AXS Astoria Inflation Sensitive ETF (PPI) Named 2022 ETF Newcomer of the Year in Annual ETF and Mutual Fund Industry Awards

PPI ETF selected for its innovative strategy, highly successful launch, significant asset growth and strong performance amid record-breaking inflationary environment

NEW YORK, June 27, 2022 – AXS Investments, a leading asset manager providing access to alternative investments for growth, income and diversification, today announced that its AXS Astoria Inflation Sensitive ETF (PPI) has been named the 2022 Newcomer ETF of the Year in this year’s With Intelligence Annual ETF and Mutual Fund Industry Awards.

The award is bestowed annually on the most successful ETF launched in 2022 as determined by a combination of several factors, such as flows, performance, innovation, and achieving fund objectives.

“We’re thrilled that the PPI ETF has been named the recipient of this prestigious award. Investor response to PPI has been very strong, particularly in the current inflationary environment and given PPI’s consistency in performing as designed,” said Greg Bassuk, CEO of AXS Investments. “We’re proud to continue bringing this type of institutional access and innovation to individual investors.”

“Now more than ever investors need a multi-asset inflation solution. May’s CPI reading reached a new cycle high and inflation still has not peaked. I could not be more excited for PPI to receive this honor in recognition of the strategy’s consistency in delivering for investors,” added John Davi, the PPI ETF’s portfolio manager and CEO of Astoria Portfolio Advisors, the fund’s sub-advisor. “To this point, ETF investors have been largely forced to select among a menu of single-exposure inflation-sensitive strategies, but commodity-only, equity-only and TIPS-only strategies each have drawbacks and limitations, as each asset class performs differently depending on where we are in the inflation cycle. This expansive multi-asset class approach offers investors a compelling way to dynamically hedge inflation and potentially generate positive, real rate adjusted investment results – very much needed today and over the longer term as well.”

There are risks involved with investing including the possible loss of principal. Past performance does not guarantee future results.

Investors should carefully consider the investment objectives, risks, charges and expenses of any fund before investing. To obtain a prospectus containing this and other important information, please click here to view or download a prospectus online. Read the fund’s prospectus carefully before you invest.

There is no guarantee the sectors or asset classes the advisor identifies will benefit from inflation. Fund may invest a larger portion of its assets in one or more sectors than many other funds, and thus will be more susceptible to negative events affecting those sectors.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the ETF. Brokerage commissions will reduce returns. NAVs are calculated using prices as of 4:00 PM Eastern Time. The closing price is the midpoint between the bid and ask price as of the close of exchange. Closing price returns do not represent the returns you would receive if you traded shares at other times.
