long term returns will be equal to the daily return that a Fund seeks to achieve. As a result of compounding, inverse ETFs and leveraged ETFs typically have a single day investment objective. An inverse ETF’s performance for periods greater than a single day is likely to be either better or worse than the inverse of the benchmark index performance, before accounting for fees and fund expenses. Similarly, a leveraged ETF’s performance for periods greater than one day is likely to be either better or worse than the index performance, times the relevant multiple. This effect becomes more pronounced for these types of ETFs as market volatility increases. Even when the value of the underlying benchmark with which an inverse ETF seeks to negatively correlate decreases, the value of the inverse ETF may not necessarily increase.

Furthermore, because leveraged ETFs and inverse ETFs achieve their results by using derivative instruments, they are subject to the risks associated with derivative transactions, including the risk that the value of the derivatives may rise or fall more rapidly than other investments, thereby causing the ETF to lose money and, consequently, the value of a Fund’s investment to decrease. Investing in derivative instruments also involves the risk that other parties to the derivative contract may fail to meet their obligations, which could cause losses to the ETF. Short sales in particular are subject to the risk that, if the price of the security sold short increases, the inverse ETF or inverse leveraged ETF may have to cover its short position at a higher price than the short sale price, resulting in a loss to the ETF and, indirectly, to a Fund. An ETF’s use of these techniques will make a Fund’s investment in the ETF more volatile than if a Fund were to invest directly in the securities underlying the tracked index, or in an ETF that does not use derivative instruments. However, by investing in leveraged ETFs and inverse ETFs rather than directly purchasing and/or selling derivative instruments, a Fund will limit its potential loss solely to the amount actually invested in the ETF (that is, a Fund will not lose more than the principal amount invested in the ETF).

Closed-End Funds

A Fund may invest in shares of closed-end funds. Investments in closed-end funds are subject to various risks, including reliance on management’s ability to meet the closed-end fund’s investment objective and to manage the closed-end fund portfolio; fluctuation in the net asset value of closed-end fund shares compared to the changes in the value of the underlying securities that the closed-end fund owns; and bearing a pro rata share of the management fees and expenses

of each underlying closed-end fund resulting in a Fund's shareholders being subject to higher expenses than if he or she invested directly in the closed-end fund(s).

EXCHANGE TRADED NOTES ("ETNs")

A Fund may invest in ETNs. An investment in an ETN involves risks, including possible loss of principal. ETNs are unsecured debt securities issued by a bank that are linked to the total return of a market index. Risks of investing in ETNs also include limited portfolio diversification, uncertain principal payment, and illiquidity. Additionally, the investor fee will reduce the amount of return on maturity or at redemption, and as a result the investor may receive less than the principal amount at maturity or upon redemption, even if the value of the relevant index has increased. An investment in an ETN may not be suitable for all investors.

INITIAL PUBLIC OFFERINGS

A Fund may purchase securities of companies in initial public offerings ("IPOs"). By definition, IPOs have not traded publicly until the time of their offerings. Special risks associated with IPOs may include limited numbers of shares available for trading, unseasoned trading, lack of investor knowledge of the companies, and limited operating history, all of which may contribute to price volatility. Many IPOs are issued by undercapitalized companies of small or micro-cap size. The effect of IPOs on a Fund's performance depends on a variety of factors, including the number of IPOs a Fund invests in relative to the size of a Fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value.

WHEN-ISSUED OR DELAYED-DELIVERY SECURITIES

A Fund may purchase securities on a when-issued or delayed delivery basis. For example, delivery of and payment for these securities can take place a month or more after the date of the purchase commitment. The purchase price and the interest rate payable, if any, on the securities are fixed on the purchase commitment date or at the time the settlement date is fixed. The value of such securities is subject to market fluctuations and, in the case of fixed income securities, no interest accrues to a Fund until settlement takes place. When purchasing a security on a when-issued or delayed-delivery basis, a Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. Accordingly, at the time a Fund makes the commitment to purchase securities on a when-issued or delayed delivery basis, it will record the transaction, reflect the value each day of such securities in determining its net asset value and, if applicable, calculate the maturity for the purposes of average maturity from that date. At the time of its acquisition, a when-issued security may be valued at less than the purchase price. A Fund will make commitments for such when-issued transactions only when it has the intention of actually acquiring the securities. To facilitate such acquisitions, a Fund will maintain with its custodian a segregated account with liquid assets, consisting of cash, U.S. government securities or other appropriate securities, in an amount at least equal to such commitments. On delivery dates for such transactions, a Fund will meet its obligations from maturities or sales of the securities held in the segregated account and/or from cash flow. If, however, a Fund chooses to dispose of the right to acquire a when-issued security prior to its acquisition, it could, as with the disposition of any other portfolio obligation, recognize taxable capital gain or loss due to market fluctuation. Also, a Fund may be disadvantaged if the other party to the transaction defaults.

ILLIQUID AND RESTRICTED SECURITIES

A Fund may invest up to 15% of its net assets in illiquid securities. Illiquid securities are securities that a Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the securities. Illiquid securities may be difficult to value, and a Fund may have difficulty or be unable to dispose of such securities promptly or at reasonable prices.

A Fund may invest in restricted securities. Restricted securities are securities that may not be sold freely to the public absent registration under the 1933 Act, or an exemption from registration. While restricted securities are generally presumed to be illiquid, it may be determined that a particular restricted security is liquid. Rule 144A under the 1933 Act establishes a safe harbor from the registration requirements of the 1933 Act for resales of certain securities to qualified institutional buyers. Institutional markets for restricted securities sold pursuant to Rule 144A in many cases provide both readily ascertainable values for restricted securities and the ability to liquidate an investment to satisfy share redemption orders. Such markets might include automated systems for the trading, clearance and settlement of unregistered securities of domestic and foreign issuers, such as the PORTAL System sponsored by NASDAQ. An insufficient number of qualified buyers interested in purchasing Rule 144A eligible restricted securities, however, could

adversely affect the marketability of such portfolio securities and result in the Fund's inability to dispose of such securities promptly or at favorable prices.

A Fund may purchase commercial paper issued pursuant to Section 4(a)(2) of the 1933 Act. 4(a)(2) commercial paper has substantially the same price and liquidity characteristics as commercial paper generally, except that the resale of 4(a)(2) commercial paper is limited to the institutional investor marketplace. Such a restriction on resale makes 4(a)(2) commercial paper technically a restricted security under the 1933 Act. In practice, however, 4(a)(2) commercial paper can be resold as easily as any other unrestricted security held by a Fund.

Rule 22e-4 under the 1940 Act requires, among other things, that the Funds establish a liquidity risk management program ("LRMP") that is reasonably designed to assess and manage liquidity risk. Rule 22e-4 defines "liquidity risk" as the risk that a fund could not meet requests to redeem shares issued by the fund without significant dilution of the remaining investors' interests in the fund. The Funds have implemented a LRMP to meet the relevant requirements. Additionally, the Board, including a majority of the Independent Trustees, approved the designation of the Advisor as the Funds' LRMP administrator to administer such program, and will review no less frequently than annually a written report prepared by the Advisor that addresses the operation of the LRMP and assesses its adequacy and effectiveness of implementation. Among other things, the LRMP provides for the classification of each Fund investment as a "highly liquid investment," "moderately liquid investment," "less liquid investment" or "illiquid investment." The liquidity risk classifications of each Fund's investments are determined after reasonable inquiry and taking into account relevant market, trading and investment-specific considerations. To the extent that a Fund investment is deemed to be an "illiquid investment" or a "less liquid investment," the Fund can expect to be exposed to greater liquidity risk. There is no guarantee the LRMP will be effective in its operations, and complying with Rule 22e-4, including bearing related costs, could impact a Fund's performance and its ability to seek its investment objective.

A Fund will not purchase illiquid securities if, as a result of the purchase, more than 15% of the Fund's net assets are invested in such securities. If at any time a portfolio manager and/or the Advisor determines that the value of illiquid securities held by the Fund exceeds 15% of the Fund's net assets, the Fund's portfolio managers and the Advisor will take such steps as they consider appropriate to reduce the percentage as soon as reasonably practicable.

LARGE SHAREHOLDER REDEMPTION RISK

Certain account holders may from time to time own (beneficially or of record) or control a significant percentage of a Fund's shares. Redemptions by these account holders of their shares in a Fund may impact a Fund's liquidity and net asset value. Such redemptions may also force a Fund to sell securities at a time when it would not otherwise do so, which may increase a Fund's broker costs and impact shareholder taxes.

MARKET CONDITIONS

Events in certain sectors historically have resulted, and may in the future result, in an unusually high degree of volatility in the financial markets, both domestic and foreign. These events have included, but are not limited to: bankruptcies, corporate restructurings, and other events related to the sub-prime mortgage crisis in 2008; governmental efforts to limit short selling and high frequency trading; measures to address U.S. federal and state budget deficits; social, political, and economic instability in Europe; economic stimulus by the Japanese central bank; steep declines in oil prices; dramatic changes in currency exchange rates; China's economic slowdown; and circumstances such as pandemics or epidemics in one or more countries or regions. Interconnected global economies and financial markets increase the possibility that conditions in one country or region might adversely impact issuers in a different country or region. Such events may cause significant declines in the values and liquidity of many securities and other instruments. It is impossible to predict whether such conditions will recur. Because such situations may be widespread, it may be difficult to identify both risks and opportunities using past models of the interplay of market forces, or to predict the duration of such events.

An outbreak of an infectious respiratory illness caused by a novel coronavirus known as COVID-19 was first detected in China in December 2019 and has now been detected globally. This coronavirus has resulted in certain travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, prolonged quarantines, cancellations, supply chain disruptions, and lower consumer demand, as well as general concern and uncertainty. The impact of COVID-19, and other infectious illness outbreaks that may arise in the future, could adversely affect the economies of many nations or the entire global

economy, individual issuers and capital markets in ways that cannot necessarily be foreseen. In addition, the impact of infectious illnesses in emerging market countries may be greater due to generally less established healthcare systems. Public health crises caused by the COVID-19 outbreak may exacerbate other pre-existing political, social and economic risks in certain countries or globally. The duration of the COVID-19 outbreak and its effects cannot be determined with certainty.

DEVELOPMENTS IN THE CHINA REGION

After nearly 30 years of unprecedented growth, the People's Republic of China now faces a slowing economy. The real estate market, which many observers believed to be inflated, has begun to decline. Local governments, which had borrowed heavily to bolster growth, face high debt burdens and limited revenue sources. As a result, demand for Chinese exports by the United States and countries in Europe, and demands for Chinese imports from such countries, may weaken due to the effects of more limited economic growth. Additionally, Chinese actions to lay claim to disputed islands have caused relations with China's regional trading partners to suffer, and could cause further disruption to regional and international trade. From time to time and as recently as January 2020, China has experienced outbreaks of infectious illnesses, and the country may be subject to other public health threats, infectious illnesses, diseases or similar issues in the future. Any spread of an infectious illness, public health threat or similar issue could reduce consumer demand or economic output, result in market closures, travel restrictions or quarantines, and generally have a significant impact on the Chinese economy. In the long run, China's ability to develop and sustain a credible legal, regulatory, monetary, and socioeconomic system could influence the course of outside investment.

EUROPE – RECENT EVENTS

A number of countries in Europe have experienced severe economic and financial difficulties. Many non-governmental issuers, and even certain governments, have defaulted on, or been forced to restructure, their debts; many other issuers have faced difficulties obtaining credit or refinancing existing obligations; financial institutions have in many cases required government or central bank support, have needed to raise capital, and/or have been impaired in their ability to extend credit; and financial markets in Europe and elsewhere have experienced extreme volatility and declines in asset values and liquidity. These difficulties may continue, worsen or spread within or outside Europe. Responses to the financial problems by European governments, central banks and others, including austerity measures and reforms, may not work, may result in social unrest and may limit future growth and economic recovery or have other unintended consequences. Further defaults or restructurings by governments and others of their debt could have additional adverse effects on economies, financial markets and asset valuations around the world.

The European Union (the “EU”) currently faces major issues involving its membership, structure, procedures and policies, including the successful political, economic and social integration of new member states, the EU’s resettlement and distribution of refugees, and resolution of the EU’s problematic fiscal and democratic accountability. In addition, one or more countries may abandon the Euro, the common currency of the EU, and/or withdraw from the EU. The impact of these actions, especially if they occur in a disorderly fashion, is not clear but could be significant and far-reaching.

On January 31, 2020, the United Kingdom (the “UK”) formally withdrew from the EU, which withdrawal is commonly referred to as “Brexit.” The future relationship between the UK and the EU remains unresolved and subject to negotiation during an 11-month transition period. It is unclear what the potential outcome and/or ramifications of these negotiations may be, and the consequences for European and UK businesses could be severe. The Funds face risks associated with the uncertainty and consequences following Brexit, including with respect to volatility in exchange rates and interest rates. Brexit could adversely affect European or worldwide political, regulatory, economic or market conditions, and could contribute to instability in global political institutions, regulatory agencies and financial markets. Brexit could also lead to legal uncertainty and politically divergent national laws and regulations as the new relationship between the UK and EU is defined, and the UK determines which EU laws to replace or replicate. Any effects of Brexit could adversely affect any of the companies to which the Funds have exposure and any other assets in which the Funds invest.

Whether or not a Fund invests in securities of issuers located in Europe or with significant exposure to European issuers or countries, these events could negatively affect the value and liquidity of a Fund’s investments due to the interconnected nature of the global economy and capital markets. A Fund may also be susceptible to these events to the extent that a Fund invests in municipal obligations with credit support by non-U.S. financial institutions.

CYBERSECURITY RISK

Investment companies, such as a Fund, and its service providers may be subject to operational and information security risks resulting from cyber attacks. Cyber attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber security breaches. Cyber attacks affecting a Fund or the Advisor, a Fund's custodian or transfer agent, or intermediaries or other third-party service providers may adversely impact a Fund. For instance, cyber attacks may interfere with the processing of shareholder transactions, impact a Fund's ability to calculate its net asset value, cause the release of private shareholder information or confidential company information, impede trading, subject a Fund to regulatory fines or financial losses, and cause reputational damage. A Fund may also incur additional costs for cybersecurity risk management purposes. While a Fund and its service providers have established business continuity plans and risk management systems designed to prevent or reduce the impact of cybersecurity attacks, such plans and systems have inherent limitations due in part to the ever-changing nature of technology and cybersecurity attack tactics, and there is a possibility that certain risks have not been adequately identified or prepared for. Furthermore, a Fund cannot control any cybersecurity plans or systems implemented by its service providers.

Similar types of cybersecurity risks are also present for issuers of securities in which a Fund invests, which could result in material adverse consequences for such issuers, and may cause a Fund's investment in such portfolio companies to lose value.

LIBOR Risk

Many financial instruments, financings or other transactions to which a Fund may be a party use or may use a floating rate based on the London Interbank Offered Rate ("LIBOR"). LIBOR is the offered rate at which major international banks can obtain wholesale, unsecured funding, and LIBOR may be available for different durations (e.g., 1 month or 3 months) and for different currencies. LIBOR may be a significant factor in determining a Fund's payment obligations under a derivative investment, the cost of financing to the Fund or an investment's value or return to the Fund, and may be used in other ways that affect the Fund's investment performance. In July 2017, the Financial Conduct Authority, the United Kingdom's financial regulatory body, announced that after 2021 it will cease its active encouragement of banks to provide the quotations needed to sustain LIBOR. That announcement suggests that LIBOR may cease to be published or utilized after that time. Various financial industry groups have begun planning for that transition, but there are obstacles to converting certain securities and transactions to a new benchmark. Transition planning is ongoing, and the effect of the transition process and its ultimate success cannot yet be determined. The transition process may lead to increased volatility and illiquidity in markets for instruments the terms of which are based on LIBOR. It could also lead to a reduction in the value of some LIBOR-based investments and reduce the effectiveness of new hedges placed against existing LIBOR-based investments. While some LIBOR-based instruments may contemplate a scenario in which LIBOR is no longer available by providing for an alternative rate-setting methodology and/or increased costs for certain LIBOR-related instruments or financing transactions, not all may have such provisions and there may be significant uncertainty regarding the effectiveness of any such alternative methodologies, resulting in prolonged adverse market conditions for the Funds. Since the usefulness of LIBOR as a benchmark could deteriorate during the transition period, these effects could occur prior to the end of 2021. The willingness and ability of issuers to include enhanced provisions in new and existing contracts or instruments also remains uncertain. Any of these factors may adversely affect a Fund's performance or NAV.

INDEX INVESTING

The AXS Thomson Reuters Private Equity Return Tracker Fund seeks to provide investment results that, before fees and expenses, correspond generally to the price performance of the Thomson Reuters Private Equity Buyout Index (the "Private Equity Buyout Index"). The Private Equity Buyout Index seeks to replicate the aggregate gross performance of U.S. private equity-backed companies. The AXS Thomson Reuters Venture Capital Return Tracker Fund seeks to provide investment results that, before fees and expenses, correspond generally to the price performance of the Thomson Reuters Venture Capital Index (the "Venture Capital Index"). The Venture Capital Index seeks to replicate the aggregate gross performance of U.S. venture capital-backed companies.

Index funds are subject to the same general risks as the securities in the index it tracks. Index investing may also be subject to certain other risks, such as tracking error, licensing and concentration.

Tracking Error

Each Fund's return may not match or achieve a high degree of correlation with the return of the corresponding underlying index. An underlying index's return may not match or achieve a high degree of correlation with the return of U.S. private equity-backed companies or venture capital-funded companies.

Licensing

Each Fund relies on licenses that permit the Fund to use the applicable Index and associated trade names, trademarks, and service market (the "Intellectual Property") in connection with the name and investment strategies of the Fund. Such licenses may be terminated by the licensor and, as a result, the Fund may lose its ability to use the Intellectual Property. There is also no guarantee that the applicable licensor has all rights to license the Intellectual Property for use by the Fund. Accordingly, in the event a license is terminated or a licensor does not have rights to license the Intellectual Property, it may have a significant effect on the operation of the Fund and may result in a change in the investment policy or closure of the Fund.

Concentration

To the extent that a Fund's investments are concentrated in or significantly exposed to a particular sector, the Fund will be susceptible to loss due to adverse occurrences affecting that sector. Each Fund will be subject to the risk that economic, political or other conditions that have a negative effect on these sectors may adversely affect the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

INVESTMENT RESTRICTIONS

The Fund has adopted the following restrictions as fundamental policies, which may not be changed without the favorable "vote of the holders of a majority of the outstanding voting securities" of the Fund, as defined in the 1940 Act. Under the 1940 Act, the "vote of the holders of a majority of the outstanding voting securities" of the Fund means the vote of the holders of the lesser of (i) 67% of the shares of the Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented or (ii) more than 50% of the outstanding shares of the Fund. The Fund's investment objective is a non-fundamental policy and may be changed without shareholder approval.

Each Fund may not:

1. Issue senior securities, borrow money or pledge its assets, except that (i) the Fund may borrow from banks in amounts not exceeding one-third of its net assets (including the amount borrowed); and (ii) this restriction shall not prohibit the Fund from engaging in options transactions or short sales or investing in financial futures, swaps, when-issued or delayed delivery securities, or reverse repurchase agreements;
2. Act as underwriter, except to the extent the Fund may be deemed to be an underwriter in connection with the sale of securities in its investment portfolio;
3. With respect to 75% of the Fund's total assets, purchase the securities of any issuer (other than securities issued or guaranteed by the U.S. government or any of its agencies or instrumentalities) if, as a result, (a) more than 5% of the Fund's total assets would be invested in the securities of that issuer, or (b) the Fund would hold more than 10% of the outstanding voting securities of that issuer;
4. Invest 25% or more of its total assets, calculated at the time of purchase in any one industry (other than securities issued by the U.S. government, its agencies or instrumentalities); except that the Fund will concentrate to approximately the same extent that its Index concentrates in a particular industry;
5. Purchase or sell real estate or interests in real estate or real estate limited partnerships (although the Fund may purchase and sell securities which are secured by real estate and securities of companies which invest or deal in real estate, such as real estate investment trusts (REITs));
6. Make loans of money, except (a) for purchases of debt securities consistent with the investment policies of the Fund, (b) by engaging in repurchase agreements or, (c) through the loan of portfolio securities in an amount up to 33 1/3% of the Fund's net assets; or

7. Purchase or sell physical commodities, unless acquired as a result of ownership of securities or other instruments. This limitation shall not prevent the Fund from purchasing, selling or entering into futures contracts, or acquiring securities or other instruments and options thereon backed by, or related to, physical commodities.

Each Fund observes the following restriction as a matter of operating but not fundamental policy, pursuant to positions taken by federal regulatory authorities:

Each Fund may not invest, in the aggregate, more than 15% of its net assets in illiquid securities that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the securities.

Except with respect to borrowing, if a percentage or rating restriction on investment or use of assets set forth herein or in the Prospectus is adhered to at the time a transaction is effected, later changes in percentage resulting from any cause other than actions by the Fund will not be considered a violation.

MANAGEMENT OF THE FUND

Trustees and Officers

The overall management of the business and affairs of the Trust is vested with its Board of Trustees. The Board approves all significant agreements between the Trust and persons or companies furnishing services to it, including the agreements with the Advisor, co-administrators, distributor, custodian and transfer agent. The day-to-day operations of the Trust are delegated to its officers, except that the Advisor are responsible for making day-to-day investment decisions in accordance with each Fund’s investment objectives, strategies, and policies, all of which are subject to general supervision by the Board.

The Trustees and officers of the Trust, their years of birth and positions with the Trust, term of office with the Trust and length of time served, their business addresses and principal occupations during the past five years and other directorships held during the past five years are listed in the table below. Unless noted otherwise, each person has held the position listed for a minimum of five years. Thomas Knipper, Kathleen K. Shkuda, Larry D. Tashjian and John P. Zader are all of the Trustees who are not “interested persons” of the Trust, as that term is defined in the 1940 Act (collectively, the “Independent Trustees”).

Name, Address, Year of Birth and Position(s) held with Trust	Term of Office ^c and Length of Time Served	Principal Occupation During the Past Five Years and Other Affiliations	Number of Portfolios in the Fund Complex Overseen by Trustee ^d	Other Directorships Held by Trustee During the Past Five Years
“Independent” Trustees:				
Thomas Knipper, CPA ^a (born 1957) Trustee	Since September 2013	Vice President and Chief Compliance Officer, Ameritas Investment Partners, a registered investment advisor (1995 – present).	8	None.

Address for Mr. Dziura: 309 Woodridge Lane, Media, Pennsylvania 19063.

c Trustees and officers serve until their successors have been duly elected.

d The Trust is comprised of 13 series managed by unaffiliated investment advisors. Each Trustee serves as Trustee of each series of the Trust. The term “Fund Complex” applies only to the series managed by the same investment advisor. Each Fund does not hold itself out as related to any other series within the Trust, for purposes of investment and investor services.

e “Other Directorships Held” includes only directorship of companies required to register or file reports with the SEC under the Securities Exchange Act of 1934, as amended (that is, “public companies”) or other investment companies registered under the 1940 Act.

† Mr. Banhazl is an “interested person” of the Trust by virtue of his position with Mutual Fund Administration, LLC and Foothill Capital Management, LLC.

* Mr. Gallagher is an “interested person” of the Trust by virtue of his position with UMB Fund Services, Inc.

Compensation

Each Independent Trustee receives from the Trust a quarterly retainer of \$12,500, \$4,000 for each special in-person meeting attended and \$1,000 for each special telephonic meeting attended. The Trust has no pension or retirement plan. No other entity affiliated with the Trust pays any compensation to the Trustees.

The Trustees may elect to defer payment of their compensation from the Fund pursuant to the Trust’s non-qualified Deferred Compensation Plan for Trustees which permits the Trustees to defer receipt of all or part of their compensation from the Trust. Amounts deferred are deemed invested in shares of one or more series of the Trust, as selected by the Trustee from time to time. A Trustee’s deferred compensation account will be paid in cash at such times as elected by the Trustee, subject to certain mandatory payment provisions in the Deferred Compensation Plan. Deferral and payment elections under the Deferred Compensation Plan are subject to strict requirements for modification.

1 Estimated annual compensation for the first year.

2 There are currently numerous portfolios comprising the Trust. The term “Fund Complex” applies only to the series managed by the same investment advisor. The Funds’ investment advisor also serves as investment advisor to the AXS Alternative Growth Fund, AXS Chesapeake Strategy Fund, AXS Aspect Core Diversified Strategy Fund, AXS Managed Futures Strategy Fund, AXS Multi-Strategy Alternatives Fund, and AXS Sustainable Income Fund which are offered in separate prospectuses. The Funds do not hold themselves out as related to any other series within the Trust, for purposes of investment and investor services.

3 Messrs. Tashjian and Zader each elected to defer payment of his compensation from the Fund under the Fund’s non-qualified Deferred Compensation Plan for Trustees under which Trustees may defer receipt of all or part of their compensation from the Fund.

Messrs. Banhazl and Gallagher are not compensated for their service as Trustees because of their affiliation with the Trust. Officers of the Trust are not compensated by the Fund for their services.

Additional Information Concerning the Board and the Trustees

The current Trustees were selected in September 2013 (July 2019 for Mr. Gallagher) with a view towards establishing a Board that would have the broad experience needed to oversee a registered investment company comprised of multiple series employing a variety of different investment strategies. As a group, the Board has extensive experience in many different aspects of the financial services and asset management industries.

The Trustees were selected to join the Board based upon the following factors, among others: character and integrity; willingness to serve and willingness and ability to commit the time necessary to perform the duties of a Trustee; as to each Trustee other than Mr. Banhazl, Mr. Gallagher and Mr. Zader (at that time), satisfying the criteria for not being

classified as an “interested person” of the Trust as defined in the 1940 Act; as to Mr. Banhazl and Mr. Gallagher, their positions with Mutual Fund Administration, LLC, and UMB Fund Services, Inc., respectively, the Trust’s co-administrators. In addition, the Trustees have the following specific experience, qualifications, attributes and/or skills relevant to the operations of the Trust:

- Mr. Knipper has substantial experience with respect to the operation, administration and compliance programs of mutual funds and as a senior executive with a registered investment advisor.
- Ms. Shkuda has substantial experience in the investment management industry, including as a consultant with respect to operations and marketing of investment managers and distribution of mutual funds and other investment products.
- Mr. Tashjian has extensive leadership experience in the investment management industry, including as a principal and a chief executive officer of a registered investment advisor.
- Mr. Banhazl has significant experience serving in senior executive and board positions for mutual funds and with respect to the organization and operation of mutual funds and multiple series trusts similar to the Trust.
- Mr. Zader has substantial experience serving in senior executive positions at mutual fund administrative service providers.
- Mr. Gallagher has substantial experience serving in senior executive positions at mutual fund administrative service providers.

In its periodic self-assessment of the effectiveness of the Board, the Board considers the complementary individual skills and experience of the individual Trustees primarily in the broader context of the Board’s overall composition so that the Board, as a body, possesses the appropriate (and appropriately diverse) skills and experience to oversee the business of the Fund. The summaries set forth above as to the qualifications, attributes and skills of the Trustees are required by the registration form adopted by the SEC, do not constitute holding out the Board or any Trustee as having any special expertise or experience, and do not impose any greater responsibility or liability on any such person or on the Board as a whole than would otherwise be the case.

The Board of Trustees has three standing committees: the Audit Committee, the Nominating, Governance and Regulatory Review Committee (the “Nominating Committee”), and the Valuation Committee.

- The function of the Audit Committee, with respect to each series of the Trust, is to review the scope and results of the series’ annual audit and any matters bearing on the audit or the series’ financial statements and to assist the Board’s oversight of the integrity of the series’ pricing and financial reporting. The Audit Committee is comprised of all of the Independent Trustees and is chaired by Mr. Knipper. It does not include any Interested Trustees. The Audit Committee is expected to meet at least twice a year with respect to each series of the Trust.

The Audit Committee also serves as the Qualified Legal Compliance Committee (“QLCC”) for the Trust for the purpose of compliance with Rules 205.2(k) and 205.3(c) of the Code of Federal Regulations regarding alternative reporting procedures for attorneys retained or employed by an issuer who appear and practice before the SEC on behalf of the issuer.

- The Nominating Committee is responsible for reviewing matters pertaining to composition, committees, and operations of the Board, as well as assisting the Board in overseeing matters related to certain regulatory issues. The Nominating Committee meets from time to time as needed. The Nominating Committee will consider trustee nominees properly recommended by the Trust’s shareholders. Shareholders who wish to recommend a nominee should send nominations that include, among other things, biographical data and the qualifications of the proposed nominee to the Trust’s Secretary. The Independent Trustees comprise the Nominating Committee, and the Committee is chaired by Mr. Zader.

- The function of the Valuation Committee is to recommend to the Board for its approval methodologies for valuing securities held by any series of the Trust for which current and reliable market quotations are not readily available; monitor prices determined by officers of the Trust pursuant to such methodologies; and approve fair valued security prices that are not determined pursuant to an approved methodology. The actions of the Valuation Committee are subsequently reviewed by the Board. The Valuation Committee is comprised of all the Trustees and is chaired by Ms. Shkuda, but action may be taken by any one of the Trustees. The Valuation Committee meets as needed.

Independent Trustees comprise 67% of the Board and Larry Tashjian, an Independent Trustee, serves as Chairperson of the Board. The Chairperson serves as a key point person for dealings between the Trust's management and the other Independent Trustees. As noted above, through the committees of the Board the Independent Trustees consider and address important matters involving each series of the Trust, including those presenting conflicts or potential conflicts of interest. The Independent Trustees also regularly meet outside the presence of management and are advised by independent legal counsel. The Board has determined that its organization and leadership structure are appropriate in light of its fiduciary and oversight obligations, the special obligations of the Independent Trustees, and the relationship between the Interested Trustees and the Trust's co-administrators. The Board also believes that its structure facilitates the orderly and efficient flow of information to the Independent Trustees from management.

Consistent with its responsibility for oversight of the Funds in the interests of shareholders, the Board among other things oversees risk management of the Funds' investment programs and business affairs directly and through the Audit Committee. The Board has emphasized to the Advisor the importance of maintaining vigorous risk management programs and procedures.

The Funds face a number of risks, such as investment risk, valuation risk, reputational risk, risk of operational failure or lack of business continuity, and legal, compliance and regulatory risk. Risk management seeks to identify and address risks, i.e., events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Funds. Under the overall supervision of the Board, the Advisor, and other service providers to the Funds employ a variety of processes, procedures and controls to identify various of those possible events or circumstances, to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Different processes, procedures and controls are employed with respect to different types of risks. Various personnel, including the Trust's Chief Compliance Officer (the "CCO"), the Advisor's management, and other service providers (such as each Fund's independent registered public accounting firm) make periodic reports to the Board or to the Audit Committee with respect to various aspects of risk management. The Board recognizes that not all risks that may affect a Fund can be identified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve a Fund's investment objective, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Trustees as to risk management matters are typically summaries of the relevant information. As a result of the foregoing and other factors, the Board's risk management oversight is subject to substantial limitations.

Fund Shares Beneficially Owned by Trustees

Certain information regarding ownership by the Trustees of the Funds and other series of the Trust, as of December 31, 2019, is set forth in the following table.

Name of Trustee	Dollar Range of Equity Securities in the Funds (\$)	Aggregate Dollar Range of Equity Securities in all Registered Investment Companies Overseen by Trustee in Family of Investment Companies (\$)
Larry Tashjian, Independent Trustee	None	\$10,001 - \$50,000
Kathy Shkuda, Independent Trustee	None	None
Thomas Knipper, Independent Trustee	None	None
John P. Zader, Independent Trustee	None	\$10,001 - \$50,000
Eric M. Banhazl, Interested Trustee	None	Over \$100,000
Terrance P. Gallagher, Interested Trustee	None	None

Control Persons, Principal Shareholders, and Management Ownership

As of the date of this SAI, each Fund is under the control of the Advisor, which had voting authority with respect to 100% of the outstanding shares in each Fund on such date. However, once the Funds commence investment operations and their shares are sold to the public, this control will be diluted.

As of the date of this SAI, the Trustees and officers of the Trust as a group did not own more than 1% of the outstanding shares of each Fund. Furthermore, neither the Independent Trustees, nor members of their immediate families, own securities beneficially or of record in the Advisor, the Fund's distributor, IMST Distributors, LLC (the "Distributor"), or any of their respective affiliates.

The Advisor

AXS Investments LLC (the "Advisor" or "AXS"), located at 181 Westchester Avenue, Unit 402, Port Chester, New York 10573, acts as investment advisor to the Fund pursuant to an Investment Advisory Agreement (the "Advisory Agreement"). Subject to such policies as the Board of Trustees may determine, the Advisor is ultimately responsible for investment decisions for the Funds. Pursuant to the terms of the Advisory Agreement, the Advisor provides the Funds with such investment advice and supervision as it deems necessary for the proper supervision of each Fund's investments. The Advisor also continuously monitors and maintains each Fund's investment criteria and determines from time to time what securities may be purchased by the Funds. AXS Investments LLC is wholly owned by AXS Holdings LLC. AXS Holdings LLC is ultimately controlled by Gregory Bassuk.

The Advisory Agreement will remain in effect for an initial two-year period. After the initial two-year period, the Advisory Agreement will continue in effect with respect to a Fund from year to year only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Funds' outstanding voting securities and by a majority of the Trustees who are not parties to the Advisory Agreement or interested persons of any such party, at a meeting called for the purpose of voting on the Advisory Agreement. The Advisory Agreement is terminable without penalty by the Trust on behalf of the Funds, upon giving the Advisor 60 days' notice when authorized either by a majority vote of the Funds' shareholders or by a vote of a majority of the Board, or by the Advisor on 60 days' written notice, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act). The Advisory Agreement provides that the Advisor shall not be liable for any error of judgment or for any loss suffered by the Trust in connection with the Advisory Agreement, except for a loss resulting from a breach of fiduciary duty, or for a loss resulting from willful misfeasance, bad faith or gross negligence in the performance of its duties, or from reckless disregard by the Advisor of its duties under the Advisory Agreement.

In consideration of the services to be provided by the Advisor pursuant to the Advisory Agreement, the Advisor is entitled to receive from each Fund an investment advisory fee computed daily and paid monthly based on an annual rate equal to a percentage of the Fund's average daily net assets specified in the Prospectus.

Fund Expenses

Each Fund is responsible for its own operating expenses (all of which will be borne directly or indirectly by the Funds' shareholders), including among others, legal fees and expenses of counsel to the Funds and the Funds' Independent Trustees; insurance (including Trustees' and officers' errors and omissions insurance); auditing and accounting expenses; taxes and governmental fees; listing fees; dues and expenses incurred in connection with membership in investment company organizations; fees and expenses of the Funds' custodians, administrators, transfer agents, registrars and other service providers; expenses for portfolio pricing services by a pricing agent, if any; expenses in connection with the issuance and offering of shares; expenses relating to investor and public relations; expenses of registering or qualifying securities of the Funds' for public sale; brokerage commissions and other costs of acquiring or disposing of any portfolio holding of the Funds; expenses of preparation and distribution of reports, notices and dividends to shareholders; expenses of the dividend reinvestment plan; compensation and expenses of Trustees; any litigation expenses; and costs of shareholders' and other meetings.

The Advisor has contractually agreed to waive its fees and/or pay for operating expenses of each Fund to ensure that the total annual Fund operating expenses (excluding, as applicable, any taxes, leverage interest, brokerage commissions, dividend expenses on short sales, acquired fund fees and expenses as determined in accordance with Form N-1A, expenses incurred in connection with any merger or reorganization, and extraordinary expenses such as litigation expenses) to the limit set forth in the Expense Table in the Prospectus (the "expense cap"). This agreement is effective

until November 20, 2022. The agreement may be terminated before that date with respect to a Fund only by the Board of Trustees. The Advisor is permitted to seek reimbursement from each Fund, subject to certain limitations, of fees waived or payments made to the Fund for a period ending three full years after the date of the waiver or payment. Similarly, the Predecessor Fund’s advisor, Good Harbor Financial LLC (“Good Harbor”), is permitted to seek reimbursement from a Fund, subject to certain limitations, of fees waived or payments made by Good Harbor to the Predecessor Fund prior to the reorganization of the Predecessor Fund into the corresponding Fund, for a period ending three years after the date of the waiver or payment. In each case, any such reimbursement may be requested from a Fund if the reimbursement will not cause the Fund’s annual expense ratio to exceed the lesser of (a) the expense limitation in effect at the time such fees were waived or payments made, or (b) the expense limitation in effect at the time of the reimbursement. Any reimbursement of fees waived or payments made by Good Harbor to each Predecessor Fund prior to the applicable reorganization must be approved by the Trust’s Board.

Fund	Expense Cap as percent of the average daily net assets		
	Class A	Class C	Class I
AXS Thomson Reuters Private Equity Return Tracker Fund	1.75%	2.50%	1.50%
AXS Thomson Reuters Venture Capital Return Tracker Fund	1.75%	2.50%	1.50%

Portfolio Managers

Set forth below is the following information with respect to each portfolio manager who is primarily responsible for the day-to-day management of each Fund’s portfolio, as identified in the Prospectus: (i) other accounts managed by the portfolio manager, (ii) a description of the portfolio manager’s compensation structure and (iii) the dollar range of the portfolio manager’s investments in each Fund.

Portfolio Managers	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
Greg Bassuk	0	\$0	0	\$0	0	\$0
Mark Lacuesta	4	\$217 million	0	\$0	0	\$0

Number of Accounts with Advisory Fee Based on Performance						
Portfolio Managers	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
Greg Bassuk	0	\$0	0	\$0	0	\$0
Mark Lacuesta	0	\$0	0	\$0	0	\$0

Material Conflicts of Interest. Actual or apparent conflicts of interest may arise when a portfolio manager has day-to-day management responsibilities with respect to more than one fund or other account. Where conflicts of interest arise between a Fund and other accounts managed by a portfolio manager, the Advisor will proceed in a manner that ensures that the Fund will not be treated less favorably than the other accounts. There may be instances where similar portfolio transactions may be executed for the same security for numerous accounts managed by the portfolio manager. In such instances, securities will be allocated in accordance with the Advisor’s trade allocation policy.

Compensation. Mr. Bassuk and Mr. Lacuesta are compensated by the Advisor. Each receive a fixed base salary and discretionary bonus. The portfolio managers’ compensation arrangements are not determined on the basis of specific funds or accounts managed.

Ownership of the Funds by Portfolio Manager. The following chart sets forth the dollar range of shares owned by each portfolio manager in the Predecessor Funds as the date of this SAI.

	Dollar Range of Securities in the Funds (A: None, B: \$1-\$10,000, C: \$10,001-\$50,000, D: \$50,001-\$100,000, E: \$100,001 - \$500,000, F: \$500,001 - \$1,000,000, G: Over \$1,000,000)

Mark Lacuesta	A	A

Manager of Managers Structure

AXS and the Trust has applied for an exemptive order from the SEC for the Funds pursuant to which AXS would operate the Funds under a “manager of managers” structure (the “Order”). If granted by the SEC, the Order would permit AXS, subject to the approval of the Board, to hire or replace sub-advisors and modify any existing or future agreement with such sub-advisors without obtaining shareholder approval. Until the requested Order is granted, any sub-advisor hired by a Fund must be approved by shareholders. There can be no guarantee that the SEC will grant the Order.

Service Providers

Pursuant to a Co-Administration Agreement (the “Co-Administration Agreement”), UMB Fund Services, Inc. (“UMBFS”), 235 West Galena Street, Milwaukee, Wisconsin 53212, and Mutual Fund Administration, LLC (“MFAC”), 2220 E. Route 66, Suite 226, Glendora, California 91740 (collectively the “Co-Administrators”), act as co-administrators for the Funds. The Co-Administrators provide certain administrative services to the Funds, including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Funds’ independent contractors and agents; preparing for signature by an officer of the Trust of all documents required to be filed for compliance with applicable laws and regulations including those of the securities laws of various states; arranging for the computation of performance data, including net asset value and yield; arranging for the maintenance of books and records of the Funds; and providing, at their own expense, office facilities, equipment and personnel necessary to carry out their duties. In this capacity, the Co-Administrators do not have any responsibility or authority for the management of the Funds, the determination of investment policy, or for any matter pertaining to the distribution of Fund shares. The Co-Administration Agreement provides that neither Co-Administrator shall be liable for any error of judgment or mistake of law or for any loss suffered by the Trust or its series, except for losses resulting from a Co-Administrator’s willful misfeasance, bad faith or negligence in the performance of its duties or from reckless disregard by it of its obligations and duties under the Agreement.

Pursuant to the Co-Administration Agreement, each Fund pays the Co-Administrators a fee for administration services. The fee is payable monthly based on the Fund’s average daily net assets.

UMBFS also acts as the Trust’s fund accountant, transfer agent and dividend disbursing agent pursuant to separate agreements.

UMB Bank, n.a. (the “Custodian”), an affiliate of UMBFS, is the custodian of the assets of the Fund pursuant to a custody agreement between the Custodian and the Trust, whereby the Custodian provides services for fees on a transactional basis plus out-of-pocket expenses. The Custodian’s address is 928 Grand Boulevard, Kansas City, Missouri 64106. The Custodian does not participate in decisions pertaining to the purchase and sale of securities by the Fund.

RSM US LLP (“RSM”), located at 555 17th St., Suite 1200, Denver, Colorado 80202, is the independent registered public accounting firm for the Funds. Its services include auditing the Funds’ financial statements and the performance of related tax services.

Morgan, Lewis & Bockius LLP (“Morgan Lewis”) 600 Anton Boulevard, Suite 1800, Costa Mesa, California 92626, serves as legal counsel to the Trust and to the Independent Trustees.

Distributor and the Distribution Agreement

IMST Distributors, LLC is the distributor (also known as the principal underwriter) of the shares of the Funds and is located at Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor is a registered broker-dealer and is a member of the Financial Industry Regulatory Authority, Inc. (“FINRA”). The Distributor is not affiliated with the Trust, the Advisor, or any other service provider for the Funds.

Under a Distribution Agreement with the Trust dated January 1, 2013 (the “Distribution Agreement”), the Distributor acts as the agent of the Trust in connection with the continuous offering of shares of the Funds. The Distributor continually distributes shares of the Funds on a best efforts basis. The Distributor has no obligation to sell any specific quantity of Fund shares. The Distributor and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Trust.

The Distributor may enter into agreements with selected broker-dealers, banks or other financial intermediaries for distribution of shares of the Funds. With respect to certain financial intermediaries and related fund “supermarket” platform arrangements, the Funds and/or the Advisor, rather than the Distributor, typically enter into such agreements. These financial intermediaries may charge a fee for their services and may receive shareholder service or other fees from parties other than the Distributor. These financial intermediaries may otherwise act as processing agents and are responsible for transmitting purchase, redemption and other requests to the Funds.

Investors who purchase shares through financial intermediaries will be subject to the procedures of those intermediaries through which they purchase shares, which may include charges, investment minimums, cutoff times and other restrictions in addition to, or different from, those listed herein. Information concerning any charges or services will be provided to customers by the financial intermediary through which they purchase shares. Investors purchasing shares of the Fund through financial intermediaries should acquaint themselves with their financial intermediary’s procedures and should read the Prospectus in conjunction with any materials and information provided by their financial intermediary. The financial intermediary, and not its customers, will be the shareholder of record, although customers may have the right to vote shares depending upon their arrangement with the financial intermediary. The Distributor does not receive compensation from the Fund for its distribution services except the distribution/service fees with respect to the shares of those classes for which a Rule 12b-1 distribution plan is effective. The Advisor pays the Distributor a fee for certain distribution-related services.

The Distribution Agreement will continue in effect with respect to a Fund only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund’s outstanding voting securities in accordance with the 1940 Act. The Distribution Agreement is terminable without penalty by the Trust on behalf of a Fund on no less than 60 days’ written notice when authorized either by a vote of a majority of the outstanding voting securities of the Fund or by vote of a majority of the members of the Board who are not “interested persons” (as defined in the 1940 Act) of the Trust and have no direct or indirect financial interest in the operation of the Distribution Agreement, or by the Distributor, and will automatically terminate in the event of its “assignment” (as defined in the 1940 Act). The Distribution Agreement provides that the Distributor shall not be liable for any error of judgment or mistake of law or for any loss suffered by the Trust in connection with the performance of the Distributor’s obligations and duties under the Distribution Agreement, except a loss resulting from the Distributor’s willful misfeasance, bad faith or gross negligence in the performance of such duties and obligations, or by reason of its reckless disregard thereof.

The Distributor does not retain sales charges for the sale of a Fund’s Class A shares. Pursuant to the Distribution Agreement, should any amounts be retained by the Distributor, such amounts would not be held for profit by the Distributor, but instead would be used solely for distribution-related expenditures.

Dealer Reallowances

The Funds’ shares are subject to a sales charge that includes a dealer reallowance, which varies depending on how much the shareholder invests. The Distributor pays the appropriate dealer reallowance to dealers who have entered into an

agreement with the Distributor to sell shares of the Funds. More detailed information on the sales charge and its application is contained in the Prospectus.

Rule 12b-1 Plan

The Trust has adopted a plan pursuant to Rule 12b-1 under the 1940 Act (the “12b-1 Plan”) that provides for Fund assets to be used for the payment for distribution services for Class A shares and Class C shares. The 12b-1 Plan provides alternative methods for paying sales charges and may help the Funds grow or maintain asset levels to provide operational efficiencies and economies of scale. The 12b-1 Plan also provides for the payment of service fees in connection with the provision of post-sales shareholder liaison services to holders of Class A shares and Class C shares as defined in FINRA regulations, including personal services such as responding to customer inquiries, and services related to the maintenance of shareholder accounts. Because 12b-1 fees are paid out of Fund assets attributable to Class A shares and Class C shares on an ongoing basis, they will, over time, increase the cost of an investment and may cost more than other types of sales charges.

The 12b-1 Plan provides that the distribution fees paid by Class A or Class C shares of the Fund may be used to pay for any expenses primarily intended to result in the sale of shares of such Class, including, but not limited to: (a) costs of payments, including incentive compensation, made to agents for and consultants to the Distributor or the Trust, including pension administration firms that provide distribution services and broker-dealers that engage in the distribution of the shares of such Class of the Fund; (b) payments made to, and expenses of, persons who provide support services in connection with the distribution of shares of such Class of the Fund; (c) payments made pursuant to any dealer agreements between the Distributor and certain broker-dealers, financial institutions and other service providers with respect to such Class of the Fund; (d) costs relating to the formulation and implementation of marketing and promotional activities; (e) costs of printing and distributing prospectuses, statements of additional information and reports of the Fund to prospective shareholders of such Class of the Fund; (f) costs involved in preparing, printing and distributing sales literature pertaining to such Class of the Fund; (g) costs involved in obtaining such information, analyses and reports with respect to marketing and promotional activities that the Trust may deem advisable with respect to such Class of the Fund; and (h) reimbursement to the Advisor for expenses advanced on behalf of the Fund or Class with respect to such activities. The 12b-1 Plan is a compensation plan, which means that the Distributor is compensated regardless of its expenses, as opposed to a reimbursement plan which reimburses only for expenses incurred. The Distributor does not retain any 12b-1 fees for profit. All 12b-1 fees are held in a retention account by the Distributor to pay for and/or reimburse the Advisor for distribution-related expenditures.

The 12b-1 Plan may not be amended to materially increase the amount to be paid by the Funds; Class A or Class C shares for distribution services without the vote of a majority of the outstanding voting securities of such shares. The 12b-1 Plan shall continue in effect indefinitely with respect to a Class, provided that such continuance is approved at least annually by a vote of a majority of the Trustees, including the Independent Trustees, cast in person at a meeting called for such purpose or by vote of at least a majority of the outstanding voting securities of such Class. The 12b-1 Plan may be terminated with respect to a Class at any time without penalty by vote of a majority of the Independent Trustees or by vote of the majority of the outstanding voting securities of such Class.

If the 12b-1 Plan is terminated for the Funds’ Class A shares or Class C shares in accordance with its terms, the obligation of the Fund to make payments pursuant to the 12b-1 Plan with respect to such Class will cease and the Fund will not be required to make any payments past the termination date. Thus, there will be no legal obligation for the Fund to make any payments other than for fees already payable under the 12b-1 Plan, if the 12b-1 Plan is terminated in accordance with its terms for any reason.

The following payments were made by the Predecessor Funds’ previous distributor under the Rule 12b-1 plan with respect to the Predecessor Fund during the Predecessor Fund’s fiscal year ended September 30, 2019.

AXS Fund	AXS Thomson Reuters Private Equity Return Tracker Fund	AXS Thomson Reuters Venture Capital Return Tracker Fund
Total Dollars Allocated		
Advertising/Marketing	\$0	\$0
Printing/Postage	\$0	\$0
Payment to distributor	\$(47)	\$3,236
Payment to dealers	\$9,595	\$82,494
Compensation to sales personnel	\$0	\$0
Interest, carrying, or other financing charges	\$0	\$0
Other	\$1,621	\$57,882
Total	\$11,169	\$143,612

Marketing and Support Payments

The Advisor, out of its own resources and without additional cost to the Funds or its shareholders, may provide cash payments or other compensation to certain financial intermediaries who sell shares of the Fund. These payments are in addition to other fees described in the Funds' Prospectus and this SAI, and are generally provided for shareholder services or marketing support. Payments for marketing support are typically for inclusion of a Fund on sales lists, including electronic sales platforms. Investors may wish to take these payments into account when considering and evaluating recommendations to purchase shares of the Funds.

PORTFOLIO TRANSACTIONS AND BROKERAGE

Pursuant to the Advisory Agreement, the Advisor determines which securities are to be purchased and sold by each Fund and which broker-dealers are eligible to execute each Fund's portfolio transactions. The purchases and sales of securities in the over-the-counter market will generally be executed by using a broker for the transaction.

Purchases of portfolio securities for a Fund also may be made directly from issuers or from underwriters. Where possible, purchase and sale transactions will be effected through dealers (including banks) that specialize in the types of securities which a Fund will be holding unless better executions are available elsewhere. Dealers and underwriters usually act as principals for their own accounts. Purchases from underwriters will include a concession paid by the issuer to the underwriter and purchases from dealers will include the spread between the bid and the asked price. If the execution and price offered by more than one dealer or underwriter are comparable, the order may be allocated to a dealer or underwriter that has provided research or other services as discussed below.

In placing portfolio transactions, the Advisor will use reasonable efforts to choose broker-dealers capable of providing the services necessary to obtain the most favorable price and execution available. The full range and quality of services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the broker-dealer involved, the risk in positioning the block of securities, and other factors. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers which furnish or supply research and statistical information to the Advisor that they may lawfully and appropriately use in their investment advisory capacities, as well as provide other services in addition to execution services. The Advisor considers such information, which is in addition to and not in lieu of the services required to be performed by it under its Advisory Agreement with the Funds, to be useful in varying degrees, but of indeterminable value.

While it is each Fund's general policy to seek to obtain the most favorable price and execution available in selecting a broker-dealer to execute portfolio transactions for the Fund, weight is also given to the ability of a broker-dealer to furnish brokerage and research services as defined in Section 28(e) of the Securities Exchange Act of 1934, as amended, to the Fund or to the Advisor, even if the specific services are not directly useful to the Funds and may be useful to the Advisor in advising other clients. In negotiating commissions with a broker or evaluating the spread to be paid to

a dealer, a Fund may therefore pay a higher commission or spread than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Advisor to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-dealer. The standard of reasonableness is to be measured in light of the Advisor's overall responsibilities to each Fund.

Investment decisions for each Fund are made independently from those of other client accounts that may be managed or advised by the Advisor. Nevertheless, it is possible that at times, identical securities will be acceptable for both a Fund and one or more of such client accounts. In such event, the position of the Fund and such client accounts in the same issuer may vary and the holding period may likewise vary. However, to the extent any of these client accounts seek to acquire the same security as a Fund at the same time, the Fund may not be able to acquire as large a position in such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, a Fund may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time as the Advisor's other client accounts.

The Funds do not effect securities transactions through brokers in accordance with any formula, nor do they effect securities transactions through brokers for selling shares of the Funds. However, broker-dealers who execute brokerage transactions may effect purchase of shares of the Funds for their customers. The brokers may also supply the Fund with research, statistical and other services.

The Predecessor Funds paid the following brokerage commissions for the periods indicated:

	Brokerage Commissions
AXS Thomson Reuters Private Equity Return Tracker Fund	
For the Fiscal Year Ended September 30, 2019	\$2,640
For the Fiscal Year Ended September 30, 2018	\$2,225
For the Fiscal Year Ended September 30, 2017	\$1,351
AXS Thomson Reuters Venture Capital Return Tracker Fund	
For the Fiscal Year Ended September 30, 2019	\$20,156
For the Fiscal Year Ended September 30, 2018	\$11,590
For the Fiscal Year Ended September 30, 2017	\$2,791

Fluctuations in brokerage commissions from year to year were due to increases or decreases in Fund assets resulting in increased trading.

Holdings of Securities of the Funds' Regular Brokers and Dealers

From time to time, a Fund may acquire and hold securities issued by its "regular brokers or dealers" or the parents of those brokers or dealers. "Regular brokers or dealers" (as such term is defined in the 1940 Act) of a Fund are the ten brokers or dealers that, during the most recent fiscal year, (i) received the greatest dollar amounts of brokerage commissions from the Fund's portfolio transactions, (ii) engaged as principal in the largest dollar amounts of the portfolio transactions of the Fund, or (iii) sold the largest dollar amounts of the Fund's shares. The Predecessor Funds did not hold any securities of any "regular brokers or dealers" during the fiscal year ended September 30, 2019.

PORTFOLIO TURNOVER

Although the Funds generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Advisor, as applicable, investment considerations warrant such action. Portfolio turnover rate is calculated by dividing (1) the lesser of purchases or sales of portfolio securities for the fiscal year by (2) the monthly average of the value of portfolio securities owned during the fiscal year. A 100% turnover rate would occur if all the securities in a Fund's portfolio, with the exception of securities whose maturities at the time of acquisition were one year or less, were sold and either repurchased or replaced within one year. A high rate of portfolio turnover (100% or more) generally leads to higher transaction costs and may result in a greater number of taxable transactions. To the extent net short-term capital gains are realized, any distributions resulting from such gains will generally be taxed at ordinary income tax rates for federal income tax purposes.

The Predecessor Funds' portfolio turnover rates were as follows for the periods indicated.

	Fiscal Year Ended	
	September 30, 2019	September 30, 2018
AXS Thomson Reuters Private Equity Return Tracker Fund	72%	38%
AXS Thomson Reuters Venture Capital Return Tracker Fund	115%	47%

The increase in turnover rate for the AXS Thomson Reuters Venture Capital Return Tracker Fund's Predecessor Fund was primarily caused by increased flow activity in the Predecessor Fund between September 30, 2018 and September 30, 2019. This led to increased trading activity which ultimately caused the turnover rate to increase.

PROXY VOTING POLICY

The Board has adopted Proxy Voting Policies and Procedures (the "Trust Policies") on behalf of the Trust, which delegates the responsibility for voting each Fund's proxies to the Advisor, as applicable, subject to the Board's continuing oversight. The Trust Policies require that the Advisor vote proxies received in a manner consistent with the best interests of the Fund. The Trust Policies also require the Advisor to present to the Board, at least annually, the Advisor's Proxy Voting Policies and Procedures ("Advisor's Policies") and a record of each proxy voted by the Advisor on behalf of each Fund, including a report on the resolution of all proxies identified by the Advisor as involving a conflict of interest. See Appendix B for the Advisor's Proxy Policies and Procedures and the Trust Policies. The Trust Policies and Advisor's Policies are intended to serve as guidelines and to further the economic value of each security held by the Funds. The Trust's CCO will review the policies annually. Each proxy will be considered individually, taking into account the relevant circumstances at the time of each vote. Aspect and Chesapeake do not currently engage in, nor does it anticipate engaging in, the purchase or sale of voting securities and therefore currently does not receive, nor vote, proxies nor does it anticipate receiving or voting proxies.

If a proxy proposal raises a material conflict between the Advisor's interests and a Fund's interests, the Advisor will resolve the conflict by following the policy guidelines or the recommendation of an independent third party.

Each Fund is required to annually file Form N-PX, which lists the Fund's complete proxy voting record for the 12-month period ended June 30 of each year. Once filed, the Fund's proxy voting record will be available without charge, upon request, by calling toll-free 1-833-AXS-ALTS (1-833-297-2587) and on the SEC's web site at www.sec.gov.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). In order to ensure compliance with this law, the Program provides for the development and implementation of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program.

Procedures to implement the Program include, but are not limited to, determining that the Funds' Distributor and Transfer Agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity, checking shareholder names against designated government lists, including Office of Foreign Assets Control ("OFAC"), and a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

PORTFOLIO HOLDINGS INFORMATION

The Funds have adopted policies and procedures regarding disclosure of portfolio holdings information (the "Disclosure Policy"). The Board of Trustees determined that the adoption of the Disclosure Policy, including the disclosure permitted therein, was in the best interests of the Funds. The Disclosure Policy applies to the Funds, Advisor, and other internal parties involved in the administration, operation or custody of the Funds, including, but not limited to UMBFS, MFAC, the Board of Trustees, counsel to the Trust and Independent Trustees, Morgan Lewis, and the Funds' independent registered public accounting firm, RSM (collectively, the "Service Providers"). Pursuant to the Disclosure Policy, non-public information concerning a Fund's portfolio holdings may be disclosed to its Service Providers only if such disclosure is consistent with the antifraud provisions of the federal securities laws and the fiduciary duties owed by the Fund and the Advisor to the Fund's shareholders. The Funds and their Service Providers may not receive compensation or any other consideration (which includes any agreement to maintain assets in a Fund or in other investment companies or accounts managed by the Advisor, or any or their affiliated persons) in connection with the disclosure of portfolio holdings information of the Funds. The Funds' Policy is implemented and overseen by the CCO of the Trust, subject to the oversight of the Board of Trustees. Periodic reports regarding these procedures will be provided to the Trust's Board.

Portfolio holdings information will be deemed public when it has been (1) posted to the Funds' public website (www.axsinvestments.com) or (2) disclosed in periodic regulatory filings on the SEC's website (www.sec.gov). Management of the Funds may make publicly available its portfolio holdings on the Fund's public website no earlier than five days after the date of such information (e.g., information as of January 31 may be made available no earlier than February 5).

Non-Public Portfolio Holdings Information Policy. All portfolio holdings information that has not been disseminated in a manner making it available to investors generally as described above is considered non-public portfolio holdings information for the purposes of the Disclosure Policy. Pursuant to the Disclosure Policy, the Funds or their Service Providers may disclose non-public portfolio holdings information to certain third parties who fall within pre-authorized categories on a daily basis, with no lag time unless otherwise specified below. These third parties include: (i) the Funds' Service Providers and others who need access to such information in the performance of their contractual or other duties and responsibilities to the Funds (e.g., custodians, accountants, the Advisor, administrators, attorneys, officers and Trustees) and who are subject to duties of confidentiality imposed by law or contract, (ii) brokers who execute trades for the Funds, (iii) evaluation service providers (as described below) and (iv) shareholders receiving in-kind redemptions (as described below).

Evaluation Service Providers. These third parties include mutual fund evaluation services, such as Morningstar, Inc. and Lipper, Inc. if the Funds have a legitimate business purpose for disclosing the information, provided that the third party expressly agrees to maintain the non-public portfolio holdings information in confidence and not to trade portfolio securities based on the non-public portfolio holdings information. Subject to the terms and conditions of any agreement between the Funds or their authorized service providers and the third party, if these conditions for disclosure are satisfied, there shall be no restriction on the frequency with which the Funds' non-public portfolio holdings information is released, and no lag period shall apply. In addition, persons who owe a duty of trust or confidence to the Funds or their Service Providers (such as legal counsel) may receive non-public portfolio holdings information without entering into a non-disclosure agreement.

Shareholder In-Kind Distributions. A Fund may, in certain circumstances, pay redemption proceeds to a shareholder by an in-kind distribution of portfolio securities (instead of cash). In such circumstances, pursuant to the Disclosure Policy, Fund shareholders may receive a complete listing of the portfolio holdings of the Fund up to seven (7) calendar days prior to making the redemption request provided that they represent orally or in writing that they agree to maintain

the confidentiality of the portfolio holdings information and not to trade portfolio securities based on the non-public holdings information.

Other Entities. Pursuant to the Disclosure Policy, the Funds or the Advisor may disclose non-public portfolio holdings information to a third party who does not fall within the pre-approved categories, and who are not executing broker-dealers; however, prior to the receipt of any non-public portfolio holdings information by such third party, the recipient must have entered into a non-disclosure agreement and the disclosure arrangement must have been approved by the CCO of the Trust. The CCO will report to the Board of Trustees on a quarterly basis regarding any recipients of non-public portfolio holdings information approved pursuant to this paragraph. There are no other ongoing arrangements as of the date of this SAI.

The Advisor and its affiliates may provide investment advice to clients other than the Fund that have investment objectives that may be substantially similar to those of the Fund. These clients also may have portfolios consisting of holdings substantially similar to those of the Fund and generally have access to current portfolio holdings information for their accounts. These clients do not owe the Advisor or the Fund a duty of confidentiality with respect to disclosure of their portfolio holdings.

Current Arrangements Regarding Disclosure of Portfolio Holdings As of the date of this SAI, the Trust or the Funds have on-going business arrangements with the following entities which involve making portfolio holdings information available to such entities as an incidental part of the services they provide to the Trust: (i) AXS Investments, LLC, the Advisor, MFAC and UMBFS (the Co-Administrators) and UMB Bank, N.A. (the Custodian), pursuant to investment management, administration and custody agreements, respectively, under which the Funds' portfolio holdings information is provided daily on a real-time basis (i.e., with no time lag); (ii) RSM (independent registered public accounting firm) Morgan Lewis (attorneys) to whom the Funds provide portfolio holdings information on a regular basis with varying lag times after the date of the information, under which the Fund's portfolio holdings information is provided daily with no time lag; (iii) Practical Computer Application pursuant to an agreement with MFAC under which the Trust's portfolio holdings information is provided on a real-time basis; (iv) Donnelley Financial Solutions to whom the Trust provides portfolio holdings information on a monthly basis in connection with the filings of Form N-PORT; (v) ICE Data Services, which assist the Funds with classifying their holdings pursuant to its liquidity risk management program and the Fund's portfolio holdings information is provided monthly on a one- to ten-day time lag; and (vi) Morningstar, Inc., Lipper Inc., Refinitiv, Thomson Financial, Vickers Stock Research Corporation, and Bloomberg L.P., to which the Funds' portfolio holdings information is provided quarterly after the end of the previous fiscal quarter, with a 60-day time lag and no earlier than the date such information is filed on the SEC's EDGAR system on Form N-Q (for the first and third fiscal quarters) or the Annual or Semi-Annual Report is mailed to shareholders (for the second and fourth fiscal quarters), as applicable.

DETERMINATION OF NET ASSET VALUE

The NAVs of each Fund's shares will fluctuate and are determined as of 4:00 p.m. Eastern Time, the normal close of regular trading on the New York Stock Exchange (the "NYSE") on each day the NYSE is open for trading. The NAVs may be calculated earlier if permitted by the SEC. The NYSE annually announces the days on which it will not be open for trading. The most recent announcement indicates that the NYSE will not be open for the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. However, the NYSE may close on days not included in that announcement.

The NAV of each class of each Fund is computed by dividing (a) the difference between the value of the Fund's securities, cash and other assets and the amount of the Fund's expenses and liabilities attributable to the class by (b) the number of shares outstanding in that class (assets – liabilities / # of shares = NAV). Each NAV takes into account all of the expenses and fees of that class of a Fund, including management fees and administration fees, which are accrued daily.

$$\frac{\text{Net Assets}}{\text{Shares Outstanding}} = \text{NAV}$$

Generally, a Fund's investments are valued at market value or, in the absence of a market value, at fair value as determined in good faith by the Advisor and the Trust's Valuation Committee pursuant to procedures approved by or under the direction of the Board. Pursuant to those procedures, the Board considers, among other things: 1) the last sale price on the securities exchange, if any, on which a security is primarily traded; 2) the mean between the bid and ask prices; 3) price quotations from an approved pricing service (which use information provided by market makers or estimates of market value based on similar securities), and 4) other factors as necessary to determine a fair value under certain circumstances.

A Fund's securities which are traded on securities exchanges are valued at the last sale price on the exchange on which such securities are traded, as of the close of business on the day the securities are being valued or, lacking any reported sales, at the mean between the last available bid and ask prices.

Pricing services generally value debt securities assuming orderly transactions of an institutional round lot size, but such securities may be held or transactions may be conducted in such securities in smaller, odd lot sizes. Odd lots often trade at lower prices than institutional round lots.

Securities that are traded on more than one exchange are valued on the exchange determined by the Advisor to be the primary market. Securities primarily traded in the National Association of Securities Dealers Automated Quotation ("NASDAQ"), National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price ("NOCP"). If the NOCP is not available, such securities shall be valued at the last sale price on the day of valuation, or if there has not been any sale on such day, at the mean between the bid and ask prices. Over-the-counter ("OTC") securities which are not traded in the NASDAQ National Market System shall be valued at the most recent trade price.

Stocks that are "thinly traded" or events occurring when a foreign market is closed but the NYSE is open (for example, the value of a security held by a Fund has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded) may create a situation in which a market quote would not be readily available. When a market quote is not readily available, the security's value is based on "fair value" as determined by procedures adopted by the Board. The Board will periodically review the reliability of the Funds' fair value methodology. A Fund may hold portfolio securities such as those traded on foreign securities exchanges that trade on weekends or other days when the Funds' shares are not priced. Therefore, the value of the Fund's shares may change on days when shareholders will not be able to purchase or redeem shares.

Short-term debt obligations with remaining maturities in excess of 60 days are valued at current market prices, as discussed above. Short-term securities with 60 days or less remaining to maturity are, unless conditions indicate otherwise, are amortized to maturity based on their cost to a Fund if acquired within 60 days of maturity or, if already held by the Fund on the 60th day, based on the value determined on the 61st day.

All other assets of the Funds are valued in such manner as the Board in good faith deems appropriate to reflect as their fair value.

PURCHASE AND REDEMPTION OF FUND SHARES

Detailed information on the purchase and redemption of shares is included in the Funds' Prospectus. Shares of each Fund are sold at the next offering price calculated after receipt of an order for purchase. In order to purchase shares of a Fund, you must invest the initial minimum investment for the relevant class of shares. However, each Fund reserves the right, in its sole discretion, to waive the minimum initial investment amount for certain investors, or to waive or reduce the minimum initial investment for 401(k) plans or other tax-deferred retirement plans. You may purchase shares on any day that the NYSE is open for business by placing orders with the Fund.

Each Fund reserves the right to refuse any purchase requests, particularly those that would not be in the best interests of the Fund or its shareholders and could adversely affect the Fund or its operations. This includes those from any individual or group who, in the Fund's view, is likely to engage in or has a history of excessive trading (usually defined as more than four round-trip transactions out of the Fund within a calendar year). Furthermore, the Trust may suspend the right to redeem its shares or postpone the date of payment upon redemption for more than seven calendar days (i) for any period during which the NYSE is closed (other than customary weekend or holiday closings) or trading on the

NYSE is restricted; (ii) for any period during which an emergency exists affecting the sale by a Fund of securities or making such sale or the fair determination of the value of the Fund's net assets not reasonably practicable; or (iii) for such other periods as the SEC may permit for the protection of the Fund's shareholders. In addition, if shares are purchased using a check and a redemption is requested before the check has cleared, the Fund may postpone payment of your redemption proceeds up to 15 days while the Fund waits for the check to clear.

Redemptions In-Kind

The Trust has filed an election under SEC Rule 18f-1 committing to pay in cash all redemptions by a shareholder of record up to amounts specified by the rule (the lesser of (i) \$250,000 or (ii) 1% of each Fund's assets). Each Fund has reserved the right to pay the redemption price of its shares in excess of the amounts specified by the rule, either totally or partially, by a distribution in-kind of portfolio securities (instead of cash). The securities so distributed would be valued at the same amounts as those assigned to them in calculating the NAV for the Fund shares being redeemed. If a shareholder receives a distribution in-kind, the shareholder could incur brokerage or other charges in converting the securities to cash.

No Fund intends to hold any significant percentage of its portfolio in illiquid securities, although each Fund, like virtually all mutual funds, may from time to time hold a small percentage of securities that are illiquid. In the unlikely event a Fund were to elect to make an in-kind redemption, each Fund expects that it would follow the normal protocol of making such distribution by way of a pro rata distribution based on its entire portfolio. If the Fund held illiquid securities, such distribution may contain a pro rata portion of such illiquid securities or the Fund may determine, based on a materiality assessment, not to include illiquid securities in the in-kind redemption. No Fund anticipates that it would ever selectively distribute a greater than pro rata portion of any illiquid securities to satisfy a redemption request. If such securities are included in the distribution, shareholders may not be able to liquidate such securities and may be required to hold such securities indefinitely. Shareholders' ability to liquidate such securities distributed in-kind may be restricted by resale limitations or substantial restrictions on transfer imposed by the issuers of the securities or by law. Shareholders may only be able to liquidate such securities distributed in-kind at a substantial discount from their value, and there may be higher brokerage costs associated with any subsequent disposition of these securities by the recipient.

FEDERAL INCOME TAX MATTERS

The following is a summary of certain material U.S. federal (and, where noted, state and local) income tax considerations affecting each Fund and its shareholders. The discussion is very general. Current and prospective shareholders are therefore urged to consult their own tax advisors with respect to the specific federal, state, local and foreign tax consequences of investing in a Fund. The summary is based on the laws in effect on the date of this SAI and existing judicial and administrative interpretations thereof, all of which are subject to change, possibly with retroactive effect.

Legislation commonly known as the Tax Cuts and Jobs Act (the "Tax Act") made significant changes to the U.S. federal income tax rules for taxation of individuals and corporations, generally effective for taxable years beginning after December 31, 2017. Many of the changes applicable to individuals are temporary and only apply to taxable years beginning after December 31, 2017 and before January 1, 2026. The application of certain provisions of the Tax Act is uncertain, and the changes to the Code that the Tax Act enacted may have direct or indirect effects on a Fund, its investments, or its shareholders that cannot readily be predicted. In addition, legislative, regulatory, or administrative changes to, or in respect of the application of, the Tax Act could be enacted or promulgated at any time, either prospectively or with retroactive effect. You are urged to consult your own tax advisor regarding how the Tax Act affects your investment in the Fund.

Each Fund is treated as a separate entity from other series of the Trust for federal income tax purposes. Each Fund has elected to be, and intends to qualify each year for treatment as, a "regulated investment company" under Subchapter M of the Code by complying with all applicable requirements of the Code, including, among other things, requirements as to the sources of the Fund's income, diversification of the Fund's assets and timing of Fund distributions. To so qualify, a Fund must, among other things: (a) derive at least 90% of its gross income in each taxable year from dividends, interest, payments with respect to certain securities loans, and gains from the sale or other disposition of stock or securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities or currencies, and net income derived from interests in "qualified publicly traded partnerships" (i.e., partnerships that are traded on an established securities

market or tradable on a secondary market, other than partnerships that derive 90% of their income from interest, dividends, capital gains, and other traditionally permitted mutual fund income) (collectively, “qualifying income”); (b) diversify its holdings so that, at the end of each quarter of the Fund’s taxable year, (i) at least 50% of the market value of the Fund’s assets is represented by cash, securities of other regulated investment companies, U.S. government securities and other securities, with such other securities limited, in respect of any one issuer, to an amount not greater than 5% of the Fund’s assets and not greater than 10% of the outstanding voting securities of such issuer and (ii) not more than 25% of the value of its assets is invested, including through corporations in which the Fund owns a 20% or more voting stock interest, in the securities (other than U.S. government securities or securities of other regulated investment companies) of any one issuer, in the securities (other than the securities of other regulated investment companies) of any two or more issuers that the Fund controls and that are determined to be engaged in the same or similar trades or businesses or related trades or businesses, or in the securities of one or more “qualified publicly traded partnerships”; and (c) distribute an amount equal to the sum of at least 90% of its investment company taxable income (computed without regard to the dividends-paid deduction) and 90% of its net tax-exempt income, if any, for the tax year (including, for purposes of satisfying this distribution requirement, certain distributions made by the Fund after the close of its taxable year that are treated as made during such taxable year).

As a regulated investment company, a Fund will not be subject to U.S. federal income tax on the portion of its taxable investment income and capital gains that it distributes to its shareholders provided that it satisfies a minimum distribution requirement. In order to also avoid liability for a non-deductible federal excise tax, a Fund must distribute (or be deemed to have distributed) by December 31 of each calendar year at least the sum of (i) 98% of its ordinary income for such year, (ii) 98.2% of the excess of its realized capital gains over its realized capital losses for the 12-month period generally ending on October 31 during such year and (iii) any amounts from the prior calendar year that were not distributed and on which the Fund paid no federal income tax. A Fund will be subject to income tax at the regular corporate tax rate on any taxable income or gains that it does not distribute to its shareholders. Each Fund’s policy is to distribute to its shareholders all investment company taxable income (determined without regard to the deduction for dividends paid) and any net capital gain (the excess of net long-term capital gain over net short-term capital loss) for each fiscal year in a manner that complies with the distribution requirements of the Code, so that the Fund will not be subject to any federal income or excise taxes.

If, for any taxable year, a Fund were to fail to qualify as a regulated investment company or were to fail to meet certain minimum distribution requirements under the Code, it would be taxed in the same manner as an ordinary corporation and distributions to its shareholders would not be deductible by the Fund in computing its taxable income. In addition, in the event of a failure to qualify, a Fund’s distributions, to the extent derived from the Fund’s current or accumulated earnings and profits, including any distributions of net capital gain, would be taxable to shareholders as ordinary dividend income for federal income tax purposes. However, such dividends would be eligible, subject to any generally applicable limitations, (i) to be treated as qualified dividend income in the case of shareholders taxed as individuals and (ii) for the dividends received deduction in the case of corporate shareholders. Moreover, if a Fund were to fail to qualify as a regulated investment company in any year, it would be required to pay out its earnings and profits accumulated in that year in order to qualify again as a regulated investment company. Under certain circumstances, a Fund may be able to cure a failure to qualify as a regulated investment company, but in order to do so the Fund might incur significant Fund-level taxes and might be forced to dispose of certain assets. If a Fund failed to qualify as a regulated investment company for a period greater than two taxable years, the Fund would generally be required to recognize any net built-in gains with respect to certain of its assets upon a disposition of such assets within five years of qualifying as a regulated investment company in a subsequent year.

Shareholders generally will be subject to federal income taxes on distributions made by a Fund whether paid in cash or additional shares. Distributions of net investment income (including interest, dividend income and net short-term capital gain in excess of any net long-term capital loss, less certain expenses), other than qualified dividend income, will be taxable to shareholders as ordinary income. Distributions of qualified dividend income, generally will be taxed to non-corporate shareholders at the federal income tax rates applicable to net capital gain, provided the Fund reports the amount distributed as qualified dividend income.

In general, dividends may be reported by a Fund as qualified dividend income if they are attributable to qualified dividend income received by the Fund. Qualified dividend income generally means dividend income received from a Fund’s investments in common and preferred stock of U.S. companies and stock of certain qualified foreign

corporations, provided that certain holding period and other requirements are met by both the Fund and its shareholders. If 95% or more of a Fund's gross income (calculated without taking into account net capital gain derived from sales or other dispositions of stock or securities) consists of qualified dividend income, the Fund may report all distributions of such income as qualified dividend income.

A foreign corporation is treated as a qualified foreign corporation for this purpose if it is incorporated in a possession of the United States or it is eligible for the benefits of certain income tax treaties with the United States and meets certain additional requirements. Certain foreign corporations that are not otherwise qualified foreign corporations will be treated as qualified foreign corporations with respect to dividends paid by them if the stock with respect to which the dividends are paid is readily tradable on an established securities market in the United States. Passive foreign investment companies are not qualified foreign corporations for this purpose. Dividends received by a Fund from REITs generally do not qualify for treatment as qualified dividend income.

Dividends paid by a Fund may qualify in part for the dividends-received deduction available to corporate shareholders, provided the Fund reports the amount distributed as a qualifying dividend and certain holding period and other requirements under the Code are satisfied. The reported amount, however, cannot exceed the aggregate amount of qualifying dividends received by the Fund for its taxable year. Eligibility for qualified dividend income treatment and the dividends-received deduction may be reduced or eliminated if, among other things, (i) the shareholder is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property or (ii) certain holding period requirements are not satisfied at both the Fund and shareholder levels. In addition, qualified dividend income treatment is not available if a shareholder elects to have the dividend income treated as investment income for purposes of the limitation on deductibility of investment interest.

If a Fund receives a dividend (other than a capital gain dividend) in respect of any share of REIT stock with a tax holding period of at least 46 days during the 91-day period beginning on the date that is 45 days before the date on which the stock becomes ex-dividend as to that dividend, then Fund dividends attributable to that REIT dividend income (as reduced by certain fund expenses) may be reported by the Fund as eligible for the 20% deduction for "qualified REIT dividends" generally available to noncorporate shareholders under the Code. In order to qualify for this deduction, noncorporate shareholders must meet minimum holding period requirements with respect to their Fund shares.

Distributions of net capital gain, if any, that a Fund reports as capital gain dividends will be taxable to non-corporate shareholders as long-term capital gain without regard to how long a shareholder has held shares of the Fund. A Fund may retain certain amounts of capital gains and designate them as undistributed net capital gain in a notice to its shareholders, who (i) will be required to include in income for U.S. federal income tax purposes, as long-term capital gain, their proportionate shares of the undistributed amounts so designated, (ii) will be entitled to credit their proportionate shares of the income tax paid by the Fund on those undistributed amounts against their federal income tax liabilities and to claim refunds to the extent such credits exceed their liabilities and (iii) will be entitled to increase their federal income tax basis in their shares by an amount equal to the excess of the amounts of undistributed net capital gain included in their respective income over their respective income tax credits.

Distributions in excess of earnings and profits will, as to each shareholder, be treated as a tax-free return of capital to the extent of the shareholder's basis in his or her Fund shares. A distribution treated as a return of capital will reduce the shareholder's basis in his or her shares, which will result in an increase in the amount of gain (or a decrease in the amount of loss) that will be recognized by the shareholder for tax purposes on a later sale of such shares. After the shareholder's basis is reduced to zero, any distributions in excess of earnings and profits will be treated as a capital gain, assuming the shareholder holds his or her shares as capital assets.

A 3.8% Medicare contribution tax generally applies to all or a portion of the net investment income of a shareholder who is an individual and not a nonresident alien for federal income tax purposes and who has adjusted gross income (subject to certain adjustments) that exceeds a threshold amount (\$250,000 if married filing jointly or if considered a "surviving spouse" for federal income tax purposes, \$125,000 if married filing separately, and \$200,000 in other cases). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts. For these purposes, interest, dividends and certain capital gains (among other categories of income) are generally taken into account in computing a shareholder's net investment income.

Certain tax-exempt educational institutions are subject to a 1.4% tax on net investment income. For these purposes, certain dividends and capital gain distributions, and certain gains from the disposition of Fund shares (among other categories of income), are generally taken into account in computing a shareholder's net investment income.

Distributions are generally taxable when received. However, distributions declared in October, November or December to shareholders of record on a date in such a month and paid the following January are taxable for federal income tax purposes as if received on December 31 of the calendar year in which declared. Distributions are includable in alternative minimum taxable income in computing a shareholder's liability for the federal alternative minimum tax, which is imposed on individual taxpayers under the Code. In addition, certain distributions made after the close of a taxable year of a Fund may be "spilled back" and treated for certain purposes as paid by the Fund during such taxable year. In such case, shareholders generally will be treated as having received such dividends in the taxable year in which the distributions were actually made. For purposes of calculating the amount of a regulated investment company's undistributed income and gain subject to the 4% excise tax described above, such "spilled back" dividends are treated as paid by the regulated investment company when they are actually paid.

A redemption of Fund shares may result in recognition of a taxable gain or loss. The gain or loss will generally be treated as a long-term capital gain or loss if the shares are held for more than one year, and as a short-term capital gain or loss if the shares are held for one year or less. Any loss realized upon a redemption or exchange of shares held for six months or less will be treated as a long-term capital loss to the extent of any amounts treated as distributions of long-term capital gains during such six-month period. Any loss realized upon a redemption may be disallowed under certain wash sale rules to the extent shares of the same Fund or substantially identical stock or securities are purchased (through reinvestment of distributions or otherwise) within 30 days before or after the redemption.

If a shareholder recognizes a loss with respect to a Fund's shares of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder (or certain greater amounts over a combination of years), the shareholder must file with the Internal Revenue Service (the "IRS") a disclosure statement on IRS Form 8886. Direct shareholders of portfolio securities are in many cases exempted from this reporting requirement, but under current guidance, shareholders of a regulated investment company are not exempted. The fact that a loss is so reportable does not affect the legal determination of whether the taxpayer's treatment of the loss is proper.

A Fund's transactions in options and other similar transactions, such as futures, may be subject to special provisions of the Code that, among other things, affect the character of any income realized by the Fund from such investments, accelerate recognition of income to the Fund, defer Fund losses, affect the holding period of the Fund's securities, affect whether distributions will be eligible for the dividends-received deduction or be treated as qualified dividend income and affect the determination of whether capital gain and loss is characterized as long-term or short-term capital gain or loss. These rules could therefore affect the character, amount and timing of distributions to shareholders. These provisions may also require a Fund to "mark-to-market" certain types of the positions in its portfolio (i.e., treat them as if they were closed out), which may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the distribution requirements for avoiding U.S. federal income and excise taxes. The Funds will monitor these transactions and will make the appropriate entries in its books and records, and if a Fund deems it advisable, will make appropriate elections if available in order to mitigate the effect of these rules, prevent disqualification of the Fund as a regulated investment company and minimize the imposition of U.S. federal income and excise taxes.

The Funds' transactions in broad based equity index futures contracts, exchange-traded options on such indices and certain other futures contracts are generally considered "Section 1256 contracts" for federal income tax purposes. Any unrealized gains or losses on such Section 1256 contracts are treated as though they were realized at the end of each taxable year. The resulting gain or loss is treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss. Gain or loss recognized on actual sales of Section 1256 contracts is treated in the same manner. As noted above, distributions of net short-term capital gain are taxable to shareholders as ordinary income while distributions of net long-term capital gain are taxable to shareholders as long-term capital gain, regardless of how long the shareholder has held shares of the Fund.

A Fund's entry into a short sale transaction, an option or certain other contracts, such as futures, could be treated as the constructive sale of an appreciated financial position, causing the Fund to realize gain, but not loss, on the position.

If a Fund invests in certain pay-in-kind securities, zero coupon securities, deferred interest securities or, in general, any other securities with original issue discount (or with market discount if the Fund elects to include market discount in income currently), the Fund must accrue income on such investments for each taxable year, which generally will be prior to the receipt of the corresponding cash payments. However, the Fund must distribute, at least annually, all or substantially all of its investment company taxable income (determined without regard to the deduction for dividends paid), including such accrued income to shareholders to avoid federal income and excise taxes. Therefore, the Fund may have to sell portfolio securities (potentially under disadvantageous circumstances) to generate cash, or may have to undertake leverage by borrowing cash, to satisfy these distribution requirements. Dispositions of portfolio securities may result in additional gains and additional distribution requirements.

If a Fund invests in a market discount bond, it will be required to treat any gain recognized on the disposition of such market discount bond as ordinary income (instead of capital gain) to the extent of the accrued market discount, unless the Fund elects to include the market discount in income as it accrues as discussed above. A market discount bond is a security acquired in the secondary market at a price below its redemption value (or its adjusted issue price if it is also an original issue discount bond).

The Funds may be subject to withholding and other taxes imposed by foreign countries, including taxes on interest, dividends and capital gains with respect to its investments in those countries, which would, if imposed, reduce the yield on or return from those investments. Tax treaties between certain countries and the United States may reduce or eliminate such taxes in some cases. So long as the Fund qualifies for treatment as a regulated investment company and incurs "qualified foreign taxes," if more than 50% of its net assets at the close of its taxable year consist of stock or securities of foreign corporations, which for this purpose may include obligations of foreign governmental issuers, the Fund may elect to "pass through" to its shareholders the amount of such foreign taxes paid. If this election is made, information with respect to the amount of the foreign income taxes that are allocated to the Fund's shareholders will be provided to them and any shareholder subject to tax on dividends will be required (i) to include in ordinary gross income (in addition to the amount of the taxable dividends actually received) his/her proportionate share of the foreign taxes paid that are attributable to such dividends; and (ii) either to deduct his/her proportionate share of such foreign taxes in computing his/her taxable income or to claim that amount as a foreign tax credit (subject to applicable limitations) against U.S. income taxes.

Shareholders who do not itemize deductions for U.S. federal income tax purposes will not be able to deduct their pro rata portion of qualified foreign taxes paid by the Fund, although such shareholders will be required to include their shares of such taxes in gross income if the Fund makes the election described above. Qualified foreign taxes generally include taxes that would be treated as income taxes under U.S. tax regulations but do not include most other taxes, such as stamp taxes, securities transaction taxes, and similar taxes. No deduction for such taxes will be permitted to individuals in computing their alternative minimum tax liability.

If a Fund makes the election to pass through qualified foreign taxes and a shareholder chooses to take a credit for the foreign taxes deemed paid by such shareholder, the amount of the credit that may be claimed in any year may not exceed the same proportion of the U.S. tax against which such credit is taken that the shareholder's taxable income from foreign sources (but not in excess of the shareholder's entire taxable income) bears to his entire taxable income. For this purpose, long-term and short-term capital gains the Fund realizes and distributes to shareholders will generally not be treated as income from foreign sources in their hands, nor will distributions of certain foreign currency gains subject to Section 988 of the Code or of any other income realized by the Fund that is deemed, under the Code, to be U.S.-source income in the hands of the Fund. This foreign tax credit limitation may also be applied separately to certain specific categories of foreign-source income and the related foreign taxes. As a result of these rules, which may have different effects depending upon each shareholder's particular tax situation, certain shareholders may not be able to claim a credit for the full amount of their proportionate share of the foreign taxes paid by the Fund. Shareholders who are not liable for U.S. federal income taxes, including tax-exempt shareholders, will ordinarily not benefit from this election. If the Fund does make the election, it will provide required tax information to shareholders. The Fund generally may deduct any foreign taxes that are not passed through to its shareholders in computing its income available for distribution to shareholders to satisfy applicable tax distribution requirements. Under certain circumstances, if the Fund receives a

refund of foreign taxes paid in respect of a prior year, the value of the Fund's shares could be affected, or any foreign tax credits or deductions passed through to shareholders in respect of the Fund's foreign taxes for the current year could be reduced.

Foreign exchange gains or losses realized by a Fund in connection with certain transactions involving foreign currency-denominated debt securities, certain options and futures contracts relating to foreign currency, foreign currency forward contracts, foreign currencies, or payables or receivables denominated in a foreign currency are subject to Section 988 of the Code, which generally causes such gains or losses to be treated as ordinary gain or loss and may affect the amount, timing and character of distributions to shareholders.

A Fund may purchase the securities of certain foreign companies treated as passive foreign investment companies for federal income tax purposes ("PFIC"). PFICs may be the only or primary means by which the Fund may invest in some countries. If a Fund invests in equity securities of PFICs, it may be subject to U.S. federal income tax on a portion of any "excess distribution" or gain from the disposition of such securities even if such income is distributed as a taxable dividend to shareholders. Additional charges in the nature of interest may be imposed on the Fund with respect to deferred taxes arising from such distributions or gains. Capital gains on the sale of such holdings will be deemed to be ordinary income regardless of how long such PFICs are held. A "qualified electing fund" election or a "mark to market" election may generally be available that would ameliorate these adverse tax consequences, but such elections could require a Fund to recognize taxable income or gain (subject to the distribution requirements applicable to regulated investment companies, as described above) without the concurrent receipt of cash. In order to satisfy the distribution requirements and avoid a tax on a Fund, the Fund may be required to liquidate portfolio securities that it might otherwise have continued to hold, potentially resulting in additional taxable gain or loss to the Fund. In order for a Fund to make a qualified electing fund election with respect to a PFIC, the PFIC would have to agree to provide certain tax information to the Fund on an annual basis, which it might not agree to do. A Fund may limit and/or manage its holdings in PFICs to limit its tax liability or maximize its return from these investments. The Fund may limit and/or manage its holdings in PFICs to limit its tax liability or maximize its return from these investments.

If a sufficient percentage of the interests in a foreign issuer are held by the Fund, independently or together with certain other U.S. persons, that issuer may be treated as a "controlled foreign corporation" (a "CFC") with respect to the Fund, in which case the Fund will be required to take into account each year, as ordinary income, its share of certain portions of that issuer's income, whether or not such amounts are distributed. The Fund may have to dispose of its portfolio securities (potentially resulting in the recognition of taxable gain or loss, and potentially under disadvantageous circumstances) to generate cash, or may have to borrow the cash, to meet its distribution requirements and avoid Fund-level taxes. In addition, some Fund gains on the disposition of interests in such an issuer may be treated as ordinary income. The Fund may limit and/or manage its holdings in issuers that could be treated as CFCs in order to limit its tax liability or maximize its after-tax return from these investments.

The law with respect to the taxation of non-U.S. entities treated as corporations for U.S. federal income tax purposes and the individuals and entities treated as their shareholders changed under legislation enacted in late 2017. If the Fund owned 10% or more the voting power of a foreign entity treated as a corporation for U.S. federal income tax purposes for the last tax year of the foreign entity beginning before January 1, 2018, the Fund may be required to include in its income its share of certain deferred foreign income of that foreign entity. Under those circumstances, the Fund may be able to make an election for such amounts to be included in income over eight years. Any income included under this rule may have to be distributed to satisfy the distribution requirements referred to above even though the Fund may receive no corresponding cash amounts, and even though shareholders derived no economic benefit from the foreign entity's deferred income.

Non-U.S. persons are subject to U.S. tax on disposition of a "United States real property interest" (a "USRPI"). Gain on such a disposition is sometimes referred to as "FIRPTA gain." The Code provides a look-through rule for distributions of "FIRPTA gain" if certain requirements are met. If the look-through rule applies, certain distributions attributable to income received by a Fund, e.g., from REITs, may be treated as gain from the disposition of a USRPI, causing distributions to be subject to U.S. withholding tax at rates of up to 21%, and require non-U.S. shareholders to file nonresident U.S. income tax returns.

The Funds are required to withhold (as “backup withholding”) a portion of reportable payments, including dividends, capital gain distributions and the proceeds of redemptions and exchanges or repurchases of Fund shares, paid to shareholders who have not complied with certain IRS regulations. The backup withholding rate is currently 24%. In order to avoid this withholding requirement, shareholders, other than certain exempt entities, must certify on IRS Forms W-9 or on certain other documents, that the Social Security Numbers or other Taxpayer Identification Numbers they provide are their correct numbers and that they are not currently subject to backup withholding, or that they are exempt from backup withholding. The Fund may nevertheless be required to backup withhold if it receives notice from the IRS or a broker that a number provided is incorrect or that backup withholding is applicable as a result of previous underreporting of interest or dividend income.

Ordinary dividends and certain other payments made by a Fund to non-U.S. shareholders are generally subject to withholding tax at a 30% rate (or a lower rate as may be determined in accordance with any applicable treaty). In order to obtain a reduced rate of withholding, a non-U.S. shareholder will be required to provide an IRS Form W-8BEN or similar form certifying its entitlement to benefits under a treaty. The withholding tax does not apply to regular dividends paid to a non-U.S. shareholder who provides an IRS Form W-8ECI, certifying that the dividends are effectively connected with the non-U.S. shareholder’s conduct of a trade or business within the United States. Instead, the effectively connected dividends will be subject to regular U.S. income tax as if the non-U.S. shareholder were a U.S. shareholder. A non-U.S. corporation receiving effectively connected dividends may also be subject to additional “branch profits tax” imposed at a rate of 30% (or a lower treaty rate).

The 30% withholding tax described in the preceding paragraph generally will not apply to distributions of net capital gain, to redemption proceeds, or to dividends that a Fund reports as (a) interest-related dividends, to the extent such dividends are derived from the Fund’s “qualified net interest income,” or (b) short-term capital gain dividends, to the extent such dividends are derived from the Fund’s “qualified short-term gain.” “Qualified net interest income” is the Fund’s net income derived from U.S.-source interest and original issue discount, subject to certain exceptions and limitations. “Qualified short-term gain” generally means the excess of the net short-term capital gain of the Fund for the taxable year over its net long-term capital loss, if any. In order to qualify for an exemption from withholding, a non-U.S. shareholder will need to comply with applicable certification requirements relating to its non-U.S. status (including, in general, furnishing an IRS Form W-8BEN or other applicable form). Backup withholding will not be applied to payments that are subject to this 30% withholding tax.

Unless certain non-U.S. entities that hold Fund shares comply with IRS requirements that will generally require them to report information regarding U.S. persons investing in, or holding accounts with, such entities, a 30% withholding tax may apply to the Fund’s dividends payable to such entities. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the United States and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of such agreement.

This discussion and the related discussion in the Prospectus have been prepared by management of the Funds, and counsel to the Trust has expressed no opinion in respect thereof.

Shareholders and prospective shareholders of the Fund should consult their own tax advisors concerning the effect of owning shares of a Fund in light of their particular tax situations.

DIVIDENDS AND DISTRIBUTIONS

Each Fund will receive income in the form of dividends and interest earned on its investments in securities. This income, less the expenses incurred in its operations, is the Fund’s net investment income, substantially all of which will be declared as dividends to the Fund’s shareholders.

The amount of income dividend payments by a Fund is dependent upon the amount of net investment income received by the Fund from its portfolio holdings, is not guaranteed and is subject to the discretion of the Board. The Funds do not pay “interest” or guarantee any fixed rate of return on an investment in its shares.

The Funds also may derive capital gains or losses in connection with sales or other dispositions of its portfolio securities. Any net gain a Fund may realize from transactions involving investments held for less than the period required for long-term capital gain or loss recognition or otherwise producing short-term capital gains and losses (taking into account any available carryover of capital losses), although a distribution from capital gains, will be distributed to shareholders with and as a part of the income dividends paid by the Fund and will be taxable to shareholders as ordinary income for federal income tax purposes. If during any year a Fund realizes a net gain on transactions involving investments held for more than the period required for long-term capital gain or loss recognition or otherwise producing long-term capital gains and losses, the Fund will have a net long-term capital gain. After deduction of the amount of any net short-term capital loss, the balance (to the extent not offset by any capital losses available to be carried over) generally will be distributed and treated as long-term capital gains in the hands of the shareholders regardless of the length of time the Fund's shares may have been held by the shareholders. For more information concerning applicable capital gains tax rates, see your tax advisor.

Any dividend or distribution paid by a Fund reduces the Fund's NAV on the date paid by the amount of the dividend or distribution per share. Accordingly, a dividend or distribution paid shortly after a purchase of shares by a shareholder will generally be taxable, even if it effectively represents a partial return of the shareholder's capital.

Dividends and other distributions will be made in the form of additional shares of a Fund unless the shareholder has otherwise indicated. Investors have the right to change their elections with respect to the reinvestment of dividends and distributions by notifying the Transfer Agent in writing, but any such change will be effective only as to dividends and other distributions for which the record date is seven or more business days after the Transfer Agent has received the written request.

A Fund's investments in partnerships, if any, including in qualified publicly traded partnerships, may result in that Fund being subject to state, local or foreign income, franchise or withholding tax liabilities.

GENERAL INFORMATION

Investment Managers Series Trust II is an open-end management investment company organized as a Delaware statutory trust under the laws of the State of Delaware on August 20, 2013. The Trust has a number of outstanding series of shares of beneficial interest, each of which represents interests in a separate portfolio of securities.

The Trust's Declaration of Trust permits the Trustees to create additional series of shares, to issue an unlimited number of full and fractional shares of beneficial interest of each series, including the Fund, and to divide or combine the shares of any series into a greater or lesser number of shares without thereby changing the proportionate beneficial interest in the series. The assets belonging to a series are charged with the liabilities in respect of that series and all expenses, costs, charges and reserves attributable to that series only. Therefore, any creditor of any series may look only to the assets belonging to that series to satisfy the creditor's debt. Any general liabilities, expenses, costs, charges or reserves of the Trust which are not readily identifiable as pertaining to any particular series are allocated and charged by the Trustees to and among the existing series in the sole discretion of the Trustees. Each share of the Fund represents an interest in the Fund proportionately equal to the interest of each other share. Upon the Fund's liquidation, all shareholders would share pro rata in the net assets of the Fund available for distribution to shareholders.

The Trust may offer more than one class of shares of any series. Each share of a series or class represents an equal proportionate interest in that series or class with each other share of that series or class.

The shares of each series or class participate equally in the earnings, dividends and assets of the particular series or class. Expenses of the Trust which are not attributable to a specific series or class are allocated among all the series in a manner believed by management of the Trust to be fair and equitable. Shares issued do not have pre-emptive or conversion rights. Shares when issued are fully paid and non-assessable, except as set forth below. Shareholders are entitled to one vote for each share held. Shares of each series or class generally vote together, except when required under federal securities laws to vote separately on matters that only affect a particular series or class, such as the approval of distribution plans for a particular class.

The Trust is not required to hold annual meetings of shareholders but will hold special meetings of shareholders of a series or class when, in the judgment of the Board, it is necessary or desirable to submit matters for a shareholder vote. Shareholders have, under certain circumstances, the right to communicate with other shareholders in connection with requesting a meeting of shareholders for the purpose of removing one or more trustees. Shareholders also have, in certain circumstances, the right to remove one or more trustees without a meeting. No material amendment may be made to the Trust's Declaration of Trust without the affirmative vote of the holders of a majority of the outstanding shares of each portfolio affected by the amendment.

The Trust's Declaration of Trust provides that, at any meeting of shareholders of the Trust or of any series or class, a shareholder servicing agent may vote any shares as to which such shareholder servicing agent is the agent of record for shareholders who are not represented in person or by proxy at the meeting, proportionately in accordance with the votes cast by holders of all shares of that portfolio otherwise represented at the meeting in person or by proxy as to which such shareholder servicing agent is the agent of record. Any shares so voted by a shareholder servicing agent will be deemed represented at the meeting for purposes of quorum requirements. Any series or class may be terminated (i) upon the merger or consolidation with, or the sale or disposition of all or substantially all of its assets to, another entity, if approved by the vote of the holders of two-thirds of its outstanding shares, except that if the Board recommends such merger, consolidation or sale or disposition of assets, the approval by vote of the holders of a majority of the series' or class' outstanding shares will be sufficient, or (ii) by the vote of the holders of a majority of its outstanding shares, or (iii) by the Board by written notice to the series' or class' shareholders. Unless each series and class is so terminated, the Trust will continue indefinitely.

Shareholders may send communications to the Board. Shareholders should send communications intended for the Board by addressing the communications to the Board, in care of the Secretary of the Trust and sending the communication to 2220 E. Route 66, Suite 226, Glendora, California 91740. A shareholder communication must (i) be in writing and be signed by the shareholder, (ii) provide contact information for the shareholder, (iii) identify the Fund to which it relates, and (iv) identify the class and number of shares held by the shareholder. The Secretary of the Trust may, in good faith, determine that a shareholder communication should not be provided to the Board because it does not reasonably relate to the Trust or its operations, management, activities, policies, service providers, Board, officers, shareholders or other matters relating to an investment in the Fund or is otherwise immaterial in nature. Other shareholder communications received by the Funds not directly addressed and sent to the Board will be reviewed and generally responded to by management, and will be forwarded to the Board only at management's discretion based on the matters contained therein.

The Declaration of Trust provides that no Trustee or officer of the Trust shall be subject to any personal liability in connection with the assets or affairs of the Trust or any of its series except for losses in connection with his or her willful misfeasance, bad faith, gross negligence or reckless disregard of his or her duties. The Trust has also entered into an indemnification agreement with each Trustee which provides that the Trust shall advance expenses and indemnify and hold harmless the Trustee in certain circumstances against any expenses incurred by the Trustee in any proceeding arising out of or in connection with the Trustee's service to the Trust, to the maximum extent permitted by the Delaware Statutory Trust Act, the 1933 Act and the 1940 Act, and which provides for certain procedures in connection with such advancement of expenses and indemnification.

The Trust's Declaration of Trust also provides that the Trust shall maintain appropriate insurance (for example, fidelity bonding and errors and omissions insurance) for the protection of the Trust, its shareholders, trustees, officers, employees and agents covering possible tort and other liabilities.

The Declaration of Trust does not require the issuance of stock certificates. If stock certificates are issued, they must be returned by the registered owners prior to the transfer or redemption of shares represented by such certificates.

Rule 18f-2 under the 1940 Act provides that as to any investment company which has two or more series outstanding and as to any matter required to be submitted to shareholder vote, such matter is not deemed to have been effectively acted upon unless approved by the holders of a "majority" (as defined in the rule) of the voting securities of each series affected by the matter. Such separate voting requirements do not apply to the election of Trustees or the ratification of the selection of accountants. The Rule contains special provisions for cases in which an advisory contract is approved

by one or more, but not all, series. A change in investment policy may go into effect as to one or more series whose holders so approve the change even though the required vote is not obtained as to the holders of other affected series.

The Trust, and the Advisor have adopted Codes of Ethics under Rule 17j-1 of the 1940 Act. These codes of ethics permit, subject to certain conditions, personnel of each of those entities to invest in securities that may be purchased or held by each Fund.

FINANCIAL STATEMENTS

The Trust's independent registered public accounting firm, RSM, audits and reports on the Funds' annual financial statements. The financial statements include the "Portfolio of Investments", "Statement of Assets and Liabilities", "Statement of Operations", "Statements of Changes in Net Assets", "Financial Highlights" and "Notes to Financial Statements". Each Fund has adopted the financial statements of the Predecessor Fund. Those financial statements were audited by, the Predecessor Funds' Registered Accounting Firm.

Moody's

Aaa Obligations rated Aaa are judged to be of the highest quality, with minimal credit risk.

Aa Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A Obligations rated A are considered upper-medium grade and are subject to low credit risk.

Baa Obligations rated Baa are subject to moderate credit risk. They are considered medium-grade and as such may possess certain speculative characteristics.

Ba Obligations rated Ba are judged to have speculative elements and are subject to substantial credit risk.

B Obligations rated B are considered speculative and are subject to high credit risk.

Caa Obligations rated Caa are judged to be of poor standing and are subject to very high credit risk.

Ca Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery.

C Obligations rated C are the lowest rated class of bonds and are typically in default, with little prospect for recovery of principal or interest.

Note Moody's applies numerical modifiers 1, 2, and 3 in each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

S&P

AAA An obligation rated AAA has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA An obligation rated AA differs from the highest-rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A An obligation rated A is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB An obligation rated BBB exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

Note Obligations rated BB, B, CCC, CC, and C are regarded as having significant speculative characteristics. BB indicates the least degree of speculation and C the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB An obligation rated BB is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial or economic conditions, which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B An obligation rated B is more vulnerable to nonpayment than obligations rated BB, but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC An obligation rated CCC is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC An obligation rated CC is currently highly vulnerable to nonpayment.

C The C rating may be used to cover a situation where a bankruptcy petition has been filed or similar action has been taken, but payments on this obligation are being continued.

D An obligation rated D is in payment default. The D rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The D rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

Note Plus (+) or minus (-). The ratings from AA to CCC may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories. The "r" symbol is attached to the ratings of instruments with significant noncredit risks. It highlights risks to principal or volatility of expected returns, which are not addressed in the credit rating. Examples include: obligations linked or indexed to equities, currencies, or commodities; obligations exposed to severe prepayment risk-such as interest-only or principal-only mortgage securities; and obligations with unusually risky interest terms, such as inverse floaters.

Preferred Stock

Moody's

Aaa An issue that is rated "Aaa" is considered to be a top-quality preferred stock. This rating indicates good asset protection and the least risk of dividend impairment within the universe of preferred stocks.

Aa An issue that is rated "Aa" is considered a high-grade preferred stock. This rating indicates that there is a reasonable assurance the earnings and asset protection will remain relatively well maintained in the foreseeable future.

A An issue that is rated "A" is considered to be an upper-medium grade preferred stock. While risks are judged to be somewhat greater than in the "Aaa" and "Aa" classification, earnings and asset protection are, nevertheless, expected to be maintained at adequate levels.

Baa An issue that is rated "Baa" is considered to be a medium-grade preferred stock, neither highly protected nor poorly secured. Earnings and asset protection appear adequate at present but may be questionable over any great length of time.

Ba An issue that is rated "Ba" is considered to have speculative elements and its future cannot be considered well assured. Earnings and asset protection may be very moderate and not well safeguarded during adverse periods. Uncertainty of position characterizes preferred stocks in this class.

B An issue that is rated "B" generally lacks the characteristics of a desirable investment. Assurance of dividend payments and maintenance of other terms of the issue over any long period of time may be small.

Caa An issue that is rated "Caa" is likely to be in arrears on dividend payments. This rating designation does not purport to indicate the future status of payments.

Ca An issue that is rated "Ca" is speculative in a high degree and is likely to be in arrears on dividends with little likelihood of eventual payments.

C This is the lowest rated class of preferred or preference stock. Issues so rated can thus be regarded as having extremely poor prospects of ever attaining any real investment standing.

Note Moody's applies numerical modifiers 1, 2, and 3 in each rating classification: the modifier 1 indicates that the security ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking and the modifier 3 indicates that the issue ranks in the lower end of its generic rating category.

S&P

AAA This is the highest rating that may be assigned by Standard & Poor's to a preferred stock issue and indicates an extremely strong capacity to pay the preferred stock obligations.

AA A preferred stock issue rated AA also qualifies as a high-quality, fixed-income security. The capacity to pay preferred stock obligations is very strong, although not as overwhelming as for issues rated AAA.

A An issue rated A is backed by a sound capacity to pay the preferred stock obligations, although it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions.

BBB An issue rated BBB is regarded as backed by an adequate capacity to pay the preferred stock obligations. Whereas it normally exhibits adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to make payments for a preferred stock in this category than for issues in the A category.

BB, B, CCC Preferred stock rated BB, B, and CCC is regarded, on balance, as predominantly speculative with respect to the issuer's capacity to pay preferred stock obligations. BB indicates the lowest degree of speculation and CCC the highest. While such issues will likely have some quality and protective characteristics, these are outweighed by large uncertainties or major risk exposures to adverse conditions.

CC The rating CC is reserved for a preferred stock issue that is in arrears on dividends or sinking fund payments, but that is currently paying.

C A preferred stock rated C is a nonpaying issue.

D A preferred stock rated D is a nonpaying issue with the issuer in default on debt instruments.

N.R. This indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that Standard & Poor's does not rate a particular type of obligation as a matter of policy.

Note Plus (+) or minus (-). To provide more detailed indications of preferred stock quality, ratings from AA to CCC may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

Short Term Ratings

Moody's

Moody's employs the following three designations, all judged to be investment grade, to indicate the relative repayment ability of rated issuers:

Prime-1 Issuers rated Prime-1 (or supporting institutions) have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will often be evidenced by many of the following characteristics:

- Leading market positions in well-established industries.
- High rates of return on funds employed.

- Conservative capitalization structure with moderate reliance on debt and ample asset protection.
- Broad margins in earnings coverage of fixed financial charges and high internal cash generation.
- Well-established access to a range of financial markets and assured sources of alternate liquidity.

Prime-2 Issuers rated Prime-2 (or supporting institutions) have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, may be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

Prime-3 Issuers rated Prime-3 (or supporting institutions) have an acceptable ability for repayment of senior short-term obligations. The effect of industry characteristics and market compositions may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and may require relatively high financial leverage. Adequate alternate liquidity is maintained.

Not Prime Issuers rated Not Prime do not fall within any of the Prime rating categories.

S&P

A-1 A short-term obligation rated A-1 is rated in the highest category by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

A-2 A short-term obligation rated A-2 is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

A-3 A short-term obligation rated A-3 exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B A short-term obligation rated B is regarded as having significant speculative characteristics. The obligor currently has the capacity to meet its financial commitment on the obligation; however, it faces major ongoing uncertainties, which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

C A short-term obligation rated C is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

D A short-term obligation rated D is in payment default. The D rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The D rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

APPENDIX B PROXY VOTING POLICIES AND PROCEDURES

INVESTMENT MANAGERS SERIES TRUST II PROXY VOTING POLICIES AND PROCEDURES

Investment Managers Series Trust II (the “Trust”) is registered as an open-end investment company under the Investment Company Act of 1940, as amended (“1940 Act”). The Trust offers multiple series (each, a “Fund” and, collectively, the “Funds”). Consistent with its fiduciary duties and pursuant to Rule 30b1-4 under the 1940 Act (the “Proxy Rule”), the Board of Trustees of the Trust (the “Board”) has adopted this proxy voting policy on behalf of the Trust (the “Policy”) to reflect its commitment to ensure that proxies are voted in a manner consistent with the best interests of the Funds’ shareholders.

Delegation of Proxy Voting Authority to Fund Advisors

The Board believes that the investment advisor of each Fund (each, an “Advisor” and, collectively, the “Advisors”), as the entity that selects the individual securities that comprise its Fund’s portfolio, is the most knowledgeable and best-suited to make decisions on how to vote proxies of portfolio companies held by that Fund. The Trust will therefore defer to, and rely on, the Advisor of each Fund to make decisions on how to cast proxy votes on behalf of such Fund. An Advisor may delegate this responsibility to a Fund’s sub-advisor.

The Trust hereby designates the Advisor of each Fund as the entity responsible for exercising proxy voting authority with regard to securities held in the Fund’s investment portfolio. Consistent with its duties under this Policy, each Advisor shall monitor and review corporate transactions of corporations in which the Fund has invested, obtain all information sufficient to allow an informed vote on all proxy solicitations, ensure that all proxy votes are cast in a timely fashion, and maintain all records required to be maintained by the Fund under the Proxy Rule and the 1940 Act. Each Advisor will perform these duties in accordance with the Advisor’s proxy voting policy, a copy of which will be presented to the Board for its review. Each Advisor will promptly provide to the Trust’s Chief Compliance Officer (“CCO”) updates to its proxy voting policy as they are adopted and implemented, and the Trust’s CCO will then report such updates to the Board.

Availability of Proxy Voting Policy and Records Available to Fund Shareholders

If a Fund or an Advisor has a website, a copy of the Advisor’s proxy voting policy and this Policy may be posted on such website. A copy of such policies and of each Fund’s proxy voting record shall also be made available, without charge, upon request of any shareholder of the Fund, by calling the applicable Fund’s toll-free telephone number as printed in the Fund’s prospectus. The Trust’s transfer agent will notify the Advisor of any such request of proxy voting procedures. The Advisor shall reply to any Fund shareholder request within three (3) business days of receipt of the request, by first-class mail or other means designed to ensure equally prompt delivery.

Each Advisor will provide a complete annual voting record, as required by the Proxy Rule, for each series of the Trust for which it acts as advisor, to the Trust’s co-administrator no later than July 31st of each year. The Trust’s co-administrator, MFAC, will file a report based on such record on Form N-PX on an annual basis with the Securities and Exchange Commission no later than August 31st of each year.

Each Advisor is responsible for providing its current proxy voting policies and procedures and any subsequent amendments to the Trust’s CCO. SEC Form N-PX is filed with respect to each Fund by MFAC (acting as filing agent), by no later than August 31st of each year. Each such filing details all proxies voted on behalf of the Fund for the prior twelve months ended June 30th. In connection with each filing on behalf of the Fund, the Advisor’s CCO must sign and return to MFAC no later than July 30th a Form N-PX Certification stating that the advisor has adopted proxy voting policies and procedures in compliance with the SEC’s Proxy Voting Rule.

AXS INVESTMENTS LLC
PROXY VOTING POLICIES AND PROCEDURES

A. PURPOSE AND GENERAL STATEMENT

The purpose of these proxy voting policies and procedures (the “Policy”) is to set forth the principles and procedures by which AXS votes with respect to securities held in Fund portfolios for which AXS exercises voting authority (generally where AXS has not delegated proxy voting discretion to a Fund’s subadviser). For purposes of this Policy, a “Vote” includes any proxy and any shareholder vote or consent for any security held by a client account for which AXS exercises voting authority.

This Policy been designed to help ensure that Votes are voted in the best interests of the applicable Fund in accordance with AXS’s fiduciary duties and Rule 206(4)-6 under the Act.

B. POLICY

Votes must be cast in the best interests of each Fund. AXS’s guiding principle in this regard is that it is generally in the best interest of the client to cast Votes in a manner designed to maximize the economic value of the Fund’s holdings, taking into account the Fund’s investment goals and objectives (as set forth in its current registration statement) and all other relevant circumstances at the time of the vote. AXS does not permit voting decisions to be influenced in any manner that is contrary to this principle. AXS recognizes that, in rare instances, the interest of one Fund with respect to a Vote may conflict with the interests of AXS or another Fund. Any conflicts of interest relating to the casting of Votes, regardless of whether actual or perceived, will be addressed in accordance with this Policy.

It is AXS’s general policy to vote or give consent on all matters presented to shareholders in any Vote, and these policies and procedures have been designed with this in mind. However, AXS reserves the right to abstain from any particular Vote or otherwise withhold its Vote or consent on any matter if, in the judgement of AXS’s CCO or the relevant AXS investment professional, the costs associated with voting such Vote outweigh the benefits to the applicable Fund, or if the circumstances make such an abstention or withholding otherwise advisable and in the best interests of the Fund.

C. GUIDELINES

The voting guidelines below summarize AXS’s general positions on various common issues, and provides a general indication of how Fund portfolio securities for which AXS has voting discretion will be voted on proposals dealing with particular issues.

These voting guidelines are just that – guidelines. The guidelines are not exhaustive and do not address all potential voting issues. Because the circumstances of individual companies are so varied, there may be instances when AXS does not cast Fund Votes in strict adherence to these guidelines.

1. Management Proposals

The majority of matters presented to shareholders are proposals made by an issuer's management, which have usually been approved and recommended by the issuer's board of directors. For routine matters (which generally means that such matter will not measurably change the structure, management, control or operation of the company and are consistent with customary industry standards and practices), AXS will typically vote in accordance with the recommendation of the company's management; unless, in AXS's opinion, such recommendation is not in the best interests of the Fund.

Generally, in the absence of any unusual or non-routine circumstances, the AXS supports the following items:

- Ratification of appointment of independent auditors;
- General updating/corrective amendments to charter;
- Increase in common share authorization for a stock split or share dividend;
- Stock option plans that are incentive based and not excessive; and
- Regular, uncontested elections of directors and payment of fees (unless such fees exceed market standards).

Non-routine matters may involve a variety of issues. Therefore, AXS will typically cast Votes on non-routine matters on a case-by-case basis, in each case casting Votes in a manner that AXS believes is in the best interests of the applicable client based on the considerations described above. The following will typically be considered "non-routine" matters requiring case-by-case analysis:

- Directors' liability and indemnity proposals;
- Executive compensation plans;
- Contested elections of directors;
- Mergers, acquisitions, and other restructurings submitted to a shareholder vote;
- Anti-takeover and related provisions.

AXS will generally Vote against proposals to classify a board, absent special circumstances indicating that shareholder interests would be better served by this structure.

2. Shareholder Proposals

In general, AXS casts Votes in accordance with the recommendation of the company's board of directors on all shareholder proposals. However, AXS will support shareholder proposals that it believes are in the best interests of the Fund based on the considerations described above. In addition:

Generally, shareholder proposals related to the following items are supported:

- Confidential voting;
- Declassifying a board, absent special circumstances indicating that shareholder interests would be better served by a classified board structure;
- Requiring director nominees to receive support from holders of a majority of votes cast or a majority of shares outstanding in order to be (re)elected.
- Bylaw and charter amendments only with shareholder approval;
- Eliminating supermajority vote requirements in the company's bylaws and charter documents; and
- Requiring a majority of independent directors on a board.

Generally, shareholder proposals related to the following items are not supported:

- Limitations on the tenure of directors;
- Cumulative voting;
- Restrictions related to social, political, or special interest issues that impact the ability of the company to do business or be competitive and that have a significant financial or vested interest impact; and
- Reports that are costly to provide or expenditures that are of a non-business in nature or would provide no pertinent information from a shareholder perspective.

D. CONFLICTS OF INTEREST

Due to the nature of AXS's business and its ownership, AXS believes it is unlikely that conflicts of interest will arise when casting Votes. Each Fund's investment team, however, is responsible for monitoring Votes for any actual or perceived conflicts of interest. If at any time any Supervised Person becomes aware of any potential, actual, or perceived conflict of interest regarding any particular Vote(s) to be cast, he or she is required to contact AXS's CCO immediately, who will review the Vote(s) in advance to ensure that AXS proposed Vote(s) is consistent with this Policy and AXS's duties to the applicable Fund.

If a conflict of interest is evident, the CCO will:

- advise IMST II's Chief Compliance Officer (or other relevant IMST II officer) of the conflict in advance of casting the Vote;
- use his or her best judgement to address the conflict and ensure that it is resolved in accordance with his or her independent assessment of the best interests of the Fund.

Where the CCO deems appropriate in his or her sole discretion, unaffiliated third parties (such as proxy voting services) may be used to help resolve conflicts. In this regard, the CCO shall have the power to retain independent fiduciaries, consultants, or professionals to assist with Voting decisions and/or to delegate voting or consent powers to such fiduciaries, consultants, or professionals.

E. VOTING PROCEDURES

All AXS personnel are responsible for promptly forwarding all proxy materials, consents or voting requests or notices, or materials related thereto, to the CCO and to the applicable investment professional(s) primarily responsible for managing the applicable Fund's portfolio. The CCO shall be responsible for ensuring that each Vote is voted in a timely manner and as otherwise required by the terms of such Vote.

All Voting decisions initially are to be referred to the appropriate investment professional for determination. In most cases, the most senior Portfolio Manager of the applicable Fund, or his or her designee, will make the decision as to the appropriate vote for any particular Vote.

The Portfolio Manager will inform the CCO of any such Voting decision, and if the CCO does not object to such decision as a result of his or her conflict of interest review, the Vote will be voted in such manner. If the Portfolio Manager and the CCO are unable to arrive at an agreement as to how to vote, then the CCO may consult with independent third-parties (including a proxy voting service) as to the appropriate vote.

F. RECORDKEEPING

In accordance with Rule 204-2 under the Act, AXS must retain (i) its proxy voting policies and procedures; (ii) proxy statements received regarding Fund/client securities; (iii) records of its votes on behalf of the Funds; (iv) records of Fund requests for proxy voting information; and (v) any documents prepared by AXS that were material to making a decision how to vote, or that memorialized the basis for the decision. AXS may rely on proxy statements filed on the SEC's EDGAR system (instead of keeping its own copies), and may rely on proxy statements and records of its votes cast that are maintained by a proxy voting service provider.
