AXS Astoria Inflation Sensitive ETF (PPI) Approaches Six-Month Anniversary as One of the Fastest Growing ETFs of 2022

AXS Investments’ first ETF has gathered over $70 million in assets under management providing highly differentiated, actively managed approach to finding opportunities in an inflationary environment

NEW YORK, June 30, 2022— AXS Investments, a leading asset manager providing access to alternative investments for growth and income, is today marking the approaching 6-month anniversary of the launch of its AXS Astoria Inflation Sensitive ETF (PPI), one of the fastest growing ETFs this year.

By percent asset growth, PPI is the third-fastest growing ETF of the year. After launching on December 30 of last year, the fund has quickly gained traction with investors, with over $70 million in net flows in its first 70 trading days.

The PPI ETF was up 13.88% year-to-date through May 30, with the S&P down -19.27% during that period. The PPI ETF was the highest-performing fund over that period in the ETF’s Morningstar Category out of 440 funds.

PPI also has been garnering recognition from the investment management industry, as the fund was named Newcomer ETF of the Year at the With Intelligence Mutual Fund & ETF Awards.

“We are excited about the investor response to PPI, which has had a banner performance period since inception, said Greg Bassuk, CEO of AXS Investments. With inflation remaining a top concern for investors, we feel that this ETF provides a way to protect portfolios against the inflationary pressures that are prevalent in the current economic landscape. PPI is just one of many AXS funds emblematic of our commitment to providing unique and differentiated investor tools to complement more traditional allocations, and we’re thrilled to see the investor demand for our solutions.”

For more information, visit www.axsinvestments.com.

There are risks involved with investing including the possible loss of principal. Past performance does not guarantee future results.

Investors should carefully consider the investment objectives, risks, charges and expenses of any fund before investing. To obtain a prospectus containing this and other important information, please click here to view or download a prospectus online. Read the fund's prospectus carefully before you invest.

There is no guarantee the sectors or asset classes the advisor identifies will benefit from inflation. Fund may invest a larger portion of its assets in one or more sectors than many other funds, and thus will be more susceptible to negative events affecting those sectors.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the ETF. Brokerage commissions will reduce returns. NAVs are calculated using prices as of 4:00 PM Eastern Time. The closing price is the midpoint between the bid and ask price as of the close of exchange. Closing price returns do not represent the returns you would receive if you traded shares at other times.
