

Statement of Additional Information

January 25, 2021, as amended April 9, 2021

AXS Funds

AXS Alternative Value Fund

Investor Class: COGLX
Class I: COGVX

AXS Market Neutral Fund

Investor Class: COGMX
Class I: COGIX

Each a series of Investment Managers Series Trust II

This Statement of Additional Information (“SAI”) is not a prospectus, and it should be read in conjunction with the Prospectus dated January 25, 2021, as amended April 9, 2021, of the AXS Alternative Value Fund and AXS Market Neutral Fund (each a Fund, and together the “Funds”), each a series of Investment Managers Series Trust II (the “Trust”). AXS Investments LLC (the “Advisor”) is the investment advisor to the Funds. Quantitative Value Technologies LLC d/b/a Cognios Capital (“Cognios Capital” or the “Sub-Advisor”) is the sub-advisor to the Funds. A copy of the Funds’ Prospectus may be obtained by contacting the Funds at the address or telephone number specified below.

THE TRUST AND THE FUNDS

The Trust is an open-end management investment company organized as a Delaware statutory trust under the laws of the State of Delaware on August 20, 2013. The Trust currently consists of several other series of shares of beneficial interest. This SAI relates only to the Funds and not to the other series of the Trust.

The Trust is registered with the Securities and Exchange Commission (“SEC”) as an open-end management investment company. Such a registration does not involve supervision of the management or policies of the Fund. The Prospectus of the Fund and this SAI omit certain of the information contained in the Registration Statement filed with the SEC. Copies of such information may be obtained from the SEC upon payment of the prescribed fee.

Each of the Funds will acquire all the assets and liabilities of the following funds (each a “Predecessor Fund”) on the date listed below. Each Fund will adopt the prior performance and financial history of the corresponding Predecessor Fund.

Fund	Predecessor Fund*	Acquisition Date**
AXS Alternative Value Fund	AXS Alternative Value Fund	March 5, 2021
AXS Market Neutral Fund	AXS Market Neutral Fund	March 5, 2021

*Each Predecessor Fund was a series of M3Sixty Funds Trust.

** The expected closing date for the reorganization of each Predecessor Fund into the corresponding Fund.

Each Fund is classified as a diversified fund. Under the Investment Company Act of 1940, as amended (the “1940 Act”), a diversified fund may not, with respect to 75% of its total assets, invest more than 5% of its total assets in the securities of one issuer (and in not more than 10% of the outstanding voting securities of an issuer), excluding cash, Government securities, and securities of other investment companies. Each Fund’s classification as a diversified fund may only be changed with the approval of the Fund’s shareholders.

The Funds currently offer several classes of shares as described on the cover page of this SAI. Other classes may be established from time to time in accordance with the provisions of the Trust’s Agreement and Declaration of Trust (the “Declaration of Trust”). Each class of shares of a Fund generally is identical in all respects except that each class of shares is subject to its own distribution expenses and minimum investments. Each class of shares also has exclusive voting rights with respect to its distribution fees.

INVESTMENT STRATEGIES, POLICIES AND RISKS

The discussion below supplements information contained in the Funds’ Prospectus pertaining to the investment policies of one or more of the Funds. The Funds’ principal investment strategies and related risks are identified in the below table and described in detail following the table. A Fund may also invest, to a lesser extent, in investments other than those identified as its principal investments.

MARKET CONDITIONS

Events in certain sectors historically have resulted, and may in the future result, in an unusually high degree of volatility in the financial markets, both domestic and foreign. These events have included, but are not limited to: bankruptcies, corporate restructurings, and other events related to the sub-prime mortgage crisis in 2008; governmental efforts to limit short selling and high frequency trading; measures to address U.S. federal and state budget deficits; social, political, and economic instability in Europe; economic stimulus by the Japanese central bank; steep declines in oil prices; dramatic changes in currency exchange rates; China's economic slowdown; and circumstances such as pandemics or epidemics in one or more countries or regions. Interconnected global economies and financial markets increase the possibility that conditions in one country or region might adversely impact issuers in a different country or region. Such events may cause significant declines in the values and liquidity of many securities and other instruments. It is impossible to predict whether such conditions will recur. Because such situations may be widespread, it may be difficult to identify both risks and opportunities using past models of the interplay of market forces, or to predict the duration of such events.

An outbreak of an infectious respiratory illness caused by a novel coronavirus known as COVID-19 was first detected in China in December 2019 and has now been detected globally. This coronavirus has resulted in certain travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, prolonged quarantines, cancellations, supply chain disruptions, and lower consumer demand, as well as general concern and uncertainty. The impact of COVID-19, and other infectious illness outbreaks that may arise in the future, could adversely affect the economies of many nations or the entire global economy, individual issuers and capital markets in ways that cannot necessarily be foreseen. In addition, the impact of infectious illnesses in emerging market countries may be greater due to generally less established healthcare systems. Public health crises caused by the COVID-19 outbreak may exacerbate other pre-existing political, social and economic risks in certain countries or globally. The duration of the COVID-19 outbreak and its effects cannot be determined with certainty.

EQUITY SECURITIES

Common Stock

The Funds may invest in common stock. Common stock represents an equity (ownership) interest in a company, and usually possesses voting rights and earns dividends. Dividends on common stock are not fixed but are declared at the discretion of the issuer. Common stock generally represents the riskiest investment in a company. In addition, common stock generally has the greatest appreciation and depreciation potential because increases and decreases in earnings are usually reflected in a company's stock price.

The fundamental risk of investing in common stock is that the value of the stock might decrease. Stock values fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions. While common stocks have historically provided greater long-term returns than preferred stocks, fixed-income and money market investments, common stocks have also experienced significantly more volatility than the returns from those other investments.

Preferred Stock

The Funds may invest in preferred stock. Preferred stock is a class of stock having a preference over common stock as to the payment of dividends and a share of the proceeds resulting from the issuer's liquidation although preferred stock is usually subordinate to the debt securities of the issuer. Some preferred stocks also entitle their holders to receive additional liquidation proceeds on the same basis as the holders of the issuer's common stock. Preferred stock typically does not possess voting rights and its market value may change based on changes in interest rates. If interest rates rise, the fixed dividend on preferred stocks may be less attractive, causing the price of preferred stocks to decline. Preferred stock may have mandatory sinking fund provisions, as well as call/redemption provisions prior to maturity, a negative feature when interest rates decline. In addition, a fund may receive stocks or warrants as a result of an exchange or tender of fixed income securities. Preference stock, which is more common in emerging markets than in developed markets, is a special type of common stock that shares in the earnings of an issuer, has limited voting rights, may have a dividend preference, and may also have a liquidation preference. Depending on the features of the particular security, holders of preferred and preference stock may bear the risks regarding common stock or fixed income securities.

Small- and Mid-Cap Stocks

The Funds may invest in stock of companies with market capitalizations that are small compared to other publicly traded companies. Investments in larger companies present certain advantages in that such companies generally have greater financial resources, more extensive research and development, manufacturing, marketing and service capabilities, and more stability and greater depth of management and personnel. Investments in smaller, less seasoned companies may present greater opportunities for growth but also may involve greater risks than customarily are associated with more established companies. The securities of smaller companies may be subject to more abrupt or erratic market movements than larger, more established companies. These companies may have limited product lines, markets or financial resources, or they may be dependent upon a limited management group. Their securities may be traded in the over-the-counter market or on a regional exchange, or may otherwise have limited liquidity. As a result of owning large positions in this type of security, a Fund is subject to the additional risk of possibly having to sell portfolio securities at disadvantageous times and prices if redemptions require a Fund to liquidate its securities positions. In addition, it may be prudent for a Fund, as its asset size grows, to limit the number of relatively small positions it holds in securities having limited liquidity in order to minimize its exposure to such risks, to minimize transaction costs, and to maximize the benefits of research. As a consequence, as a Fund's asset size increases, a Fund may reduce its exposure to illiquid small capitalization securities, which could adversely affect performance.

The Funds may also invest in stocks of companies with medium market capitalizations (i.e., mid-cap companies). Such investments share some of the risk characteristics of investments in stocks of companies with small market capitalizations described above, although mid cap companies tend to have longer operating histories, broader product lines and greater financial resources and their stocks tend to be more liquid and less volatile than those of smaller capitalization issuers.

Large-Cap Stocks

The Funds may invest in stock of companies with large market capitalizations. Larger, more established companies may be unable to attain the high growth rates of successful, smaller companies during periods of economic expansion. In addition, large-capitalization companies may be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes, and may be more prone to global economic risks.

Warrants and Rights

The Funds may invest in warrants or rights (including those acquired in units or attached to other securities) that entitle (but do not obligate) the holder to buy equity securities at a specific price for a specific period of time but will do so only if such equity securities are deemed appropriate by the Sub-Advisor, as applicable. Rights are similar to warrants but typically have a shorter duration and are issued by a company to existing stockholders to provide those holders the right to purchase additional shares of stock at a later date. Warrants and rights do not have voting rights, do not earn dividends, and do not entitle the holder to any rights with respect to the assets of the company that has issued them. They do not represent ownership of the underlying companies but only the right to purchase shares of those companies at a specified price on or before a specified exercise date. Warrants and rights tend to be more volatile than the underlying stock, and if at a warrant's expiration date the stock is trading at a price below the price set in the warrant, the warrant will expire worthless. Conversely, if at the expiration date the stock is trading at a price higher than the price set in the warrant or right, a Fund can acquire the stock at a price below its market value. The prices of warrants and rights do not necessarily parallel the prices of the underlying securities. An investment in warrants or rights may be considered speculative.

Convertible Securities

The Funds may invest in convertible securities. A convertible security is a preferred stock, warrant or other security that may be converted or exchanged for a prescribed amount of common stock or other security of the same or a different issuer or into cash within a particular period of time at a specified price or formula. A convertible security generally entitles the holder to receive the dividend or interest until the convertible security matures or is redeemed, converted or exchanged. Before conversion, convertible securities generally have characteristics similar to both fixed income and equity securities. Although to a lesser extent than with fixed income securities generally, the market value of convertible securities tends to decline as interest rates increase and, conversely, tends to increase as interest rates decline. In addition, because of the conversion feature, the market value of convertible securities tends to vary with fluctuations in the market value of the underlying common stocks and, therefore, also will react to variations in the general market for equity securities. A significant feature of convertible securities is that as the market price of the underlying common stock declines, convertible securities tend to trade increasingly on a yield basis, and so they may not experience market value declines to the same extent as the underlying common stock. When the market price of the underlying common stock increases, the prices of the convertible securities tend to rise as a reflection of the value of the underlying common stock. While no securities investments are without risk, investments in convertible securities generally entail less risk than investments in common stock of the same issuer.

BORROWING

The Funds may engage in limited borrowing activities. Borrowing creates an opportunity for increased return, but, at the same time, creates special risks. Furthermore, if a Fund were to engage in borrowing, an increase in interest rates could reduce the value of the Fund's shares by increasing the Fund's interest expense. Subject to the limitations described under "Investment Limitations" below, each Fund may be permitted to borrow for temporary purposes and/or for investment purposes. Such a practice will result in leveraging of a Fund's assets and may cause the Fund to liquidate portfolio positions when it would not be advantageous to do so. This borrowing may be secured or unsecured. Provisions of the 1940 Act require a Fund to maintain continuous asset coverage (that is, total assets including borrowings, less liabilities exclusive of borrowings) of 300% of the amount borrowed, with an exception for borrowings not in excess of 5% of a Fund's total assets made for temporary administrative purposes. Any borrowings for temporary administrative purposes in excess of 5% of a Fund's total assets will count against this asset coverage requirement. If the 300% asset coverage should decline as a result of market fluctuations or other reasons, a Fund may be required to sell some of its portfolio holdings within three days to reduce the debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint if the Fund sells securities at that time. Borrowing will tend to exaggerate the effect on net asset value of any increase or decrease in the market value of the Funds' portfolios. Money borrowed will be subject to interest charges which may or may not be recovered by appreciation of the securities purchased, if any. The Funds also may be required to maintain minimum average balances in connection with such

borrowings or to pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

SHORT SALES

A Fund may seek to hedge investments or realize additional gains through the use of short sales. A short sale is a transaction in which a Fund sells a security it does not own in anticipation that the market price of that security will decline. If the price of the security sold short increases between the time of the short sale and the time a Fund replaces the borrowed security, the Fund will incur a loss; conversely, if the price declines, the Fund will realize a capital gain. Any gain will be decreased, and any loss will be increased, by the transaction costs incurred by a Fund, including the costs associated with providing collateral to the broker-dealer (usually cash and liquid securities) and the maintenance of collateral with its custodian. A Fund also may be required to pay a premium to borrow a security, which would increase the cost of the security sold short. Although a Fund's gain is limited to the price at which it sold the security short, its potential loss is theoretically unlimited.

The broker-dealer will retain the net proceeds of the short sale to the extent necessary to meet margin requirements until the short position is closed out.

When the Sub-Advisor believes that the price of a particular security held by a Fund may decline, it may make "short sales against the box" to hedge the unrealized gain on such security. Selling short against the box involves selling a security which a Fund owns for delivery at a specified date in the future. A Fund will incur transaction costs to open, maintain and close short sales against the box.

To the extent a Fund sells securities short (except in the case of short sales "against the box"), it is required to segregate an amount of cash or liquid securities on its records equal to the market price of the securities sold short. The segregated assets are marked to market daily in an attempt to ensure that the amount deposited in the segregated account is at least equal to the market value of the securities sold short. Segregated securities cannot be sold while the position they are covering is outstanding, unless they are replaced with similar securities. As a result, there is the possibility that segregation of a large percentage of a Fund's assets could affect its portfolio management.

DEBT SECURITIES

The Funds may invest in debt securities. Debt securities are used by issuers to borrow money. Generally, issuers pay investors periodic interest and repay the amount borrowed either periodically during the life of the security and/or at maturity. Some debt securities, such as zero coupon bonds, do not pay current interest, but are purchased at a discount from their face values and accrue interest at the applicable coupon rate over a specified time period. Some debt securities pay a periodic coupon that is not fixed; instead payments "float" relative to a reference rate, such as the London Interbank Offered Rate. This "floating rate" debt may pay interest at levels above or below the previous interest payment. The market prices of debt securities fluctuate depending on such factors as interest rates, credit quality and maturity. In general, market prices of debt securities decline when interest rates rise and increase when interest rates fall.

Lower rated debt securities, those rated Ba or below by Moody's Investors Service, Inc. ("Moody's") and/or BB or below by S&P Global Ratings ("S&P") or Fitch Ratings, Inc., unrated but determined by the Advisor or Sub-Advisor as the case may be to be of comparable quality, are described by the rating agencies as speculative and involve greater risk of default or price changes than higher rated debt securities due to the issuer's diminished creditworthiness or the fact that the issuer may already be in default. The market prices of these securities may fluctuate more than higher quality securities and may decline significantly in periods of general economic difficulty. It may be more difficult to sell or to determine the value of lower rated debt securities.

Certain additional risk factors related to debt securities are discussed below:

Sensitivity to interest rate and economic changes. Debt securities may be sensitive to economic changes, political and corporate developments, and interest rate changes. In addition, during an economic downturn or periods of rising interest rates, issuers that are highly leveraged may experience increased financial stress that could adversely affect their ability to meet projected business goals, obtain additional financing, and service their principal and interest payment obligations. Furthermore, periods of economic change and uncertainty can be expected to result in increased volatility of market prices and yields of certain debt securities. For example,

prices of these securities can be affected by financial contracts held by the issuer or third parties related to the security or other assets or indices.

Payment expectations. Debt securities may contain redemption or call provisions. If an issuer exercises these provisions in a lower interest rate environment, the Fund would have to replace the security with a lower yielding security, resulting in decreased income to investors. If the issuer of a debt security defaults on its obligations to pay interest or principal or is the subject of bankruptcy proceedings, the Fund may incur losses or expenses in seeking recovery of amounts owed to it.

Liquidity. Liquidity risk may result from the lack of an active market, or reduced number and capacity of traditional market participants to make a market in fixed income securities, and may be magnified in a rising interest rate environment or other circumstances where investor redemptions from fixed income mutual funds may be higher than normal, causing increased supply in the market due to selling activity. In such cases, the Fund, due to limitations on investments in illiquid securities and the difficulty in purchasing and selling such securities or instruments, may be unable to achieve its desired level of exposure to a certain sector. To the extent that the Fund's principal investment strategies involve investments in securities of companies with smaller market capitalizations, foreign non-U.S. securities, Rule 144A securities, illiquid sectors of fixed income securities or securities with substantial market and/or credit risk, the Fund will tend to have the greatest exposure to liquidity risk. Further, fixed income securities with longer durations until maturity face heightened levels of liquidity risk as compared to fixed income securities with shorter durations until maturity. Finally, liquidity risk also refers to the risk of unusually high redemption requests or other unusual market conditions that may make it difficult for the Fund to fully honor redemption requests within the allowable time period. Meeting such redemption requests could require the Fund to sell securities at reduced prices or under unfavorable conditions, which would reduce the value of the Fund. It may also be the case that other market participants may be attempting to liquidate fixed income holdings at the same time as the Fund, causing increased supply in the market and contributing to liquidity risk and downward pricing pressure.

The Sub-Advisor attempts to reduce the risks described above through diversification of the Fund's portfolio, credit analysis of each issuer, and by monitoring broad economic trends as well as corporate and legislative developments, but there can be no assurance that it will be successful in doing so. Credit ratings of debt securities provided by rating agencies indicate a measure of the safety of principal and interest payments, not market value risk. The rating of an issuer is a rating agency's view of past and future potential developments related to the issuer and may not necessarily reflect actual outcomes. There can be a lag between corporate developments and the time a rating is assigned and updated.

Changing Fixed Income Market Conditions. Following the financial crisis that began in 2007, the U.S. government and the Board of Governors of the Federal Reserve System (the "Federal Reserve"), as well as certain foreign governments and central banks, took steps to support financial markets, including by keeping interest rates at historically low levels and by purchasing large quantities of securities issued or guaranteed by the U.S. government, its agencies or instrumentalities on the open market ("Quantitative Easing"). Similar steps were taken again in 2020 in an effort to support the economy during the coronavirus pandemic. This and other government interventions may not work as intended, particularly if the efforts are perceived by investors as being unlikely to achieve the desired results. In addition, when the Federal Reserve determines to "taper" or reduce Quantitative Easing and/or raise the federal funds rate, there is a risk that interest rates across the U.S. financial system will rise. Such policy changes may expose fixed-income and related markets to heightened volatility and may reduce liquidity for certain Fund investments, which could cause the value of a Fund's investments and share price to decline.

Bond markets have consistently grown over the past three decades while the capacity for traditional dealer counterparties to engage in fixed income trading has not kept pace and in some cases has decreased. As a result, dealer inventories of corporate bonds, which provide a core indication of the ability of financial intermediaries to "make markets," are at or near historic lows in relation to market size. Because market makers provide stability to a market through their intermediary services, the significant reduction in dealer inventories could potentially lead to decreased liquidity and increased volatility in the fixed income markets. Such issues may be exacerbated during periods of economic uncertainty.

Bond Ratings. Bond rating agencies may assign modifiers (such as +/-) to ratings categories to signify the relative position of a credit within the rating category. Investment policies that are based on ratings categories should be read to include any security within that category, without considering the modifier. Please refer to Appendix A for more information about credit ratings.

Exchange Traded Notes (“ETNs”)

The Fund may invest in ETNs. An investment in an ETN involves risks, including possible loss of principal. ETNs are unsecured debt securities issued by a bank that are linked to the total return of a market index. Risks of investing in ETNs also include limited portfolio diversification, uncertain principal payment, and illiquidity. Additionally, the investor fee will reduce the amount of return on maturity or at redemption, and as a result the investor may receive less than the principal amount at maturity or upon redemption, even if the value of the relevant index has increased. An investment in an ETN may not be suitable for all investors

FOREIGN INVESTMENTS

The Fund may make foreign investments. Investments in the securities of foreign issuers and other non-U.S. investments may involve risks in addition to those normally associated with investments in the securities of U.S. issuers or other U.S. investments. All foreign investments are subject to risks of foreign political and economic instability, adverse movements in foreign exchange rates, and the imposition or tightening of exchange controls and limitations on the repatriation of foreign capital. Other risks stem from potential changes in governmental attitude or policy toward private investment, which in turn raises the risk of nationalization, increased taxation or confiscation of foreign investors' assets.

The financial problems in global economies over the past several years, including the European sovereign debt crisis, may continue to cause high volatility in global financial markets. In addition, global economies are increasingly interconnected, which increases the possibilities that conditions in one country or region might adversely impact a different country or region. The severity or duration of these conditions may also be affected if one or more countries leave the Euro currency or by other policy changes made by governments or quasi-governmental organizations.

Additional non-U.S. taxes and expenses may also adversely affect the Fund's performance, including foreign withholding taxes on foreign securities' dividends. Brokerage commissions and other transaction costs on foreign securities exchanges are generally higher than in the United States. Foreign companies may be subject to different accounting, auditing and financial reporting standards. To the extent foreign securities held by the Fund are not registered with the SEC or with any other U.S. regulator, the issuers thereof will not be subject to the reporting requirements of the SEC or any other U.S. regulator. Accordingly, less information may be available about foreign companies and other investments than is generally available on issuers of comparable securities and other investments in the United States. Foreign securities and other investments may also trade less frequently and with lower volume and may exhibit greater price volatility than U.S. securities and other investments.

Changes in foreign exchange rates will affect the value in U.S. Dollars of any foreign currency-denominated securities and other investments held by the Fund. Exchange rates are influenced generally by the forces of supply and demand in the foreign currency markets and by numerous other political and economic events occurring outside the United States, many of which may be difficult, if not impossible, to predict.

Income from any foreign securities and other investments will be received and realized in foreign currencies, and the Fund is required to compute and distribute income in U.S. Dollars. Accordingly, a decline in the value of a particular foreign currency against the U.S. Dollar occurring after the Fund's income has been earned and computed in U.S. Dollars may require the Fund to liquidate portfolio securities or other investments to acquire sufficient U.S. Dollars to make a distribution. Similarly, if the exchange rate declines between the time the Fund incurs expenses in U.S. Dollars and the time such expenses are paid, the Fund may be required to liquidate additional portfolio securities or other investments to purchase the U.S. Dollars required to meet such expenses.

The Fund may purchase foreign bank obligations. In addition to the risks described above that are generally applicable to foreign investments, the investments that the Fund makes in obligations of foreign banks, branches or subsidiaries may involve further risks, including differences between foreign banks and U.S. banks in applicable accounting, auditing

and financial reporting standards, and the possible establishment of exchange controls or other foreign government laws or restrictions applicable to the payment of certificates of deposit or time deposits that may affect adversely the payment of principal and interest on the securities and other investments held by the Fund.

Depository Receipts

The Fund may invest in depository receipts. American Depository Receipts (“ADRs”) are negotiable receipts issued by a U.S. bank or trust company that evidence ownership of securities in a foreign company which have been deposited with such bank or trust company’s office or agent in a foreign country. European Depository Receipts (“EDRs”) are negotiable certificates held in the bank of one country representing a specific number of shares of a stock traded on an exchange of another country. Global Depository Receipts (“GDRs”) are negotiable certificates held in the bank of one country representing a specific number of shares of a stock traded on an exchange of another country. Canadian Depository Receipts (“CDRs”) are negotiable receipts issued by a Canadian bank or trust company that evidence ownership of securities in a foreign company which have been deposited with such bank or trust company’s office or agent in a foreign country.

Investing in ADRs, EDRs, GDRs, and CDRs presents risks that may not be equal to the risk inherent in holding the equivalent shares of the same companies that are traded in the local markets even though the Fund will purchase, sell and be paid dividends on ADRs in U.S. Dollars. These risks include fluctuations in currency exchange rates, which are affected by international balances of payments and other economic and financial conditions; government intervention; speculation; and other factors. With respect to certain foreign countries, there is the possibility of expropriation or nationalization of assets, confiscatory taxation, political and social upheaval, and economic instability. The Fund may be required to pay foreign withholding or other taxes on certain ADRs, EDRs, GDRs, or CDRs that it owns, but investors may or may not be able to deduct their pro-rata share of such taxes in computing their taxable income, or take such shares as a credit against their U.S. federal income tax. See “Federal Income Tax Matters.” ADRs, EDRs, GDRs, and CDRs may be sponsored by the foreign issuer or may be unsponsored. Unsponsored ADRs, EDRs, GDRs, and CDRs are organized independently and without the cooperation of the foreign issuer of the underlying securities. Unsponsored ADRs, EDRs, GDRs, and CDRs are offered by companies which are not prepared to meet either the reporting or accounting standards of the United States. While readily exchangeable with stock in local markets, unsponsored ADRs, EDRs, GDRs, and CDRs may be less liquid than sponsored ADRs, EDRs, GDRs, and CDRs. Additionally, there generally is less publicly available information with respect to unsponsored ADRs, EDRs, GDRs, and CDRs.

TEMPORARY INVESTMENTS

The Funds may take temporary defensive measures that are inconsistent with a Fund’s normal fundamental or non-fundamental investment policies and strategies in response to adverse market, economic, political, or other conditions as determined by the Sub-Advisor. Such measures could include, but are not limited to, investments in (1) highly liquid short-term fixed income securities issued by or on behalf of municipal or corporate issuers, obligations of the U.S. government and its agencies, commercial paper, and bank certificates of deposit; (2) repurchase agreements involving any such securities; and (3) other money market instruments. A Fund also may invest in shares of money market mutual funds to the extent permitted under applicable law. Money market mutual funds are investment companies, and the investments in those companies by a Fund are in some cases subject to certain fundamental investment restrictions. As a shareholder in a mutual fund, a Fund will bear its ratable share of its expenses, including management fees, and will remain subject to payment of the fees to the Sub-Advisor, with respect to assets so invested. A Fund may not achieve its investment objectives during temporary defensive periods.

SHORT-TERM INVESTMENTS

The Funds may invest in any of the following securities and instruments:

Bank Certificates of Deposit, Bankers’ Acceptances and Time Deposits. The Funds may acquire certificates of deposit, bankers’ acceptances and time deposits in U.S. Dollar or foreign currencies. Certificates of deposit are negotiable certificates issued against monies deposited in a commercial bank for a definite period of time and earning a specified return. Bankers’ acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are “accepted” by a bank, meaning in effect that the bank unconditionally agrees to pay the face value of the instrument on maturity. The commercial banks issuing these short-term instruments which a Fund may acquire must, at the time of purchase, have capital, surplus and undivided profits

in excess of \$100 million (including assets of both domestic and foreign branches), based on latest published reports, or less than \$100 million if the principal amount of such bank obligations are fully insured by the U.S. government. If a Fund holds instruments of foreign banks or financial institutions, it may be subject to additional investment risks that are different in some respects from those incurred if the Fund invests only in debt obligations of U.S. domestic issuers. See “Foreign Investments” above. Such risks include future political and economic developments, the possible imposition of withholding taxes by the particular country in which the issuer is located, the possible confiscation or nationalization of foreign deposits, the possible establishment of exchange controls, or the adoption of other foreign governmental restrictions which may adversely affect the payment of principal and interest on these securities.

Domestic banks and foreign banks are subject to different governmental regulations with respect to the amount and types of loans that may be made and interest rates that may be charged. In addition, the profitability of the banking industry depends largely upon the availability and cost of funds and the interest income generated from lending operations. General economic conditions and the quality of loan portfolios affect the banking industry.

As a result of federal and state laws and regulations, domestic banks are required to maintain specified levels of reserves, limited in the amount that they can loan to a single borrower, and are subject to regulations designed to promote financial soundness. However, such laws and regulations may not necessarily apply to foreign banks, thereby affecting the risk involved in bank obligations that the Funds may acquire.

In addition to purchasing certificates of deposit and bankers’ acceptances, to the extent permitted under its investment strategies and policies stated above and in the Prospectus, the Funds may invest in interest-bearing time deposits or other interest-bearing deposits in commercial or savings banks. Time deposits are non-negotiable deposits maintained at a banking institution for a specified period of time at a specified interest rate.

Savings Association Obligations. The Funds may invest in certificates of deposit (interest-bearing time deposits) issued by savings banks or savings and loan associations that have capital, surplus and undivided profits in excess of \$100 million, based on latest published reports, or less than \$100 million if the principal amount of such obligations is fully insured by the U.S. government.

Commercial Paper, Short-Term Notes and Other Corporate Obligations. Each Fund may invest a portion of its assets in commercial paper and short-term notes. Commercial paper consists of unsecured promissory notes issued by corporations. Issues of commercial paper and short-term notes will normally have maturities of less than nine months and fixed rates of return, although such instruments may have maturities of up to one year.

The Funds’ investment in commercial paper and short-term notes will consist of issues rated at the time of purchase “A-2” or higher by S&P, “Prime-1” or “Prime-2” by Moody’s, or similarly rated by another nationally recognized statistical rating organization or, if unrated, will be determined by the Sub-Advisor to be of comparable quality. These rating symbols are described in Appendix A.

Corporate debt obligations are subject to the risk of an issuer’s inability to meet principal and interest payments on the obligations, i.e., credit risk. The Sub-Advisor may actively expose a Fund to credit risk. However, there can be no guarantee that the Sub-Advisor will be successful in making the right selections and thus fully mitigate the impact of credit risk changes on a Fund.

Government Obligations

The Funds may invest in U.S. Government obligations. Such obligations include Treasury bills, certificates of indebtedness, notes and bonds. U.S. Government obligations include securities issued or guaranteed as to principal and interest by the U.S. Government, its agencies or instrumentalities. Treasury bills, the most frequently issued marketable government securities, have a maturity of up to one year and are issued on a discount basis. U.S. Government obligations include securities issued or guaranteed by government-sponsored enterprises.

Payment of principal and interest on U.S. Government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. In the latter case, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, which agency or instrumentality may be privately owned. There can be no assurance that the U.S.

Government would provide financial support to its agencies or instrumentalities, including government-sponsored enterprises, where it is not obligated to do so. In addition, U.S. Government obligations are subject to fluctuations in market value due to fluctuations in market interest rates. As a general matter, the value of debt instruments, including U.S. Government obligations, declines when market interest rates increase and rises when market interest rates decrease. Certain types of U.S. Government obligations are subject to fluctuations in yield or value due to their structure or contract terms.

REAL ESTATE INVESTMENT TRUSTS (“REITs”)

The Funds may invest in REITs. REITs are pooled investment vehicles that invest primarily in income producing real estate or real estate related loans or interests. REITs are generally classified as equity REITs, mortgage REITs, or a combination of equity and mortgage REITs. Equity REITs invest the majority of their assets directly in real property and derive income primarily from the collection of rents. Equity REITs can also realize capital gains by selling properties that have appreciated in value. Mortgage REITs invest the majority of their assets in real estate mortgages and derive income from the collection of principal and interest payments. Similar to regulated investment companies such as the Fund, REITs are not taxed on income distributed to shareholders provided they comply with certain requirements of the Internal Revenue Code of 1986, as amended (the “Code”). The Fund will indirectly bear its proportionate share of expenses incurred by REITs in which the Fund invests in addition to the expenses incurred directly by the Fund.

Investing in REITs involves certain unique risks in addition to those risks associated with investing in the real estate industry in general. Equity REITs may be affected by changes in the value of the underlying property owned by the REITs, while mortgage REITs may be affected by the quality of any credit extended. REITs are dependent upon management skills, are not diversified, and are subject to heavy cash flow dependency, default by borrowers and self-liquidation.

Investing in REITs involves risks similar to those associated with investing in small capitalization companies. REITs may have limited financial resources, may trade less frequently and in a limited volume and may be subject to more abrupt or erratic price movements than larger company securities. Historically, small capitalization stocks, such as REITs, have had more price volatility than larger capitalization stocks.

REITs may fail to qualify for the favorable federal income tax treatment generally available to them under the Code and may fail to maintain their exemptions from registration under the 1940 Act. REITs (especially mortgage REITs) also are subject to interest rate risks. When interest rates decline, the value of a REIT’s investment in fixed-rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a REIT’s investment in fixed-rate obligations can be expected to decline. In contrast, as interest rates on adjustable rate mortgage loans are reset periodically, yields on a REIT’s investments in such loans will gradually align themselves to reflect changes in market interest rates, causing the value of such investments to fluctuate less dramatically in response to interest rate fluctuations than would investments in fixed-rate obligations.

Effective for taxable years beginning after December 31, 2017, the recently enacted Tax Cuts and Jobs Act generally allows individuals and certain other non-corporate entities, such as partnerships, a deduction for 20% of qualified REIT dividends. Recently issued proposed regulations allow a RIC to pass the character of its qualified RIC dividends through to its shareholders provided certain holding period requirements are met.

INVESTMENT COMPANY SECURITIES

A Fund may invest in shares of other investment companies (each, an “Underlying Fund”), including open-end funds, closed-end funds, unit investment trusts (“UITs”) and exchange-traded funds (“ETFs”), to the extent permitted by applicable law and subject to certain restrictions set forth in this SAI.

Under Section 12(d)(1)(A) of the 1940 Act, a Fund may acquire securities of an Underlying Fund in amounts which, as determined immediately after the acquisition is made, do not exceed (i) 3% of the total outstanding voting stock of such Underlying Fund, (ii) 5% of the value of the Fund’s total assets, and (iii) 10% of the value of the Fund’s total assets when combined with all other Underlying Fund securities held by the Fund. A Fund may exceed these statutory limits when permitted by SEC order or other applicable law or regulatory guidance, such as is the case with many ETFs. The SEC recently adopted certain regulatory changes and took other actions related to the ability of an investment company to invest in the securities of another investment company. These changes include, among other things, the rescission of certain SEC exemptive orders permitting investments in excess of the statutory limits and the withdrawal of certain related SEC staff no-action letters, and the adoption of Rule 12d1-4 under the 1940 Act. Rule 12d1-4, which is effective as of January 19, 2021, permits the Funds to invest in other investment companies beyond the statutory limits, subject to certain conditions. The rescission of the applicable exemptive orders and the withdrawal of the applicable no-action letters is effective on January 19, 2022. After such time, an investment company will no longer be able to rely on the aforementioned exemptive orders and no-action letters, and will be subject instead to Rule 12d1-4 and other applicable rules under Section 12(d)(1).

Generally, under Sections 12(d)(1)(F) and 12(d)(1)(G) of the 1940 Act and SEC rules adopted pursuant to the 1940 Act, a Fund may acquire the securities of affiliated and unaffiliated Underlying Funds subject to the following guidelines and restrictions:

- A Fund may own an unlimited amount of the securities of any registered open-end fund or registered unit investment trust that is affiliated with a Fund, so long as any such Underlying Fund has a policy that prohibits it from acquiring any securities of registered open-end funds or registered UITs in reliance on certain sections of the 1940 Act.
- A Fund and its “affiliated persons” may own up to 3% of the outstanding stock of any fund, subject to the following restrictions:
 - i. the Fund and each Underlying Fund, in the aggregate, may not charge a sales load greater than the limits set forth in Rule 2830(d)(3) of the Conduct Rules of the Financial Industry Regulatory Authority (“FINRA”) applicable to funds of funds;
 - ii. each Underlying Fund is not obligated to redeem more than 1% of its total outstanding securities during any period less than 30 days; and
 - iii. the Fund is obligated either to (i) seek instructions from its shareholders with regard to the voting of all proxies with respect to the Underlying Fund and to vote in accordance with such instructions, or (ii) to vote the shares of the Underlying Fund held by the Fund in the same proportion as the vote of all other shareholders of the Underlying Fund.

Underlying Funds typically incur fees that are separate from those fees incurred directly by a Fund. A Fund’s purchase of such investment company securities results in the layering of expenses as Fund shareholders would indirectly bear a proportionate share of the operating expenses of such investment companies, including advisory fees, in addition to paying Fund expenses. In addition, the securities of other investment companies may also be leveraged and will therefore be subject to certain leverage risks. The net asset value and market value of leveraged securities will be more volatile and the yield to shareholders will tend to fluctuate more than the yield generated by unleveraged securities. Investment companies may have investment policies that differ from those of a Fund.

Under certain circumstances an open-end investment company in which a Fund invests may determine to make payment of a redemption by a Fund wholly or in part by a distribution in kind of securities from its portfolio, instead of in cash. As a result, a Fund may hold such securities until the Sub-Advisor determines it is appropriate to dispose of them. Such disposition will impose additional costs on a Fund.

Investment decisions by the investment advisors to the registered investment companies in which a Fund invests are made independently of a Fund. At any particular time, one Underlying Fund may be purchasing shares of an issuer whose shares are being sold by another Underlying Fund. As a result, under these circumstances a Fund indirectly would incur certain transactional costs without accomplishing any investment purpose.

Exchange-Traded Funds (“ETFs”)

A Fund may invest in ETFs. ETFs are pooled investment vehicles that generally seek to track the performance of specific indices. ETFs may be organized as open-end funds or as UITs. Their shares are listed on stock exchanges and can be traded throughout the day at market-determined prices.

An ETF generally issues index-based investments in large aggregations of shares known as “Creation Units” in exchange for a “Portfolio Deposit” consisting of (a) a portfolio of securities designated by the ETF, (b) a cash payment equal to a pro rata portion of the dividends accrued on the ETF’s portfolio securities since the last dividend payment by the ETF, net of expenses and liabilities, and (c) a cash payment or credit (“Balancing Amount”) designed to equalize the net asset value of the shares and the net asset value of a Portfolio Deposit.

Shares of ETFs are not individually redeemable, except upon the reorganization, merger, conversion or liquidation of the ETF. To redeem shares of an ETF, an investor must accumulate enough shares of the ETF to reconstitute a Creation Unit. The liquidity of small holdings of ETF shares, therefore, will depend upon the existence of a secondary market for such shares. Upon redemption of a Creation Unit, the investor will receive securities designated by the ETF (“Redemption Securities”) and a cash payment in an amount equal to the difference between the net asset value of the shares being redeemed and the net asset value of the Redemption Securities.

The price of ETF shares is based upon (but not necessarily identical to) the value of the securities held by the ETF. Accordingly, the level of risk involved in the purchase or sale of ETF shares is similar to the risk involved in the purchase or sale of traditional common stock, with the exception that the pricing mechanism for ETF shares is based on a basket of stocks. Disruptions in the markets for the securities underlying ETF shares purchased or sold by a Fund could result in losses on such shares. There is no assurance that the requirements of the national securities exchanges necessary to maintain the listing of shares of any ETF will continue to be met.

WHEN-ISSUED OR DELAYED-DELIVERY SECURITIES

A Fund may purchase securities on a when-issued or delayed delivery basis. For example, delivery of and payment for these securities can take place a month or more after the date of the purchase commitment. The purchase price and the interest rate payable, if any, on the securities are fixed on the purchase commitment date or at the time the settlement date is fixed. The value of such securities is subject to market fluctuations and, in the case of fixed income securities, no interest accrues to a Fund until settlement takes place. When purchasing a security on a when-issued or delayed-delivery basis, a Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. Accordingly, at the time a Fund makes the commitment to purchase securities on a when-issued or delayed delivery basis, it will record the transaction, reflect the value each day of such securities in determining its net asset value and, if applicable, calculate the maturity for the purposes of average maturity from that date. At the time of its acquisition, a when-issued security may be valued at less than the purchase price. A Fund will make commitments for such when-issued transactions only when it has the intention of actually acquiring the securities. To facilitate such acquisitions, a Fund will maintain with its custodian a segregated account with liquid assets, consisting of cash, U.S. government securities or other appropriate securities, in an amount at least equal to such commitments. On delivery dates for such transactions, a Fund will meet its obligations from maturities or sales of the securities held in the segregated account and/or from cash flow. If, however, a Fund chooses to dispose of the right to acquire a when-issued security prior to its acquisition, it could, as with the disposition of any other portfolio obligation, recognize taxable capital gain or loss due to market fluctuation. Also, a Fund may be disadvantaged if the other party to the transaction defaults.

ILLIQUID AND RESTRICTED SECURITIES

A Fund may invest up to 15% of its net assets in illiquid securities. Illiquid securities are securities that a Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the securities. Illiquid securities may be difficult to value, and a Fund may have difficulty or be unable to dispose of such securities promptly or at reasonable prices.

A Fund may invest in restricted securities. Restricted securities are securities that may not be sold freely to the public absent registration under the 1933 Act, or an exemption from registration. While restricted securities are generally presumed to be illiquid, it may be determined that a particular restricted security is liquid. Rule 144A under the 1933 Act establishes a safe harbor from the registration requirements of the 1933 Act for resales of certain securities to qualified institutional buyers. Institutional markets for restricted securities sold pursuant to Rule 144A in many cases provide both readily ascertainable values for restricted securities and the ability to liquidate an investment to satisfy share redemption orders. Such markets might include automated systems for the trading, clearance and settlement of unregistered securities of domestic and foreign issuers, such as the PORTAL System sponsored by NASDAQ. An insufficient number of qualified buyers interested in purchasing Rule 144A eligible restricted securities, however, could adversely affect the marketability of such portfolio securities and result in the Fund's inability to dispose of such securities promptly or at favorable prices.

A Fund may purchase commercial paper issued pursuant to Section 4(a)(2) of the 1933 Act. 4(a)(2) commercial paper has substantially the same price and liquidity characteristics as commercial paper generally, except that the resale of 4(a)(2) commercial paper is limited to the institutional investor marketplace. Such a restriction on resale makes 4(a)(2) commercial paper technically a restricted security under the 1933 Act. In practice, however, 4(a)(2) commercial paper can be resold as easily as any other unrestricted security held by a Fund.

Rule 22e-4 under the 1940 Act requires, among other things, that the Funds establish a liquidity risk management program ("LRMP") that is reasonably designed to assess and manage liquidity risk. Rule 22e-4 defines "liquidity risk" as the risk that a fund could not meet requests to redeem shares issued by the fund without significant dilution of the remaining investors' interests in the fund. The Funds have implemented a LRMP to meet the relevant requirements. Additionally, the Board, including a majority of the Independent Trustees, approved the designation of the Advisor as the Funds' LRMP administrator to administer such program, and will review no less frequently than annually a written report prepared by the Advisor that addresses the operation of the LRMP and assesses its adequacy and effectiveness of implementation. Among other things, the LRMP provides for the classification of each Fund investment as a "highly liquid investment," "moderately liquid investment," "less liquid investment" or "illiquid investment." The liquidity risk classifications of each Fund's investments are determined after reasonable inquiry and taking into account relevant market, trading and investment-specific considerations. To the extent that a Fund investment is deemed to be an "illiquid investment" or a "less liquid investment," the Fund can expect to be exposed to greater liquidity risk. There is no guarantee the LRMP will be effective in its operations, and complying with Rule 22e-4, including bearing related costs, could impact a Fund's performance and its ability to seek its investment objective.

A Fund will not purchase illiquid securities if, as a result of the purchase, more than 15% of the Fund's net assets are invested in such securities. If at any time a portfolio manager and/or the Advisor or Sub-Advisor determines that the value of illiquid securities held by the Fund exceeds 15% of the Fund's net assets, the Fund's portfolio managers and the Advisor or Sub-Advisor will take such steps as they consider appropriate to reduce the percentage as soon as reasonably practicable.

REPURCHASE AGREEMENTS

The Funds may enter into repurchase agreements with respect to its portfolio securities. Pursuant to such agreements, a Fund acquires securities from financial institutions such as banks and broker-dealers deemed to be creditworthy by the Advisor or a Sub-Advisor, subject to the seller's agreement to repurchase and a Fund's agreement to resell such securities at a mutually agreed upon date and price. The repurchase price generally equals the price paid by a Fund plus interest negotiated on the basis of current short-term rates (which may be more or less than the rate on the underlying portfolio security). Securities subject to repurchase agreements will be held by the custodian or in the Federal Reserve/Treasury Book-Entry System or an equivalent foreign system. The seller under a repurchase agreement will be required to maintain the value of the underlying securities at not less than 102% of the repurchase price under the agreement. If the seller defaults on its repurchase obligation, a Fund will suffer a loss to the extent that the proceeds from a sale of the underlying securities are less than the repurchase price under the agreement. Bankruptcy or insolvency of such a defaulting seller may cause a Fund's rights with respect to such securities to be delayed or limited. Repurchase agreements are considered to be loans under the 1940 Act.

REVERSE REPURCHASE AGREEMENTS

The Funds may enter into “reverse” repurchase agreements to avoid selling securities during unfavorable market conditions to meet redemptions. Each Fund may invest a maximum of 10% of total assets in reverse repurchase agreements. Pursuant to a reverse repurchase agreement, the Fund will sell portfolio securities and agree to repurchase them from the buyer at a particular date and price. Whenever a Fund enters into a reverse repurchase agreement, it will establish a segregated account in which it will maintain liquid assets in an amount at least equal to the repurchase price marked to market daily (including accrued interest), and will subsequently monitor the account to ensure that such equivalent value is maintained. A Fund pays interest on amounts obtained pursuant to reverse repurchase agreements. Reverse repurchase agreements are considered to be borrowings by a Fund.

LARGE SHAREHOLDER REDEMPTION RISK

Certain account holders may from time to time own (beneficially or of record) or control a significant percentage of a Fund's shares. Redemptions by these account holders of their shares in a Fund may impact a Fund's liquidity and net asset value. Such redemptions may also force a Fund to sell securities at a time when it would not otherwise do so, which may increase a Fund's broker costs and impact shareholder taxes.

LENDING PORTFOLIO SECURITIES

Consistent with applicable regulatory requirements and a Fund's investment restrictions, a Fund may lend portfolio securities to securities broker-dealers or financial institutions, provided that such loans are callable at any time by a Fund (subject to notice provisions described below), and are at all times secured by cash or cash equivalents, which are maintained in a segregated account pursuant to applicable regulations and that are at least equal to the market value, determined daily, of the loaned securities. The advantage of such loans is that a Fund continues to receive the income on the loaned securities while at the same time earns interest on the cash amounts deposited as collateral, which will be invested in short-term obligations. Each Fund will not lend portfolio securities if such loans are not permitted by the laws or regulations of any state in which its shares are qualified for sale. A Fund's loans of portfolio securities will be collateralized in accordance with applicable regulatory requirements and no loan will cause the value of all loaned securities to exceed 33 1/3% of the value of a Fund's total assets.

A loan may generally be terminated by the borrower on one business day's notice, or by the Fund on five business days' notice. If the borrower fails to deliver the loaned securities within five days after receipt of notice or fails to maintain the requisite amount of collateral, the Fund could use the collateral to replace the securities while holding the borrower liable for any excess of replacement cost over collateral. As with any extensions of credit, there are risks of delay in recovery and in some cases even loss of rights in the collateral should the borrower of the securities fail financially. However, these loans of portfolio securities will only be made to firms deemed by the Fund's management to be creditworthy and when the income that can be earned from such loans justifies the attendant risks. Upon termination of the loan, the borrower is required to return the securities to the Fund. Any gain or loss in the market price during the loan period would inure to the Fund. The risks associated with loans of portfolio securities are substantially similar to those associated with repurchase agreements. Thus, if the counterparty to the loan petitions for bankruptcy or becomes subject to the U.S. Bankruptcy Code, the law regarding the rights of the Fund is unsettled. As a result, under extreme circumstances, there may be a restriction on the Fund's ability to sell the collateral, and the Fund would suffer a loss. When voting or consent rights that accompany loaned securities pass to the borrower, the Fund will follow the policy of calling the loaned securities, to be delivered within one day after notice, to permit the exercise of such rights if the matters involved would have a material effect on the Fund's investment in such loaned securities. The Fund will pay reasonable finder's, administrative and custodial fees in connection with a loan of its securities.

DEVELOPMENTS IN THE CHINA REGION

After nearly 30 years of unprecedented growth, the People's Republic of China now faces a slowing economy. The real estate market, which many observers believed to be inflated, has begun to decline. Local governments, which had borrowed heavily to bolster growth, face high debt burdens and limited revenue sources. As a result, demand for Chinese exports by the United States and countries in Europe, and demands for Chinese imports from such countries, may weaken due to the effects of more limited economic growth. Additionally, Chinese actions to lay claim to disputed islands have caused relations with China's regional trading partners to suffer, and could cause further disruption to regional and international trade. From time to time and as recently as January 2020, China has experienced outbreaks of infectious illnesses, and the country may be subject to other public health threats, infectious illnesses, diseases or similar issues in the future. Any spread of an infectious illness, public health threat or similar issue could reduce

consumer demand or economic output, result in market closures, travel restrictions or quarantines, and generally have a significant impact on the Chinese economy. In the long run, China's ability to develop and sustain a credible legal, regulatory, monetary, and socioeconomic system could influence the course of outside investment.

EUROPE – RECENT EVENTS

A number of countries in Europe have experienced severe economic and financial difficulties. Many non-governmental issuers, and even certain governments, have defaulted on, or been forced to restructure, their debts; many other issuers have faced difficulties obtaining credit or refinancing existing obligations; financial institutions have in many cases required government or central bank support, have needed to raise capital, and/or have been impaired in their ability to extend credit; and financial markets in Europe and elsewhere have experienced extreme volatility and declines in asset values and liquidity. These difficulties may continue, worsen or spread within or outside Europe. Responses to the financial problems by European governments, central banks and others, including austerity measures and reforms, may not work, may result in social unrest and may limit future growth and economic recovery or have other unintended consequences. Further defaults or restructurings by governments and others of their debt could have additional adverse effects on economies, financial markets and asset valuations around the world.

The European Union (the “EU”) currently faces major issues involving its membership, structure, procedures and policies, including the successful political, economic and social integration of new member states, the EU’s resettlement and distribution of refugees, and resolution of the EU’s problematic fiscal and democratic accountability. In addition, one or more countries may abandon the Euro, the common currency of the EU, and/or withdraw from the EU. The impact of these actions, especially if they occur in a disorderly fashion, is not clear but could be significant and far-reaching.

United Kingdom Exit from the EU. On January 31, 2020, the United Kingdom (the “UK”) formally withdrew from the EU (commonly referred to as “Brexit”) and entered an 11-month transition period during which the UK remained part of the EU single market and customs union, the laws of which governed the economic, trade, and security relations between the UK and EU. The transition period concluded on December 31, 2020, and the UK left the EU single market and customs union under the terms of a new trade agreement. The agreement governs the new relationship between the UK and EU with respect to trading goods and services, but critical aspects of the relationship remain unresolved and subject to further negotiation and agreement. The political, regulatory, and economic consequences of Brexit are uncertain, and the ultimate ramifications may not be known for some time. The effects of Brexit on the UK and EU economies and the broader global economy could be significant, resulting in negative impacts, such as business and trade disruptions, increased volatility and illiquidity, and potentially lower economic growth of markets in the UK, EU, and globally, which could negatively impact the value of the Funds’ investments. Brexit could also lead to legal uncertainty and politically divergent national laws and regulations while the new relationship between the UK and EU is further defined and the UK determines which EU laws to replace or replicate. Additionally, depreciation of the British pound sterling and/or the euro in relation to the U.S. dollar following Brexit could adversely affect Fund investments denominated in the British pound sterling and/or the euro, regardless of the performance of the investment.

Whether or not a Fund invests in securities of issuers located in Europe or with significant exposure to European issuers or countries, these events could negatively affect the value and liquidity of a Fund’s investments due to the interconnected nature of the global economy and capital markets. A Fund may also be susceptible to these events to the extent that a Fund invests in municipal obligations with credit support by non-U.S. financial institutions.

CYBERSECURITY RISK

Investment companies, such as a Fund, and its service providers may be subject to operational and information security risks resulting from cyber attacks. Cyber attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber security breaches. Cyber attacks affecting a Fund, the Advisor or Sub-Advisor, a Fund’s custodian or transfer agent, or intermediaries or other third-party service providers may adversely impact a Fund. For instance, cyber attacks may interfere with the processing of shareholder transactions, impact a Fund’s ability to calculate its net asset value, cause the release of private shareholder information or confidential company information, impede trading, subject a Fund to regulatory fines or financial losses, and cause reputational damage. A Fund may also incur additional costs for cybersecurity risk management purposes. While a Fund and its service providers have established business continuity plans and risk management systems designed to prevent or reduce the impact of cybersecurity attacks, such

plans and systems have inherent limitations due in part to the ever-changing nature of technology and cybersecurity attack tactics, and there is a possibility that certain risks have not been adequately identified or prepared for. Furthermore, a Fund cannot control any cybersecurity plans or systems implemented by its service providers.

Similar types of cybersecurity risks are also present for issuers of securities in which a Fund invests, which could result in material adverse consequences for such issuers, and may cause a Fund's investment in such portfolio companies to lose value.

LIBOR RISK

Many financial instruments, financings or other transactions to which a Fund may be a party use or may use a floating rate based on the London Interbank Offered Rate ("LIBOR"). LIBOR is the offered rate at which major international banks can obtain wholesale, unsecured funding, and LIBOR may be available for different durations (e.g., 1 month or 3 months) and for different currencies. LIBOR may be a significant factor in determining the cost of financing to the Fund or an investment's value or return to the Fund, and may be used in other ways that affect the Fund's investment performance. In July 2017, the Financial Conduct Authority, the United Kingdom's financial regulatory body, announced that after 2021 it will cease its active encouragement of banks to provide the quotations needed to sustain LIBOR. That announcement suggests that LIBOR may cease to be published or utilized after that time, although it is possible that all or a part of the phase out may be delayed. Various financial industry groups have begun planning for that transition, but there are obstacles to converting certain securities and transactions to a new benchmark. Transition planning is ongoing, and the effect of the transition process and its ultimate success cannot yet be determined. The transition process may lead to increased volatility and illiquidity in markets for instruments the terms of which are based on LIBOR. It could also lead to a reduction in the value of some LIBOR-based investments and reduce the effectiveness of new hedges placed against existing LIBOR-based investments. While some LIBOR-based instruments may contemplate a scenario in which LIBOR is no longer available by providing for an alternative rate-setting methodology and/or increased costs for certain LIBOR-related instruments or financing transactions, not all may have such provisions and there may be significant uncertainty regarding the effectiveness of any such alternative methodologies, resulting in prolonged adverse market conditions for a Fund. Since the usefulness of LIBOR as a benchmark could deteriorate during the transition period, these effects could occur prior to the completion of the phase out. The willingness and ability of issuers to include enhanced provisions in new and existing contracts or instruments also remains uncertain. Any of these factors may adversely affect a Fund's performance or NAV.

INVESTMENT RESTRICTIONS

Each Fund has adopted the following restrictions as fundamental policies, which may not be changed without the favorable "vote of the holders of a majority of the outstanding voting securities" of the Fund, as defined in the 1940 Act. Under the 1940 Act, the "vote of the holders of a majority of the outstanding voting securities" of a Fund means the vote of the holders of the lesser of (i) 67% of the shares of the Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented or (ii) more than 50% of the outstanding shares of the Fund. Each Fund's investment objective is a non-fundamental policy and may be changed without shareholder approval.

Each Fund may not:

1. Issue senior securities, borrow money or pledge its assets, except that (i) the Fund may borrow from banks in amounts not exceeding one-third of its net assets (including the amount borrowed); and (ii) this restriction shall not prohibit the Fund from engaging in options transactions or short sales or investing in financial futures, swaps, when-issued or delayed delivery securities, or reverse repurchase agreements;
2. Act as underwriter, except to the extent the Fund may be deemed to be an underwriter in connection with the sale of securities in its investment portfolio;
3. With respect to 75% of the Fund's total assets, purchase the securities of any issuer (other than securities issued or guaranteed by the U.S. government or any of its agencies or instrumentalities) if, as a result, (a) more than 5% of the Fund's total assets would be invested in the securities of that issuer, or (b) the Fund would hold more than 10% of the outstanding voting securities of that issuer;

4. Invest 25% or more of its total assets, calculated at the time of purchase in any one industry (other than securities issued by the U.S. government, its agencies or instrumentalities);
5. Purchase or sell real estate or interests in real estate or real estate limited partnerships (although the Fund may purchase and sell securities which are secured by real estate and securities of companies which invest or deal in real estate, such as REITs);
6. Make loans of money, except (a) for purchases of debt securities consistent with the investment policies of the Fund, (b) by engaging in repurchase agreements or, (c) through the loan of portfolio securities in an amount up to 33 1/3% of the Fund's net assets; or
7. Purchase or sell physical commodities, unless acquired as a result of ownership of securities or other instruments. This limitation shall not prevent the Fund from purchasing, selling or entering into futures contracts, or acquiring securities or other instruments and options thereon backed by, or related to, physical commodities.

Each Fund observes the following restriction as a matter of operating but not fundamental policy, pursuant to positions taken by federal regulatory authorities:

Each Fund may not invest, in the aggregate, more than 15% of its net assets in illiquid securities that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the securities.

Except with respect to borrowing, if a percentage or rating restriction on investment or use of assets set forth herein or in the Prospectus is adhered to at the time a transaction is effected, later changes in percentage resulting from any cause other than actions by the Fund will not be considered a violation.

MANAGEMENT OF THE FUND

Trustees and Officers

The overall management of the business and affairs of the Trust is vested with its Board of Trustees. The Board approves all significant agreements between the Trust and persons or companies furnishing services to it, including the agreements with the Advisor, co-administrators, distributor, custodian and transfer agent. The day-to-day operations of the Trust are delegated to its officers, except that the Advisor are responsible for making day-to-day investment decisions in accordance with each Fund's investment objectives, strategies, and policies, all of which are subject to general supervision by the Board.

The Trustees and officers of the Trust, their years of birth and positions with the Trust, term of office with the Trust and length of time served, their business addresses and principal occupations during the past five years and other directorships held during the past five years are listed in the table below. Unless noted otherwise, each person has held the position listed for a minimum of five years. Thomas Knipper, Kathleen K. Shkuda, Larry D. Tashjian and John P. Zader are all of the Trustees who are not "interested persons" of the Trust, as that term is defined in the 1940 Act (collectively, the "Independent Trustees").

Name, Address, Year of Birth and Position(s) held with Trust	Term of Office ^c and Length of Time Served	Principal Occupation During the Past Five Years and Other Affiliations	Number of Portfolios in the Fund Complex Overseen by Trustee ^d	Other Directorships Held by Trustee During the Past Five Years ^e
"Independent" Trustees:				
Thomas Knipper, CPA ^a (born 1957) Trustee	Since September 2013	Vice President and Chief Compliance Officer, Ameritas Investment Partners, a registered investment advisor (1995 – present).	9	None.

Name, Address, Year of Birth and Position(s) held with Trust	Term of Office ^c and Length of Time Served	Principal Occupation During the Past Five Years and Other Affiliations	Number of Portfolios in the Fund Complex Overseen by Trustee ^d	Other Directorships Held by Trustee During the Past Five Years ^e
Kathleen K. Shkuda ^a (born 1951) Trustee	Since September 2013	Zigzag Consulting, a financial services consulting firm (2008 – present); Director, Managed Accounts, Merrill Lynch (2007 – 2008).	9	None.
Larry D. Tashjian ^a (born 1953) Trustee and Chairman of the Board	Since September 2013	Principal, CAM Capital Advisors, a family office (2001 – present).	9	General Finance Corporation.
John P. Zader ^a (born 1961) Trustee	Since September 2013	Retired (June 2014 – present); CEO, UMB Fund Services, Inc., a mutual fund and hedge fund service provider, and the transfer agent, fund accountant, and co-administrator for the Fund (December 2006 – June 2014); President, Investment Managers Series Trust (December 2007 – June 2014).	99	Investment Managers Series Trust, a registered investment company (includes 51 portfolios); 361 Social Infrastructure Fund, a closed-end investment company.
Interested Trustees:				
Eric M. Banhazl ^{b†} (born 1957) Trustee	Since September 2013	Chairman, Foothill Capital Management, LLC, a registered investment advisor (2018 – present); Chairman (2016 – present), and President (2006 – 2015), Mutual Fund Administration, LLC, co-administrator for the Fund; Trustee and Vice President, Investment Managers Series Trust (September 2013 – January 2016).	9	Investment Managers Series Trust, a registered investment company (includes 51 portfolios); 361 Social Infrastructure Fund, a closed-end investment company.
Terrance P. Gallagher ^{a*} (born 1958) Trustee and President	Since July 2019	President, Investment Managers Series Trust II (September 2013 – present); Executive Vice President, UMB Fund Services, Inc. (2007 – present); and Director of Compliance, Unified Fund Services Inc. (now Huntington Fund Services), a mutual fund service provider (2004 – 2007).	9	Cliffwater Corporate Lending Fund, a registered investment company; Agility Multi-Asset Income Fund, a closed-end investment company; Corbin Multi-Strategy Fund, a closed-end investment company; Aspiriant Risk-Managed Real Asset Fund, a closed-end investment company; Aspiriant Risk-Managed Capital Appreciation Fund, a closed-end investment company; Infinity Core Alternative Fund, a closed-end investment company; Infinity Long/Short Equity Fund, LLC, a closed-end investment company; Keystone Private Income Fund, a closed-end investment company; Relative Value Fund, a closed-end investment company; Variant Alternative Income Fund, a closed-end investment company.

Name, Address, Year of Birth and Position(s) held with Trust	Term of Office ^c and Length of Time Served	Principal Occupation During the Past Five Years and Other Affiliations	Number of Portfolios in the Fund Complex Overseen by Trustee ^d	Other Directorships Held by Trustee During the Past Five Years ^e
Officers of the Trust:				
Rita Dam ^b (born 1966) Treasurer and Assistant Secretary	Since September 2013	Co-President, Foothill Capital Management, LLC, a registered investment advisor (2018 – present); Co-Chief Executive Officer (2016 – present), and Vice President (2006 – 2015), Mutual Fund Administration, LLC.	N/A	N/A
Joy Ausili ^b (born 1966) Vice President and Assistant Secretary	Since January 2016	Co-President, Foothill Capital Management, LLC, a registered investment advisor (2018 – present); Co-Chief Executive Officer (2016 – present), and Vice President (2006 – 2015), Mutual Fund Administration, LLC; Secretary and Assistant Treasurer, Investment Managers Series Trust (September 2013 – January 2016).	N/A	N/A
Diane Drake ^b (born 1967) Secretary	Since January 2016	Senior Counsel, Mutual Fund Administration, LLC (October 2015 – present); Chief Compliance Officer, Foothill Capital Management, LLC, a registered investment advisor (2018 – 2019); Managing Director and Senior Counsel, BNY Mellon Investment Servicing (US) Inc. (2010 – 2015).	N/A	N/A
Martin Dziura ^b (born 1959) Chief Compliance Officer	Since September 2013	Principal, Dziura Compliance Consulting, LLC (October 2014 - present); Managing Director, Cipperman Compliance Services (2010 – September 2014); Chief Compliance Officer, Hanlon Investment Management (2009 – 2010); Vice President – Compliance, Morgan Stanley Investment Management (2000 – 2009).	N/A	N/A

a Address for certain Trustees and certain officers: 235 West Galena Street, Milwaukee, Wisconsin 53212.

b Address for Mr. Banhazl, Ms. Ausili, Ms. Dam and Ms. Drake: 2220 E. Route 66, Suite 226, Glendora, California 91740.
Address for Mr. Dziura: 309 Woodridge Lane, Media, Pennsylvania 19063.

c Trustees and officers serve until their successors have been duly elected.

d The Trust is comprised of 16 series managed by unaffiliated investment advisors. Each Trustee serves as Trustee of each series of the Trust. The term “Fund Complex” applies only to the series managed by the same investment advisor. The Funds’ investment advisor also serves as investment advisor to the AXS Alternative Growth Fund, AXS Aspect Core Diversified Strategy Fund, AXS Chesapeake Strategy Fund, AXS Managed Futures Strategy Fund, AXS Multi-Strategy Alternatives Fund, AXS Sustainable Income Fund, AXS Thomson Reuters Private Equity Return Tracker Fund, AXS Thomson Reuters Venture Capital Return Tracker Fund, and AXS All Terrain Opportunity Fund which are offered in a separate prospectus. The Funds do not hold themselves out as related to any other series within the Trust, for purposes of investment and investor services.

e “Other Directorships Held” includes only directorships of companies required to register or file reports with the SEC under the Securities Exchange Act of 1934, as amended (that is, “public companies”) or other investment companies registered under the 1940 Act.

† Mr. Banhazl is an “interested person” of the Trust by virtue of his position with Mutual Fund Administration, LLC and Foothill Capital Management, LLC.

* Mr. Gallagher is an “interested person” of the Trust by virtue of his position with UMB Fund Services, Inc.

Compensation

Each Independent Trustee receives from the Trust a quarterly retainer of \$13,500, \$4,000 for each special in-person meeting attended and \$1,000 for each special telephonic meeting attended. The Trust has no pension or retirement plan. No other entity affiliated with the Trust pays any compensation to the Trustees.

The Trustees may elect to defer payment of their compensation from the Fund pursuant to the Trust’s non-qualified Deferred Compensation Plan for Trustees which permits the Trustees to defer receipt of all or part of their compensation from the Trust. Amounts deferred are deemed invested in shares of one or more series of the Trust, as selected by the Trustee from time to time. A Trustee’s deferred compensation account will be paid in cash at such times as elected by the Trustee, subject to certain mandatory payment provisions in the Deferred Compensation Plan. Deferral and payment elections under the Deferred Compensation Plan are subject to strict requirements for modification.

	Independent Trustees			
	Thomas Knipper, Independent Trustee and Audit Committee Chair	Kathleen K. Shkuda, Independent Trustee and Valuation Committee Chair	Larry D. Tashjian, Independent Trustee, Chairman	John P Zader, Independent Trustee Nominating Committee Chair

Total Compensation from Fund and Fund Complex Paid to Trustees ^{1,2}	\$27,000	\$27,000	\$27,000	\$27,000

1 Estimated annual compensation for the first year.

2 There are currently numerous portfolios comprising the Trust. The term "Fund Complex" applies only to the series managed by the same investment advisor. The Funds' investment advisor also serves as investment advisor to the AXS Alternative Growth Fund, AXS Chesapeake Strategy Fund, AXS Aspect Core Diversified Strategy Fund, AXS Managed Futures Strategy Fund, AXS Multi-Strategy Alternatives Fund, AXS Sustainable Income Fund, AXS Thomson Reuters Private Equity Return Tracker Fund, AXS Thomson Reuters Venture Capital Return Tracker Fund and AXS All Terrain Opportunity Fund, which are offered in separate prospectuses. The Funds do not hold themselves out as related to any other series within the Trust, for purposes of investment and investor services.

Messrs. Banhazl and Gallagher are not compensated for their service as Trustees because of their affiliation with the Trust. Officers of the Trust are not compensated by the Fund for their services.

Additional Information Concerning the Board and the Trustees

The current Trustees were selected in September 2013 (July 2019 for Mr. Gallagher) with a view towards establishing a Board that would have the broad experience needed to oversee a registered investment company comprised of multiple series employing a variety of different investment strategies. As a group, the Board has extensive experience in many different aspects of the financial services and asset management industries.

The Trustees were selected to join the Board based upon the following factors, among others: character and integrity; willingness to serve and willingness and ability to commit the time necessary to perform the duties of a Trustee; as to each Trustee other than Mr. Banhazl, Mr. Gallagher and Mr. Zader (at that time), satisfying the criteria for not being classified as an "interested person" of the Trust as defined in the 1940 Act; as to Mr. Banhazl and Mr. Gallagher, their positions with Mutual Fund Administration, LLC, and UMB Fund Services, Inc., respectively, the Trust's co-administrators. In addition, the Trustees have the following specific experience, qualifications, attributes and/or skills relevant to the operations of the Trust:

- Mr. Knipper has substantial experience with respect to the operation, administration and compliance programs of mutual funds and as a senior executive with a registered investment advisor.
- Ms. Shkuda has substantial experience in the investment management industry, including as a consultant with respect to operations and marketing of investment managers and distribution of mutual funds and other investment products.
- Mr. Tashjian has extensive leadership experience in the investment management industry, including as a principal and a chief executive officer of a registered investment advisor.
- Mr. Banhazl has significant experience serving in senior executive and board positions for mutual funds and with respect to the organization and operation of mutual funds and multiple series trusts similar to the Trust.

- Mr. Zader has substantial experience serving in senior executive positions at mutual fund administrative service providers.
- Mr. Gallagher has substantial experience serving in senior executive positions at mutual fund administrative service providers.

In its periodic self-assessment of the effectiveness of the Board, the Board considers the complementary individual skills and experience of the individual Trustees primarily in the broader context of the Board's overall composition so that the Board, as a body, possesses the appropriate (and appropriately diverse) skills and experience to oversee the business of the Fund. The summaries set forth above as to the qualifications, attributes and skills of the Trustees are required by the registration form adopted by the SEC, do not constitute holding out the Board or any Trustee as having any special expertise or experience, and do not impose any greater responsibility or liability on any such person or on the Board as a whole than would otherwise be the case.

The Board of Trustees has three standing committees: the Audit Committee, the Nominating, Governance and Regulatory Review Committee (the "Nominating Committee"), and the Valuation Committee.

- The function of the Audit Committee, with respect to each series of the Trust, is to review the scope and results of the series' annual audit and any matters bearing on the audit or the series' financial statements and to assist the Board's oversight of the integrity of the series' pricing and financial reporting. The Audit Committee is comprised of all of the Independent Trustees and is chaired by Mr. Knipper. It does not include any Interested Trustees. The Audit Committee is expected to meet at least twice a year with respect to each series of the Trust.

The Audit Committee also serves as the Qualified Legal Compliance Committee ("QLCC") for the Trust for the purpose of compliance with Rules 205.2(k) and 205.3(c) of the Code of Federal Regulations regarding alternative reporting procedures for attorneys retained or employed by an issuer who appear and practice before the SEC on behalf of the issuer.

- The Nominating Committee is responsible for reviewing matters pertaining to composition, committees, and operations of the Board, as well as assisting the Board in overseeing matters related to certain regulatory issues. The Nominating Committee meets from time to time as needed. The Nominating Committee will consider trustee nominees properly recommended by the Trust's shareholders. Shareholders who wish to recommend a nominee should send nominations that include, among other things, biographical data and the qualifications of the proposed nominee to the Trust's Secretary. The Independent Trustees comprise the Nominating Committee, and the Committee is chaired by Mr. Zader.
- The function of the Valuation Committee is to recommend to the Board for its approval methodologies for valuing securities held by any series of the Trust for which current and reliable market quotations are not readily available; monitor prices determined by officers of the Trust pursuant to such methodologies; and approve fair valued security prices that are not determined pursuant to an approved methodology. The actions of the Valuation Committee are subsequently reviewed by the Board. The Valuation Committee is comprised of all the Trustees and is chaired by Ms. Shkuda, but action may be taken by any one of the Trustees. The Valuation Committee meets as needed.

Independent Trustees comprise 67% of the Board and Larry Tashjian, an Independent Trustee, serves as Chairperson of the Board. The Chairperson serves as a key point person for dealings between the Trust's management and the other Independent Trustees. As noted above, through the committees of the Board the Independent Trustees consider and address important matters involving each series of the Trust, including those presenting conflicts or potential conflicts of interest. The Independent Trustees also regularly meet outside the presence of management and are advised by independent legal counsel. The Board has determined that its organization and leadership structure are appropriate in light of its fiduciary and oversight obligations, the special obligations of the Independent Trustees, and the relationship between the Interested Trustees and the Trust's co-administrators. The Board also believes that its structure facilitates the orderly and efficient flow of information to the Independent Trustees from management.

Consistent with its responsibility for oversight of the Funds in the interests of shareholders, the Board among other things oversees risk management of the Funds' investment programs and business affairs directly and through the Audit Committee. The Board has emphasized to the Advisor the importance of maintaining vigorous risk management programs and procedures.

The Funds face a number of risks, such as investment risk, valuation risk, reputational risk, risk of operational failure or lack of business continuity, and legal, compliance and regulatory risk. Risk management seeks to identify and address risks, i.e., events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Funds. Under the overall supervision of the Board, the Advisor, Sub-Advisor and other service providers to the Funds employ a variety of processes, procedures and controls to identify various of those possible events or circumstances, to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Different processes, procedures and controls are employed with respect to different types of risks. Various personnel, including the Trust's Chief Compliance Officer (the "CCO"), the Advisor's management, and other service providers (such as each Fund's independent registered public accounting firm) make periodic reports to the Board or to the Audit Committee with respect to various aspects of risk management. The Board recognizes that not all risks that may affect a Fund can be identified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve a Fund's investment objective, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Trustees as to risk management matters are typically summaries of the relevant information. As a result of the foregoing and other factors, the Board's risk management oversight is subject to substantial limitations.

Fund Shares Beneficially Owned by Trustees

Certain information regarding ownership by the Trustees of the Funds and other series of the Trust, as of the date of this SAI, is set forth in the following table.

Name of Trustee	AXS Alternative Value Fund (\$)	AXS Market Neutral Fund (\$)	Aggregate Dollar Range of Equity Securities in all Registered Investment Companies Overseen by Trustee in Family of Investment Companies (\$)
Larry Tashjian, Independent Trustee	None	None	\$10,001 - \$50,000
Kathy Shkuda, Independent Trustee	None	None	None
Thomas Knipper, Independent Trustee	None	None	None
John P. Zader, Independent Trustee	None	None	\$10,001 - \$50,000
Eric M. Banhazl, Interested Trustee	None	None	Over \$100,000
Terrance P. Gallagher, Interested Trustee	None	None	None

Control Persons, Principal Shareholders, and Management Ownership

As of the date of this SAI, the Funds are under the control of AXS, which had voting authority with respect to 100% of the outstanding shares in each Fund on such date. However, once the Funds commence investment operations and its shares are sold to the public, this control will be diluted. As of the date of this SAI, the Trustees and officers of the Trust as a group did not own more than 1% of the outstanding shares of a Fund. Furthermore, neither the Independent Trustees, nor members of their immediate families, own securities beneficially or of record in the Advisor, the Sub-Advisor, the Funds' distributor, IMST Distributors, LLC (the "Distributor"), or any of their respective affiliates."

The Advisor

AXS Investments LLC (the "Advisor" or "AXS"), located at 181 Westchester Avenue, Suite 402, Port Chester, New York 10573, acts as investment advisor to the Funds pursuant to an Investment Advisory Agreement (the "Advisory Agreement"). Pursuant to the terms of the Advisory Agreement, the Advisor provides the Funds with investment advice, makes recommendations with respect to the selection and continued employment of the Sub-Advisor to manage each Fund's assets, performs diligence on and monitors the Sub-Advisor, investment performance and adherence to compliance procedures, and oversees the investments made by the Sub-Advisor. The Advisor also continuously monitors the Sub-Advisor's compliance with a Fund's investment objectives, policies and restrictions. Subject to such policies as the Board of Trustees may determine, the Advisor is ultimately responsible for investment decisions for the

Funds. AXS Investments LLC is wholly owned by AXS Holdings LLC. AXS Holdings LLC is ultimately controlled by Gregory Bassuk.

The Advisory Agreement will remain in effect for an initial two-year period. After the initial two-year period, the Advisory Agreement will continue in effect with respect to a Fund from year to year only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Funds' outstanding voting securities and by a majority of the Trustees who are not parties to the Advisory Agreement or interested persons of any such party, at a meeting called for the purpose of voting on the Advisory Agreement. The Advisory Agreement is terminable without penalty by the Trust on behalf of the Funds, upon giving the Advisor 60 days' notice when authorized either by a majority vote of the Funds' shareholders or by a vote of a majority of the Board, or by the Advisor on 60 days' written notice, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act). The Advisory Agreement provides that the Advisor shall not be liable for any error of judgment or for any loss suffered by the Trust in connection with the Advisory Agreement, except for a loss resulting from a breach of fiduciary duty, or for a loss resulting from willful misfeasance, bad faith or gross negligence in the performance of its duties, or from reckless disregard by the Advisor of its duties under the Advisory Agreement.

In consideration of the services to be provided by the Advisor pursuant to the Advisory Agreement, the Advisor is entitled to receive from each Fund an investment advisory fee computed daily and paid monthly based on an annual rate equal to a percentage of the Fund's average daily net assets specified in the Prospectus.

Sub-Advisor

The Advisor has entered into a sub-advisory agreement with Cognios Capital with respect to each Fund (the "Sub-Advisory Agreement"). Cognios Capital commenced operations in February 2020 and has its principal place of business at 7900 College Boulevard, Suite 124, Overland Park, Kansas 66210. Cognios Capital is an SEC-registered investment advisor.

The Sub-Advisory Agreement will remain in effect for an initial two-year period. After the initial two-year period, the Sub-Advisory Agreement will continue in effect from year to year only as long as such continuance is specifically approved at least annually by (i) the Board of Trustees of the Trust or by the vote of a majority of the outstanding voting shares of the Fund, and (ii) by the vote of a majority of the Trustees of the Trust who are not parties to the Sub-Advisory Agreement or interested persons of the Advisor, the Sub-Advisor or the Trust. The Sub-Advisory Agreement may be terminated at any time without the payment of any penalty by the Board of Trustees of the Trust or by the vote of a majority of the outstanding voting shares of the relevant Fund, or by the Sub-Advisor or the Advisor, upon 60 days' written notice to the other party. Additionally, the Sub-Advisory Agreement automatically terminates in the event of its assignment. The Sub-Advisory Agreement provides that the Sub-Advisor shall not be liable for any error of judgment or for any loss suffered by the Trust in connection with the Sub-Advisory Agreement, except for a loss resulting from a breach of fiduciary duty, or for a loss resulting from willful misfeasance, bad faith or gross negligence in the performance of its duties, or from reckless disregard by the Sub-Advisor of its duties under the Sub-Advisory Agreement.

The Advisor compensates the Sub-Advisor out of the investment advisory fees the Advisor receives from the Fund. The Sub-Advisor makes investment decisions for the assets it has been allocated to manage, subject to the overall supervision of the Advisor.

Fund Expenses

Each Fund is responsible for its own operating expenses (all of which will be borne directly or indirectly by the Funds' shareholders), including among others, legal fees and expenses of counsel to the Funds and the Funds' Independent Trustees; insurance (including Trustees' and officers' errors and omissions insurance); auditing and accounting expenses; taxes and governmental fees; listing fees; dues and expenses incurred in connection with membership in investment company organizations; fees and expenses of the Funds' custodians, administrators, transfer agents, registrars and other service providers; expenses for portfolio pricing services by a pricing agent, if any; expenses in connection with the issuance and offering of shares; expenses relating to investor and public relations; expenses of registering or qualifying securities of the Funds' for public sale; brokerage commissions and other costs of acquiring or disposing of any portfolio holding of the Funds; expenses of preparation and distribution of reports, notices and dividends to shareholders;

expenses of the dividend reinvestment plan; compensation and expenses of Trustees; any litigation expenses; and costs of shareholders' and other meetings.

The Advisor has contractually agreed to waive its fees and/or pay for operating expenses of each Fund to ensure that the total annual Fund operating expenses (excluding, as applicable, any taxes, leverage interest, brokerage commissions, dividend expenses on short sales, acquired fund fees and expenses as determined in accordance with Form N-1A, expenses incurred in connection with any merger or reorganization, and extraordinary expenses such as litigation expenses) to the limit set forth in the Expense Table in the Prospectus (the "expense cap"). This agreement is effective for a two-year period following the reorganization of the Predecessor Funds which is expected to occur on March 5, 2021. The agreement may be terminated before that date with respect to a Fund only by the Board of Trustees.

Fund	Expense Cap as percent of the average daily net assets	
	Investor Class	Class I
AXS Alternative Value Fund	1.10%	0.85%
AXS Market Neutral Fund	1.70%	1.45%

The Advisor is permitted to seek reimbursement from each Fund, subject to certain limitations, of fees waived or payments made by the Advisor to the Fund for a period ending three years after the date of the waiver or payment. Similarly, Cognios Capital, is permitted to seek reimbursement from each Fund, subject to certain limitations, of fees waived or payments made by Cognios Capital to the Predecessor Fund prior to the Reorganization, for a period ending three years after the date of the waiver or payment. In each case, the reimbursement may be requested from a Fund if the reimbursement will not cause the Fund's annual expense ratio to exceed the lesser of (a) the expense limitation in effect at the time such fees were waived or payments made, and (b) the expense limitation in effect at the time of the reimbursement. Reimbursements of fees waived or payments made will be made on a "first in, first out" basis so that the oldest fees waived or payments are satisfied first. However, the reimbursement amount may not exceed the total amount of fees waived and/or Fund expenses paid by the Advisor and will not include any amounts previously reimbursed to the Advisor by the Fund. Any such reimbursement is contingent upon the Board's subsequent review of the reimbursed amounts. Each Fund must pay current ordinary operating expenses before the Advisor or Cognios Capital is entitled to any reimbursement of fees and/or Fund expenses.

For the following fiscal years indicated below, the Predecessor Fund/AXS Alternative Value Fund paid the following investment advisory fees:

Fiscal Year Ended	Advisory Fees Accrued	Advisory Fees Waived	Reimbursement of Other Expenses	Net Advisory Fees Paid
June 30, 2020	\$156,397	\$(156,397)	\$(47,465)	\$(47,465)
June 30, 2019	\$128,060	\$(128,060)	\$(47,757)	\$(47,757)
June 30, 2018	\$199,993	\$(158,243)	\$0	\$41,750

For the following fiscal years/periods indicated below, the Predecessor Fund/AXS Market Neutral Fund paid the following investment advisory fees:

Fiscal Year/Period Ended	Advisory Fees Accrued	Advisory Fees Waived	Reimbursement of Other Expenses	Net Advisory Fees Paid
June 30, 2020	\$915,499	\$(336,109)	\$0	\$579,390
June 30, 2019	\$1,188,411	\$(322,356)	\$0	\$866,055
October 1, 2017 - June 30, 2018*	\$683,067	\$(197,855)	\$0	\$485,182
September 30, 2017	\$1,725,602	\$(168,157)	\$0	\$1,557,445

* On April 25, 2018, the fiscal year end for the Predecessor Fund changed to June 30th.

Portfolio Managers

Set forth below is the following information as of June 30, 2020 with respect to each portfolio manager who is primarily responsible for the day-to-day management of each Fund's portfolio, as identified in the Prospectus: (i) other accounts managed by the portfolio manager, (ii) a description of the portfolio manager's compensation structure and (iii) the dollar range of the portfolio manager's investments in each Fund.

Portfolio Managers	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
Jonathan C. Angrist	0	\$0	1	\$75	19	\$89.7
Brian J. Machtley	0	\$0	1	\$75	19	\$89.7

Number of Accounts with Advisory Fee Based on Performance						
Portfolio Managers	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
Jonathan C. Angrist	0	\$0	0	\$0	0	\$0
Brian J. Machtley	0	\$0	0	\$0	0	\$0

Material Conflicts of Interest. Actual or apparent conflicts of interest may arise when a portfolio manager has day-to-day management responsibilities with respect to more than one fund or other account. Where conflicts of interest arise between a Fund and other accounts managed by a portfolio manager, the Advisor and/or Sub-Advisor will proceed in a manner that ensures that the Fund will not be treated less favorably than the other accounts. There may be instances where similar portfolio transactions may be executed for the same security for numerous accounts managed by the portfolio manager. In such instances, securities will be allocated in accordance with the Advisor's and/or Sub-Advisor's trade allocation policy.

Compensation. The portfolio managers are responsible for the day-to-day management of the Funds and are compensated with a base salary, plus a discretionary bonus. The bonus is determined by the business unit's revenue and profitability as well as the individual's contribution to the business unit. The bonus is discretionary and is not based specifically on portfolio performance.

Ownership of the Funds by Portfolio Manager. The following chart sets forth the dollar range of shares owned by each portfolio manager in the Predecessor Funds as December 31, 2020.

Name of Portfolio Manager	Dollar Range of Securities in the Funds (A: None, B: \$1-\$10,000, C: \$10,001-\$50,000, D: \$50,001-\$100,000, E: \$100,001 - \$500,000, F: \$500,001 - \$1,000,000, G: Over \$1,000,000)	
	AXS Alternative Value Fund	AXS Market Neutral Fund
Jonathan C. Angrist	D	E
Brian J. Machtley	E	D

Manager of Managers Structure

AXS and the Trust have received an exemptive order from the SEC which allows AXS to operate the Funds under a “manager of managers” structure (the “Order”). The Order permits AXS, subject to the approval of the Board, to hire or replace sub-advisors and modify any existing or future agreement with such sub-advisors without obtaining shareholder approval.

Service Providers

Pursuant to a Co-Administration Agreement (the “Co-Administration Agreement”), UMB Fund Services, Inc. (“UMBFS”), 235 West Galena Street, Milwaukee, Wisconsin 53212, and Mutual Fund Administration, LLC (“MFAC”), 2220 E. Route 66, Suite 226, Glendora, California 91740 (collectively the “Co-Administrators”), act as co-administrators for the Funds. The Co-Administrators provide certain administrative services to the Funds, including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Funds’ independent contractors and agents; preparing for signature by an officer of the Trust of all documents required to be filed for compliance with applicable laws and regulations including those of the securities laws of various states; arranging for the computation of performance data, including net asset value and yield; arranging for the maintenance of books and records of the Funds; and providing, at their own expense, office facilities, equipment and personnel necessary to carry out their duties. In this capacity, the Co-Administrators do not have any responsibility or authority for the management of the Funds, the determination of investment policy, or for any matter pertaining to the distribution of Fund shares. The Co-Administration Agreement provides that neither Co-Administrator shall be liable for any error of judgment or mistake of law or for any loss suffered by the Trust or its series, except for losses resulting from a Co-Administrator’s willful misfeasance, bad faith or negligence in the performance of its duties or from reckless disregard by it of its obligations and duties under the Agreement.

Pursuant to the Co-Administration Agreement, each Fund pays the Co-Administrators a fee for administration services. The fee is payable monthly based on the Fund’s average daily net assets.

UMBFS also acts as the Trust’s fund accountant, transfer agent and dividend disbursing agent pursuant to separate agreements.

The Predecessor Funds paid the following administrative fees for the periods indicated:

	Administrative Fees
AXS Alternative Value Fund	
For the Fiscal Year Ended June 30, 2020	\$116,839
For the Fiscal Year Ended June 30, 2019	\$82,608
For the Fiscal Year Ended June 30, 2018	\$101,524
AXS Market Neutral Fund	
For the Fiscal Year Ended June 30, 2020	\$178,982
For the Fiscal Year Ended June 30, 2019	\$179,474**
For the Fiscal Period October 1, 2017 – June 30, 2018*	\$148,947***
For the Fiscal Year Ended September 30, 2017	\$148,237

*On April 25, 2018, the fiscal year for the Predecessor Fund changed to June 30th.

** \$11,250 of these fees were waived by the Predecessor Fund’s administrator.

*** \$2,500 of these fees were waived by the Predecessor Fund’s administrator.

UMB Bank, n.a. (the “Custodian”), an affiliate of UMBFS, is the custodian of the assets of the Fund pursuant to a custody agreement between the Custodian and the Trust, whereby the Custodian provides services for fees on a transactional basis plus out-of-pocket expenses. The Custodian’s address is 928 Grand Boulevard, Kansas City, Missouri 64106. The Custodian does not participate in decisions pertaining to the purchase and sale of securities by the Fund.

Tait, Weller & Baker LLP (“Tait Weller”), Two Liberty Place, 50 South 16th Street, Suite 2900, Philadelphia, Pennsylvania 19102, is the independent registered public accounting firm for the Funds. Its services include auditing the Funds’ financial statements and the performance of related tax services.

Morgan, Lewis & Bockius LLP (“Morgan Lewis”) 600 Anton Boulevard, Suite 1800, Costa Mesa, California 92626, serves as legal counsel to the Trust and to the Independent Trustees.

Distributor and the Distribution Agreement

IMST Distributors, LLC is the distributor (also known as the principal underwriter) of the shares of the Funds and is located at Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor is a registered broker-dealer and is a member of the Financial Industry Regulatory Authority, Inc. (“FINRA”). The Distributor is not affiliated with the Trust, the Advisor, or any other service provider for the Funds.

Under a Distribution Agreement with the Trust dated January 1, 2013 (the “Distribution Agreement”), the Distributor acts as the agent of the Trust in connection with the continuous offering of shares of the Funds. The Distributor continually distributes shares of the Funds on a best efforts basis. The Distributor has no obligation to sell any specific quantity of Fund shares. The Distributor and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Trust.

The Distributor may enter into agreements with selected broker-dealers, banks or other financial intermediaries for distribution of shares of the Funds. With respect to certain financial intermediaries and related fund “supermarket” platform arrangements, the Funds and/or the Advisor, rather than the Distributor, typically enter into such agreements. These financial intermediaries may charge a fee for their services and may receive shareholder service or other fees from parties other than the Distributor. These financial intermediaries may otherwise act as processing agents and are responsible for transmitting purchase, redemption and other requests to the Funds.

Investors who purchase shares through financial intermediaries will be subject to the procedures of those intermediaries through which they purchase shares, which may include charges, investment minimums, cutoff times and other restrictions in addition to, or different from, those listed herein. Information concerning any charges or services will be provided to customers by the financial intermediary through which they purchase shares. Investors purchasing shares

of the Fund through financial intermediaries should acquaint themselves with their financial intermediary's procedures and should read the Prospectus in conjunction with any materials and information provided by their financial intermediary. The financial intermediary, and not its customers, will be the shareholder of record, although customers may have the right to vote shares depending upon their arrangement with the financial intermediary. The Distributor does not receive compensation from the Fund for its distribution services except the distribution/service fees with respect to the shares of those classes for which a Rule 12b-1 distribution plan is effective. The Advisor pays the Distributor a fee for certain distribution-related services.

The Distribution Agreement will continue in effect with respect to a Fund only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund's outstanding voting securities in accordance with the 1940 Act. The Distribution Agreement is terminable without penalty by the Trust on behalf of a Fund on no less than 60 days' written notice when authorized either by a vote of a majority of the outstanding voting securities of the Fund or by vote of a majority of the members of the Board who are not "interested persons" (as defined in the 1940 Act) of the Trust and have no direct or indirect financial interest in the operation of the Distribution Agreement, or by the Distributor, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act). The Distribution Agreement provides that the Distributor shall not be liable for any error of judgment or mistake of law or for any loss suffered by the Trust in connection with the performance of the Distributor's obligations and duties under the Distribution Agreement, except a loss resulting from the Distributor's willful misfeasance, bad faith or gross negligence in the performance of such duties and obligations, or by reason of its reckless disregard thereof.

The Distributor does not retain sales charges for the sale of a Fund's Class A shares. Pursuant to the Distribution Agreement, should any amounts be retained by the Distributor, such amounts would not be held for profit by the Distributor, but instead would be used solely for distribution-related expenditures.

Dealer Reallowances

The Funds' shares are subject to a sales charge that includes a dealer reallowance, which varies depending on how much the shareholder invests. The Distributor pays the appropriate dealer reallowance to dealers who have entered into an agreement with the Distributor to sell shares of the Funds. More detailed information on the sales charge and its application is contained in the Prospectus.

Rule 12b-1 Plan

The Trust has adopted a plan pursuant to Rule 12b-1 under the 1940 Act (the "12b-1 Plan") that provides for Fund assets to be used for the payment for distribution services for Class A shares and Class C shares. The 12b-1 Plan provides alternative methods for paying sales charges and may help the Funds grow or maintain asset levels to provide operational efficiencies and economies of scale. The 12b-1 Plan also provides for the payment of service fees in connection with the provision of post-sales shareholder liaison services to holders of Class A shares and Class C shares as defined in FINRA regulations, including personal services such as responding to customer inquiries, and services related to the maintenance of shareholder accounts. Because 12b-1 fees are paid out of Fund assets attributable to Class A shares and Class C shares on an ongoing basis, they will, over time, increase the cost of an investment and may cost more than other types of sales charges.

The 12b-1 Plan provides that the distribution fees paid by Class A or Class C shares of the Fund may be used to pay for any expenses primarily intended to result in the sale of shares of such Class, including, but not limited to: (a) costs of payments, including incentive compensation, made to agents for and consultants to the Distributor or the Trust, including pension administration firms that provide distribution services and broker-dealers that engage in the distribution of the shares of such Class of the Fund; (b) payments made to, and expenses of, persons who provide support services in connection with the distribution of shares of such Class of the Fund; (c) payments made pursuant to any dealer agreements between the Distributor and certain broker-dealers, financial institutions and other service providers with respect to such Class of the Fund; (d) costs relating to the formulation and implementation of marketing and promotional activities; (e) costs of printing and distributing prospectuses, statements of additional information and reports of the Fund to prospective shareholders of such Class of the Fund; (f) costs involved in preparing, printing and distributing sales literature pertaining to such Class of the Fund; (g) costs involved in obtaining such information, analyses and reports with respect to marketing and promotional activities that the Trust may deem advisable with respect to such Class of the Fund; and (h) reimbursement to the Advisor for expenses advanced on behalf of the Fund or Class with respect to such activities. The 12b-1 Plan is a compensation plan, which means that the Distributor is compensated

regardless of its expenses, as opposed to a reimbursement plan which reimburses only for expenses incurred. The Distributor does not retain any 12b-1 fees for profit. All 12b-1 fees are held in a retention account by the Distributor to pay for and/or reimburse the Advisor for distribution-related expenditures.

The 12b-1 Plan may not be amended to materially increase the amount to be paid by the Funds; Class A or Class C shares for distribution services without the vote of a majority of the outstanding voting securities of such shares. The 12b-1 Plan shall continue in effect indefinitely with respect to a Class, provided that such continuance is approved at least annually by a vote of a majority of the Trustees, including the Independent Trustees, cast in person at a meeting called for such purpose or by vote of at least a majority of the outstanding voting securities of such Class. The 12b-1 Plan may be terminated with respect to a Class at any time without penalty by vote of a majority of the Independent Trustees or by vote of the majority of the outstanding voting securities of such Class.

If the 12b-1 Plan is terminated for the Funds' Class A shares or Class C shares in accordance with its terms, the obligation of the Fund to make payments pursuant to the 12b-1 Plan with respect to such Class will cease and the Fund will not be required to make any payments past the termination date. Thus, there will be no legal obligation for the Fund to make any payments other than for fees already payable under the 12b-1 Plan, if the 12b-1 Plan is terminated in accordance with its terms for any reason.

The following payments were made by the Predecessor Funds' previous distributor under the Rule 12b-1 plan with respect to the Predecessor Funds during the Predecessor Funds' last fiscal year.

AXS Fund	AXS Alternative Value Fund	AXS Market Neutral Fund
Total Dollars Allocated		
Advertising/Marketing	\$0	\$0
Printing/Postage	\$0	\$0
Payment to distributor	\$0	\$0
Payment to dealers	\$2,289	\$32,727
Compensation to sales personnel	\$0	\$0
Interest, carrying, or other financing charges	\$0	\$0
Other	\$0	\$0
Total	\$2,289	\$32,727

Marketing and Support Payments

The Advisor, out of its own resources and without additional cost to the Funds or its shareholders, may provide cash payments or other compensation to certain financial intermediaries who sell shares of the Fund. These payments are in addition to other fees described in the Funds' Prospectus and this SAI, and are generally provided for shareholder services or marketing support. Payments for marketing support are typically for inclusion of a Fund on sales lists, including electronic sales platforms. Investors may wish to take these payments into account when considering and evaluating recommendations to purchase shares of the Funds.

PORTFOLIO TRANSACTIONS AND BROKERAGE

Pursuant to the Advisory Agreement or Sub-Advisory Agreement, the Advisor or Sub-Advisor determines which securities are to be purchased and sold by each Fund and which broker-dealers are eligible to execute each Fund's portfolio transactions. The purchases and sales of securities in the over-the-counter market will generally be executed by using a broker for the transaction.

Purchases of portfolio securities for a Fund also may be made directly from issuers or from underwriters. Where possible, purchase and sale transactions will be effected through dealers (including banks) that specialize in the types of securities which a Fund will be holding unless better executions are available elsewhere. Dealers and underwriters usually act as principals for their own accounts. Purchases from underwriters will include a concession paid by the issuer to the

underwriter and purchases from dealers will include the spread between the bid and the asked price. If the execution and price offered by more than one dealer or underwriter are comparable, the order may be allocated to a dealer or underwriter that has provided research or other services as discussed below.

In placing portfolio transactions, the Advisor or Sub-Advisor will use reasonable efforts to choose broker-dealers capable of providing the services necessary to obtain the most favorable price and execution available. The full range and quality of services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the broker-dealer involved, the risk in positioning the block of securities, and other factors. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers which furnish or supply research and statistical information to the Advisor or Sub-Advisor that they may lawfully and appropriately use in their investment advisory capacities, as well as provide other services in addition to execution services. The Advisor or Sub-Advisor considers such information, which is in addition to and not in lieu of the services required to be performed by it under its Advisory Agreement or Sub-Advisory Agreement with the Funds, to be useful in varying degrees, but of indeterminable value.

While it is each Fund's general policy to seek to obtain the most favorable price and execution available in selecting a broker-dealer to execute portfolio transactions for the Fund, weight is also given to the ability of a broker-dealer to furnish brokerage and research services as defined in Section 28(e) of the Securities Exchange Act of 1934, as amended, to the Fund or to the Advisor or Sub-Advisor, even if the specific services are not directly useful to the Funds and may be useful to the Advisor or Sub-Advisor in advising other clients. In negotiating commissions with a broker or evaluating the spread to be paid to a dealer, a Fund may therefore pay a higher commission or spread than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Advisor or Sub-Advisor to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-dealer. The standard of reasonableness is to be measured in light of the Advisor's or Sub-Advisor's overall responsibilities to each Fund.

Investment decisions for each Fund are made independently from those of other client accounts that may be managed or advised by the Advisor or Sub-Advisor. Nevertheless, it is possible that at times, identical securities will be acceptable for both a Fund and one or more of such client accounts. In such event, the position of the Fund and such client accounts in the same issuer may vary and the holding period may likewise vary. However, to the extent any of these client accounts seek to acquire the same security as a Fund at the same time, the Fund may not be able to acquire as large a position in such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, a Fund may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time as the Advisor's or Sub-Advisor's other client accounts.

The Funds do not effect securities transactions through brokers in accordance with any formula, nor do they effect securities transactions through brokers for selling shares of the Funds. However, broker-dealers who execute brokerage transactions may effect purchase of shares of the Funds for their customers. The brokers may also supply the Fund with research, statistical and other services.

The Predecessor Funds paid the following brokerage commissions for the periods indicated:

	Brokerage Commissions
AXS Alternative Value Fund	
For the Fiscal Year Ended June 30, 2020	\$7,462
For the Fiscal Year Ended June 30, 2019	\$2,672
For the Fiscal Year Ended June 30, 2018	\$3,578
AXS Market Neutral Fund	
For the Fiscal Year Ended June 30, 2020	\$65,904
For the Fiscal Year Ended June 30, 2019	\$60,554
For the Fiscal Period October 1, 2017 – June 30, 2018*	\$28,321

* On April 25, 2018, the fiscal year end for the Predecessor Fund changed to June 30th.

Holdings of Securities of the Funds' Regular Brokers and Dealers

From time to time, a Fund may acquire and hold securities issued by its “regular brokers or dealers” or the parents of those brokers or dealers. “Regular brokers or dealers” (as such term is defined in the 1940 Act) of a Fund are the ten brokers or dealers that, during the most recent fiscal year, (i) received the greatest dollar amounts of brokerage commissions from the Fund’s portfolio transactions, (ii) engaged as principal in the largest dollar amounts of the portfolio transactions of the Fund, or (iii) sold the largest dollar amounts of the Fund’s shares. The Predecessor Funds did not hold any securities of any “regular brokers or dealers” during the fiscal year ended June 30, 2020.

PORTFOLIO TURNOVER

Although the Funds generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Advisor, as applicable, investment considerations warrant such action. Portfolio turnover rate is calculated by dividing (1) the lesser of purchases or sales of portfolio securities for the fiscal year by (2) the monthly average of the value of portfolio securities owned during the fiscal year. A 100% turnover rate would occur if all the securities in a Fund’s portfolio, with the exception of securities whose maturities at the time of acquisition were one year or less, were sold and either repurchased or replaced within one year. A high rate of portfolio turnover (100% or more) generally leads to higher transaction costs and may result in a greater number of taxable transactions. To the extent net short-term capital gains are realized, any distributions resulting from such gains will generally be taxed at ordinary income tax rates for federal income tax purposes.

The Predecessor Funds’ portfolio turnover rates were as follows for the periods indicated.

	Fiscal Year Ended	
	June 30, 2020	June 30, 2019
AXS Alternative Value Fund	74%	64%
AXS Market Neutral Fund	137%	159%

PROXY VOTING POLICY

The Board has adopted Proxy Voting Policies and Procedures (the “Trust Policies”) on behalf of the Trust, which delegates the responsibility for voting each Fund’s proxies to the Sub-Advisor, as applicable, subject to the Board’s continuing oversight. The Trust Policies require that the Sub-Advisor vote proxies received in a manner consistent with the best interests of the Fund. The Trust Policies also require the Sub-Advisor to present to the Board, at least annually, the Sub-Advisor’s Proxy Voting Policies and Procedures (“Sub-Advisor’s Policies”) and a record of each proxy voted by the Sub-Advisor on behalf of each Fund, including a report on the resolution of all proxies identified by the Sub-Advisor as involving a conflict of interest. See Appendix B for the Sub-Advisor’s Proxy Policies and Procedures and the Trust Policies. The Trust Policies and Sub-Advisor’s Policies are intended to serve as guidelines and to further the

economic value of each security held by the Funds. The Trust's CCO will review the Trust Policies and the Sub-Advisor Policies annually. Each proxy will be considered individually, taking into account the relevant circumstances at the time of each vote.

If a proxy proposal raises a material conflict between the Sub-Advisor's interests and a Fund's interests, the Sub-Advisor will resolve the conflict by following the policy guidelines or the recommendation of an independent third party.

Each Fund is required to annually file Form N-PX, which lists the Fund's complete proxy voting record for the 12-month period ended June 30 of each year. Once filed, the Fund's proxy voting record will be available without charge, upon request, by calling toll-free 1-833-AXS-ALTS (1-833-297-2587) and on the SEC's web site at www.sec.gov.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). In order to ensure compliance with this law, the Program provides for the development and implementation of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program.

Procedures to implement the Program include, but are not limited to, determining that the Funds' Distributor and Transfer Agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity, checking shareholder names against designated government lists, including Office of Foreign Assets Control ("OFAC"), and a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

PORTFOLIO HOLDINGS INFORMATION

The Funds have adopted policies and procedures regarding disclosure of portfolio holdings information (the "Disclosure Policy"). The Board of Trustees determined that the adoption of the Disclosure Policy, including the disclosure permitted therein, was in the best interests of the Funds. The Disclosure Policy applies to the Funds, Advisor, Sub-Advisor and other internal parties involved in the administration, operation or custody of the Funds, including, but not limited to UMBFS, MFAC, the Board of Trustees, counsel to the Trust, Morgan Lewis, and the Funds' independent registered public accounting firm, Tait Weller, and ICE Data Services which assists each Fund with classifying its holdings pursuant to its liquidity risk management program (collectively, the "Service Providers"). Pursuant to the Disclosure Policy, non-public information concerning a Fund's portfolio holdings may be disclosed to its Service Providers only if such disclosure is consistent with the antifraud provisions of the federal securities laws and the fiduciary duties owed by the Fund and the Advisor and the Sub-Advisor to the Fund's shareholders. The Funds and their Service Providers may not receive compensation or any other consideration (which includes any agreement to maintain assets in a Fund or in other investment companies or accounts managed by the Advisor, Sub-Advisor or any affiliated persons of the Advisor or the Sub-Advisor) in connection with the disclosure of portfolio holdings information of the Funds. The Funds' Policy is implemented and overseen by the CCO of the Trust, subject to the oversight of the Board of Trustees. Periodic reports regarding these procedures will be provided to the Trust's Board.

Portfolio holdings information will be deemed public when it has been (1) posted to the Funds' public website (www.axsinvestments.com) or (2) disclosed in periodic regulatory filings on the SEC's website (www.sec.gov). Management of the Funds may make publicly available its portfolio holdings on the Fund's public website no earlier than five days after the date of such information (e.g., information as of January 31 may be made available no earlier than February 5).

Non-Public Portfolio Holdings Information Policy. All portfolio holdings information that has not been disseminated in a manner making it available to investors generally as described above is considered non-public portfolio holdings information for the purposes of the Disclosure Policy. Pursuant to the Disclosure Policy, the Funds or their Service Providers may disclose non-public portfolio holdings information to certain third parties who fall within pre-authorized categories on a daily basis, with no lag time unless otherwise specified below. These third parties include: (i)

the Funds' Service Providers and others who need access to such information in the performance of their contractual or other duties and responsibilities to the Funds (e.g., custodians, accountants, the Advisor, Sub-Advisor, administrators, attorneys, officers and Trustees) and who are subject to duties of confidentiality imposed by law or contract, (ii) brokers who execute trades for the Funds, (iii) evaluation service providers (as described below) and (iv) shareholders receiving in-kind redemptions (as described below).

Evaluation Service Providers. These third parties include mutual fund evaluation services, such as Morningstar, Inc. and Lipper, Inc. if the Funds have a legitimate business purpose for disclosing the information, provided that the third party expressly agrees to maintain the non-public portfolio holdings information in confidence and not to trade portfolio securities based on the non-public portfolio holdings information. Subject to the terms and conditions of any agreement between the Funds or their authorized service providers and the third party, if these conditions for disclosure are satisfied, there shall be no restriction on the frequency with which the Funds' non-public portfolio holdings information is released, and no lag period shall apply. In addition, persons who owe a duty of trust or confidence to the Funds or their Service Providers (such as legal counsel) may receive non-public portfolio holdings information without entering into a non-disclosure agreement.

Shareholder In-Kind Distributions. A Fund may, in certain circumstances, pay redemption proceeds to a shareholder by an in-kind distribution of portfolio securities (instead of cash). In such circumstances, pursuant to the Disclosure Policy, Fund shareholders may receive a complete listing of the portfolio holdings of the Fund up to seven (7) calendar days prior to making the redemption request provided that they represent orally or in writing that they agree to maintain the confidentiality of the portfolio holdings information and not to trade portfolio securities based on the non-public holdings information.

Other Entities. Pursuant to the Disclosure Policy, the Funds, the Advisor or the Sub-Advisor may disclose non-public portfolio holdings information to a third party who does not fall within the pre-approved categories, and who are not executing broker-dealers; however, prior to the receipt of any non-public portfolio holdings information by such third party, the recipient must have entered into a non-disclosure agreement and the disclosure arrangement must have been approved by the CCO of the Trust. The CCO will report to the Board of Trustees on a quarterly basis regarding any recipients of non-public portfolio holdings information approved pursuant to this paragraph. There are no other ongoing arrangements as of the date of this SAI.

The Advisor, Sub-Advisor and their affiliates may provide investment advice to clients other than the Funds that have investment objectives that may be substantially similar to those of the Funds. These clients also may have portfolios consisting of holdings substantially similar to those of the Funds and generally have access to current portfolio holdings information for their accounts. These clients do not owe the Advisor, Sub-Advisor or the Funds a duty of confidentiality with respect to disclosure of their portfolio holdings.

Current Arrangements Regarding Disclosure of Portfolio Holdings As of the date of this SAI, the Trust or the Funds have on-going business arrangements with the following entities which involve making portfolio holdings information available to such entities as an incidental part of the services they provide to the Trust: (i) the Advisor, the Sub-Advisor, MFAC and UMBFS (the Co-Administrators) and UMB Bank, N.A. (the Custodian), pursuant to investment management, administration and custody agreements, respectively, under which the Funds' portfolio holdings information is provided daily on a real-time basis (i.e., with no time lag); (ii) Tait Weller (independent registered public accounting firm) Morgan Lewis (attorneys) to which the Funds provide portfolio holdings information on a regular basis with varying lag times after the date of the information, under which the Fund's portfolio holdings information is provided daily with no time lag; (iii) Practical Computer Application to which MFAC provides the Trust's portfolio holdings information on a daily basis for programming and database hosting services in connection with MFAC's administrative services to the Trust;; (iv) Donnelley Financial Solutions to whom the Trust provides portfolio holdings information on a monthly basis in connection with the filings of Form N-PORT; (v) ICE Data Services, which assists each Fund with classifying its holdings pursuant to its liquidity risk management program, to which the Trust provides portfolio holdings information on a monthly basis with a one- to ten-day time lag; and (vi) Morningstar, Inc., Lipper Inc., Refinitiv, Thomson Financial, Vickers Stock Research Corporation, and Bloomberg L.P., to which the Funds' portfolio holdings information is provided quarterly after the end of the previous fiscal quarter, with a 60-day time lag and no earlier than the date such information is filed on the SEC's EDGAR system on Form N-PORT (for

the first and third fiscal quarters) or the Annual or Semi-Annual Report is mailed to shareholders (for the second and fourth fiscal quarters), as applicable; and (vii) Gainskeeper, Inc. and its affiliates, pursuant to an administrative agency agreement under which the Trust provides Fund's portfolio tax lot holdings and transaction level data information on a daily basis.

DETERMINATION OF NET ASSET VALUE

The NAVs of each Fund's shares will fluctuate and are determined as of 4:00 p.m. Eastern Time, the normal close of regular trading on the New York Stock Exchange (the "NYSE") on each day the NYSE is open for trading. The NAVs may be calculated earlier if permitted by the SEC. The NYSE annually announces the days on which it will not be open for trading. The most recent announcement indicates that the NYSE will not be open for the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. However, the NYSE may close on days not included in that announcement.

The NAV of each class of each Fund is computed by dividing (a) the difference between the value of the Fund's securities, cash and other assets and the amount of the Fund's expenses and liabilities attributable to the class by (b) the number of shares outstanding in that class (assets – liabilities / # of shares = NAV). Each NAV takes into account all of the expenses and fees of that class of a Fund, including management fees and administration fees, which are accrued daily.

$$\frac{\text{Net Assets}}{\text{Shares Outstanding}} = \text{NAV}$$

Generally, a Fund's investments are valued at market value or, in the absence of a market value, at fair value as determined in good faith by the Advisor, Sub-Advisor and the Trust's Valuation Committee pursuant to procedures approved by or under the direction of the Board. Pursuant to those procedures, the Board considers, among other things: 1) the last sale price on the securities exchange, if any, on which a security is primarily traded; 2) the mean between the bid and ask prices; 3) price quotations from an approved pricing service (which use information provided by market makers or estimates of market value based on similar securities), and 4) other factors as necessary to determine a fair value under certain circumstances.

A Fund's securities which are traded on securities exchanges are valued at the last sale price on the exchange on which such securities are traded, as of the close of business on the day the securities are being valued or, lacking any reported sales, at the mean between the last available bid and ask prices.

Pricing services generally value debt securities assuming orderly transactions of an institutional round lot size, but such securities may be held or transactions may be conducted in such securities in smaller, odd lot sizes. Odd lots often trade at lower prices than institutional round lots.

Securities that are traded on more than one exchange are valued on the exchange determined by the Sub-Advisor to be the primary market. Securities primarily traded in the National Association of Securities Dealers Automated Quotation ("NASDAQ"), National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price ("NOCP"). If the NOCP is not available, such securities shall be valued at the last sale price on the day of valuation, or if there has not been any sale on such day, at the mean between the bid and ask prices. Over-the-counter ("OTC") securities which are not traded in the NASDAQ National Market System shall be valued at the most recent trade price.

Stocks that are "thinly traded" or events occurring when a foreign market is closed but the NYSE is open (for example, the value of a security held by a Fund has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded) may create a situation in which a market quote would not be readily available. When a market quote is not readily available, the security's value is based on "fair value" as determined by procedures adopted by the Board. The Board will periodically review the reliability of the Funds' fair value methodology. A Fund may hold portfolio securities such as those traded on foreign securities exchanges that trade on

weekends or other days when the Funds' shares are not priced. Therefore, the value of the Fund's shares may change on days when shareholders will not be able to purchase or redeem shares.

Short-term debt obligations with remaining maturities in excess of 60 days are valued at current market prices, as discussed above. Short-term securities with 60 days or less remaining to maturity are, unless conditions indicate otherwise, are amortized to maturity based on their cost to a Fund if acquired within 60 days of maturity or, if already held by the Fund on the 60th day, based on the value determined on the 61st day.

All other assets of the Funds are valued in such manner as the Board in good faith deems appropriate to reflect as their fair value.

PURCHASE AND REDEMPTION OF FUND SHARES

Detailed information on the purchase and redemption of shares is included in the Funds' Prospectus. Shares of each Fund are sold at the next offering price calculated after receipt of an order for purchase. In order to purchase shares of a Fund, you must invest the initial minimum investment for the relevant class of shares. However, each Fund reserves the right, in its sole discretion, to waive the minimum initial investment amount for certain investors, or to waive or reduce the minimum initial investment for 401(k) plans or other tax-deferred retirement plans. You may purchase shares on any day that the NYSE is open for business by placing orders with the Fund.

Each Fund reserves the right to refuse any purchase requests, particularly those that would not be in the best interests of the Fund or its shareholders and could adversely affect the Fund or its operations. This includes those from any individual or group who, in a Fund's view, is likely to engage in or has a history of excessive trading (usually defined as more than four round-trip transactions out of a Fund within a calendar year). Furthermore, the Trust may suspend the right to redeem its shares or postpone the date of payment upon redemption for more than seven calendar days (i) for any period during which the NYSE is closed (other than customary weekend or holiday closings) or trading on the NYSE is restricted; (ii) for any period during which an emergency exists affecting the sale by a Fund of securities or making such sale or the fair determination of the value of a Fund's net assets not reasonably practicable; or (iii) for such other periods as the SEC may permit for the protection of a Fund's shareholders. In addition, if shares are purchased using a check and a redemption is requested before the check has cleared, a Fund may postpone payment of your redemption proceeds up to 15 days while the Fund waits for the check to clear.

Redemptions In-Kind

The Trust has filed an election under SEC Rule 18f-1 committing to pay in cash all redemptions by a shareholder of record up to amounts specified by the rule (the lesser of (i) \$250,000 or (ii) 1% of each Fund's assets). Each Fund has reserved the right to pay the redemption price of its shares in excess of the amounts specified by the rule, either totally or partially, by a distribution in-kind of portfolio securities (instead of cash). The securities so distributed would be valued at the same amounts as those assigned to them in calculating the NAV for the Fund shares being redeemed. If a shareholder receives a distribution in-kind, the shareholder could incur brokerage or other charges in converting the securities to cash.

No Fund intends to hold any significant percentage of its portfolio in illiquid securities, although each Fund, like virtually all mutual funds, may from time to time hold a small percentage of securities that are illiquid. In the unlikely event a Fund were to elect to make an in-kind redemption, each Fund expects that it would follow the normal protocol of making such distribution by way of a pro rata distribution based on its entire portfolio. If a Fund held illiquid securities, such distribution may contain a pro rata portion of such illiquid securities or the Fund may determine, based on a materiality assessment, not to include illiquid securities in the in-kind redemption. No Fund anticipates that it would ever selectively distribute a greater than pro rata portion of any illiquid securities to satisfy a redemption request. If such securities are included in the distribution, shareholders may not be able to liquidate such securities and may be required to hold such securities indefinitely. Shareholders' ability to liquidate such securities distributed in-kind may be restricted by resale limitations or substantial restrictions on transfer imposed by the issuers of the securities or by law. Shareholders may only be able to liquidate such securities distributed in-kind at a substantial discount from their value, and there may be higher brokerage costs associated with any subsequent disposition of these securities by the recipient.

FEDERAL INCOME TAX MATTERS

The following is a summary of certain material U.S. federal (and, where noted, state and local) income tax considerations affecting each Fund and its shareholders. The discussion is very general. Current and prospective shareholders are therefore urged to consult their own tax advisors with respect to the specific federal, state, local and foreign tax consequences of investing in a Fund. The summary is based on the laws in effect on the date of this SAI and existing judicial and administrative interpretations thereof, all of which are subject to change, possibly with retroactive effect.

Each Fund is treated as a separate entity from other series of the Trust for federal income tax purposes. Each Fund has elected to be, and intends to qualify each year for treatment as, a “regulated investment company” under Subchapter M of the Code by complying with all applicable requirements of the Code, including, among other things, requirements as to the sources of the Fund’s income, diversification of the Fund’s assets and timing of Fund distributions. To so qualify, a Fund must, among other things: (a) derive at least 90% of its gross income in each taxable year from dividends, interest, payments with respect to certain securities loans, and gains from the sale or other disposition of stock or securities or foreign currencies, or other income derived with respect to its business of investing in such stock, securities or currencies, and net income derived from interests in “qualified publicly traded partnerships” (i.e., partnerships that are traded on an established securities market or tradable on a secondary market, other than partnerships that derive 90% of their income from interest, dividends, capital gains, and other traditionally permitted mutual fund income) (collectively, “qualifying income”); (b) diversify its holdings so that, at the end of each quarter of the Fund’s taxable year, (i) at least 50% of the market value of the Fund’s assets is represented by cash, securities of other regulated investment companies, U.S. government securities and other securities, with such other securities limited, in respect of any one issuer, to an amount not greater than 5% of the Fund’s assets and not greater than 10% of the outstanding voting securities of such issuer and (ii) not more than 25% of the value of its assets is invested, including through corporations in which a Fund owns a 20% or more voting stock interest, in the securities (other than U.S. government securities or securities of other regulated investment companies) of any one issuer, in the securities (other than the securities of other regulated investment companies) of any two or more issuers that a Fund controls and that are determined to be engaged in the same or similar trades or businesses or related trades or businesses, or in the securities of one or more “qualified publicly traded partnerships”; and (c) distribute an amount equal to the sum of at least 90% of its investment company taxable income (computed without regard to the dividends-paid deduction) and 90% of its net tax-exempt income, if any, for the tax year (including, for purposes of satisfying this distribution requirement, certain distributions made by a Fund after the close of its taxable year that are treated as made during such taxable year).

As a regulated investment company, a Fund will not be subject to U.S. federal income tax on the portion of its taxable investment income and capital gains that it distributes to its shareholders provided that it satisfies a minimum distribution requirement. In order to also avoid liability for a non-deductible federal excise tax, a Fund must distribute (or be deemed to have distributed) by December 31 of each calendar year at least the sum of (i) 98% of its ordinary income for such year, (ii) 98.2% of the excess of its realized capital gains over its realized capital losses for the 12-month period generally ending on October 31 during such year and (iii) any amounts from the prior calendar year that were not distributed and on which the Fund paid no federal income tax. A Fund will be subject to income tax at the regular corporate tax rate on any taxable income or gains that it does not distribute to its shareholders. Each Fund’s policy is to distribute to its shareholders all investment company taxable income (determined without regard to the deduction for dividends paid) and any net capital gain (the excess of net long-term capital gain over net short-term capital loss) for each fiscal year in a manner that complies with the distribution requirements of the Code, so that the Fund will not be subject to any federal income or excise taxes.

If, for any taxable year, a Fund were to fail to qualify as a regulated investment company or were to fail to meet certain minimum distribution requirements under the Code, it would be taxed in the same manner as an ordinary corporation and distributions to its shareholders would not be deductible by the Fund in computing its taxable income. In addition, in the event of a failure to qualify, a Fund’s distributions, to the extent derived from the Fund’s current or accumulated earnings and profits, including any distributions of net capital gain, would be taxable to shareholders as ordinary dividend income for federal income tax purposes. However, such dividends would be eligible, subject to any generally applicable limitations, (i) to be treated as qualified dividend income in the case of shareholders taxed as individuals and (ii) for the dividends received deduction in the case of corporate shareholders. Moreover, if a Fund were to fail to qualify as a regulated investment company in any year, it would be required to pay out its earnings and profits accumulated in that year in order to qualify again as a regulated investment company. Under certain circumstances, a Fund may be able to

cure a failure to qualify as a regulated investment company, but in order to do so the Fund might incur significant Fund-level taxes and might be forced to dispose of certain assets. If a Fund failed to qualify as a regulated investment company for a period greater than two taxable years, the Fund would generally be required to recognize any net built-in gains with respect to certain of its assets upon a disposition of such assets within five years of qualifying as a regulated investment company in a subsequent year.

Shareholders generally will be subject to federal income taxes on distributions made by a Fund whether paid in cash or additional shares. Distributions of net investment income (including interest, dividend income and net short-term capital gain in excess of any net long-term capital loss, less certain expenses), other than qualified dividend income, will be taxable to shareholders as ordinary income. Distributions of qualified dividend income, generally will be taxed to non-corporate shareholders at the federal income tax rates applicable to net capital gain, provided the Fund reports the amount distributed as qualified dividend income.

In general, dividends may be reported by a Fund as qualified dividend income if they are attributable to qualified dividend income received by the Fund. Qualified dividend income generally means dividend income received from a Fund's investments in common and preferred stock of U.S. companies and stock of certain qualified foreign corporations, provided that certain holding period and other requirements are met by both the Fund and its shareholders. If 95% or more of a Fund's gross income (calculated without taking into account net capital gain derived from sales or other dispositions of stock or securities) consists of qualified dividend income, the Fund may report all distributions of such income as qualified dividend income.

A foreign corporation is treated as a qualified foreign corporation for this purpose if it is incorporated in a possession of the United States or it is eligible for the benefits of certain income tax treaties with the United States and meets certain additional requirements. Certain foreign corporations that are not otherwise qualified foreign corporations will be treated as qualified foreign corporations with respect to dividends paid by them if the stock with respect to which the dividends are paid is readily tradable on an established securities market in the United States. Passive foreign investment companies are not qualified foreign corporations for this purpose. Dividends received by a Fund from REITs generally do not qualify for treatment as qualified dividend income.

Dividends paid by a Fund may qualify in part for the dividends-received deduction available to corporate shareholders, provided the Fund reports the amount distributed as a qualifying dividend and certain holding period and other requirements under the Code are satisfied. The reported amount, however, cannot exceed the aggregate amount of qualifying dividends received by the Fund for its taxable year. Eligibility for qualified dividend income treatment and the dividends-received deduction may be reduced or eliminated if, among other things, (i) the shareholder is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property or (ii) certain holding period requirements are not satisfied at both the Fund and shareholder levels. In addition, qualified dividend income treatment is not available if a shareholder elects to have the dividend income treated as investment income for purposes of the limitation on deductibility of investment interest.

If a Fund receives a dividend (other than a capital gain dividend) in respect of any share of REIT stock with a tax holding period of at least 46 days during the 91-day period beginning on the date that is 45 days before the date on which the stock becomes ex-dividend as to that dividend, then Fund dividends attributable to that REIT dividend income (as reduced by certain fund expenses) may be reported by the Fund as eligible for the 20% deduction for "qualified REIT dividends" generally available to noncorporate shareholders under the Code. In order to qualify for this deduction, noncorporate shareholders must meet minimum holding period requirements with respect to their Fund shares.

Distributions of net capital gain, if any, that a Fund reports as capital gain dividends will be taxable to non-corporate shareholders as long-term capital gain without regard to how long a shareholder has held shares of the Fund. A Fund may retain certain amounts of capital gains and designate them as undistributed net capital gain in a notice to its shareholders, who (i) will be required to include in income for U.S. federal income tax purposes, as long-term capital gain, their proportionate shares of the undistributed amounts so designated, (ii) will be entitled to credit their proportionate shares of the income tax paid by the Fund on those undistributed amounts against their federal income tax liabilities and to claim refunds to the extent such credits exceed their liabilities and (iii) will be entitled to increase

their federal income tax basis in their shares by an amount equal to the excess of the amounts of undistributed net capital gain included in their respective income over their respective income tax credits.

For U.S. federal income tax purposes, a Fund is permitted to carry forward indefinitely a net capital loss from any taxable year to offset its capital gains, if any, in years following the year of the loss. To the extent subsequent capital gains are offset by such losses, they will not result in U.S. federal income tax liability to a Fund and may not be distributed as capital gains to shareholders. Generally, a Fund may not carry forward any losses other than net capital losses. Under certain circumstances, a Fund may elect to treat certain losses as though they were incurred on the first day of the taxable year immediately following the taxable year in which they were actually incurred.

Distributions in excess of earnings and profits will, as to each shareholder, be treated as a tax-free return of capital to the extent of the shareholder's basis in his or her Fund shares. A distribution treated as a return of capital will reduce the shareholder's basis in his or her shares, which will result in an increase in the amount of gain (or a decrease in the amount of loss) that will be recognized by the shareholder for tax purposes on a later sale of such shares. After the shareholder's basis is reduced to zero, any distributions in excess of earnings and profits will be treated as a capital gain, assuming the shareholder holds his or her shares as capital assets.

A 3.8% Medicare contribution tax generally applies to all or a portion of the net investment income of a shareholder who is an individual and not a nonresident alien for federal income tax purposes and who has adjusted gross income (subject to certain adjustments) that exceeds a threshold amount (\$250,000 if married filing jointly or if considered a "surviving spouse" for federal income tax purposes, \$125,000 if married filing separately, and \$200,000 in other cases). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts. For these purposes, interest, dividends and certain capital gains (among other categories of income) are generally taken into account in computing a shareholder's net investment income.

Certain tax-exempt educational institutions are subject to a 1.4% tax on net investment income. For these purposes, certain dividends and capital gain distributions, and certain gains from the disposition of Fund shares (among other categories of income), are generally taken into account in computing a shareholder's net investment income.

Distributions are generally taxable when received. However, distributions declared in October, November or December to shareholders of record on a date in such a month and paid the following January are taxable for federal income tax purposes as if received on December 31 of the calendar year in which declared. Distributions are includable in alternative minimum taxable income in computing a shareholder's liability for the federal alternative minimum tax, which is imposed on individual taxpayers under the Code. In addition, certain distributions made after the close of a taxable year of a Fund may be "spilled back" and treated for certain purposes as paid by the Fund during such taxable year. In such case, shareholders generally will be treated as having received such dividends in the taxable year in which the distributions were actually made. For purposes of calculating the amount of a regulated investment company's undistributed income and gain subject to the 4% excise tax described above, such "spilled back" dividends are treated as paid by the regulated investment company when they are actually paid.

A redemption of Fund shares may result in recognition of a taxable gain or loss. The gain or loss will generally be treated as a long-term capital gain or loss if the shares are held for more than one year, and as a short-term capital gain or loss if the shares are held for one year or less. Any loss realized upon a redemption or exchange of shares held for six months or less will be treated as a long-term capital loss to the extent of any amounts treated as distributions of long-term capital gains during such six-month period. Any loss realized upon a redemption may be disallowed under certain wash sale rules to the extent shares of the same Fund or substantially identical stock or securities are purchased (through reinvestment of distributions or otherwise) within 30 days before or after the redemption.

If a shareholder recognizes a loss with respect to a Fund's shares of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder (or certain greater amounts over a combination of years), the shareholder must file with the Internal Revenue Service (the "IRS") a disclosure statement on IRS Form 8886. Direct shareholders of portfolio securities are in many cases exempted from this reporting requirement, but under current guidance, shareholders of a regulated investment company are not exempted. The fact that a loss is so reportable does not affect the legal determination of whether the taxpayer's treatment of the loss is proper.

If a Fund invests in certain pay-in-kind securities, zero coupon securities, deferred interest securities or, in general, any other securities with original issue discount (or with market discount if the Fund elects to include market discount in income currently), the Fund must accrue income on such investments for each taxable year, which generally will be prior to the receipt of the corresponding cash payments. However, the Fund must distribute, at least annually, all or substantially all of its investment company taxable income (determined without regard to the deduction for dividends paid), including such accrued income to shareholders to avoid federal income and excise taxes. Therefore, the Fund may have to sell portfolio securities (potentially under disadvantageous circumstances) to generate cash, or may have to undertake leverage by borrowing cash, to satisfy these distribution requirements. Dispositions of portfolio securities may result in additional gains and additional distribution requirements.

If a Fund invests in a market discount bond, it will be required to treat any gain recognized on the disposition of such market discount bond as ordinary income (instead of capital gain) to the extent of the accrued market discount, unless the Fund elects to include the market discount in income as it accrues as discussed above. A market discount bond is a security acquired in the secondary market at a price below its redemption value (or its adjusted issue price if it is also an original issue discount bond).

The Funds may be subject to withholding and other taxes imposed by foreign countries, including taxes on interest, dividends and capital gains with respect to its investments in those countries, which would, if imposed, reduce the yield on or return from those investments. Tax treaties between certain countries and the United States may reduce or eliminate such taxes in some cases. So long as the Fund qualifies for treatment as a regulated investment company and incurs "qualified foreign taxes," if more than 50% of its net assets at the close of its taxable year consist of stock or securities of foreign corporations, which for this purpose may include obligations of foreign governmental issuers, the Fund may elect to "pass through" to its shareholders the amount of such foreign taxes paid. If this election is made, information with respect to the amount of the foreign income taxes that are allocated to the Fund's shareholders will be provided to them and any shareholder subject to tax on dividends will be required (i) to include in ordinary gross income (in addition to the amount of the taxable dividends actually received) his/her proportionate share of the foreign taxes paid that are attributable to such dividends; and (ii) either to deduct his/her proportionate share of such foreign taxes in computing his/her taxable income or to claim that amount as a foreign tax credit (subject to applicable limitations) against U.S. income taxes.

Shareholders who do not itemize deductions for U.S. federal income tax purposes will not be able to deduct their pro rata portion of qualified foreign taxes paid by the Fund, although such shareholders will be required to include their shares of such taxes in gross income if the Fund makes the election described above. Qualified foreign taxes generally include taxes that would be treated as income taxes under U.S. tax regulations but do not include most other taxes, such as stamp taxes, securities transaction taxes, and similar taxes. No deduction for such taxes will be permitted to individuals in computing their alternative minimum tax liability.

If a Fund makes the election to pass through qualified foreign taxes and a shareholder chooses to take a credit for the foreign taxes deemed paid by such shareholder, the amount of the credit that may be claimed in any year may not exceed the same proportion of the U.S. tax against which such credit is taken that the shareholder's taxable income from foreign sources (but not in excess of the shareholder's entire taxable income) bears to his entire taxable income. For this purpose, long-term and short-term capital gains a Fund realizes and distributes to shareholders will generally not be treated as income from foreign sources in their hands, nor will distributions of certain foreign currency gains subject to Section 988 of the Code or of any other income realized by the Fund that is deemed, under the Code, to be U.S. source income in the hands of the Fund. This foreign tax credit limitation may also be applied separately to certain specific categories of foreign-source income and the related foreign taxes. As a result of these rules, which may have different effects depending upon each shareholder's particular tax situation, certain shareholders may not be able to claim a credit for the full amount of their proportionate share of the foreign taxes paid by the Fund. Shareholders who are not liable for U.S. federal income taxes, including tax-exempt shareholders, will ordinarily not benefit from this election. If the Fund does make the election, it will provide required tax information to shareholders. The Fund generally may deduct any foreign taxes that are not passed through to its shareholders in computing its income available for distribution to shareholders to satisfy applicable tax distribution requirements. Under certain circumstances, if the Fund receives a refund of foreign taxes paid in respect of a prior year, the value of the Fund's shares could be affected, or any foreign tax credits or deductions passed through to shareholders in respect of the Fund's foreign taxes for the current year could be reduced.

Foreign exchange gains or losses realized by a Fund in connection with certain transactions involving foreign currency-denominated debt securities, foreign currencies, or payables or receivables denominated in a foreign currency are subject to Section 988 of the Code, which generally causes such gains or losses to be treated as ordinary gain or loss and may affect the amount, timing and character of distributions to shareholders.

A Fund may purchase the securities of certain foreign companies treated as passive foreign investment companies for federal income tax purposes (“PFIC”). PFICs may be the only or primary means by which the Fund may invest in some countries. If a Fund invests in equity securities of PFICs, it may be subject to U.S. federal income tax on a portion of any "excess distribution" or gain from the disposition of such securities even if such income is distributed as a taxable dividend to shareholders. Additional charges in the nature of interest may be imposed on the Fund with respect to deferred taxes arising from such distributions or gains. Capital gains on the sale of such holdings will be deemed to be ordinary income regardless of how long such PFICs are held. A “qualified electing fund” election or a “mark to market” election may generally be available that would ameliorate these adverse tax consequences, but such elections could require a Fund to recognize taxable income or gain (subject to the distribution requirements applicable to regulated investment companies, as described above) without the concurrent receipt of cash. In order to satisfy the distribution requirements and avoid a tax on a Fund, the Fund may be required to liquidate portfolio securities that it might otherwise have continued to hold, potentially resulting in additional taxable gain or loss to the Fund. In order for a Fund to make a qualified electing fund election with respect to a PFIC, the PFIC would have to agree to provide certain tax information to the Fund on an annual basis, which it might not agree to do. A Fund may limit and/or manage its holdings in PFICs to limit its tax liability or maximize its return from these investments. The Fund may limit and/or manage its holdings in PFICs to limit its tax liability or maximize its return from these investments.

If a sufficient percentage of the interests in a foreign issuer are held by the Fund, independently or together with certain other U.S. persons, that issuer may be treated as a “controlled foreign corporation” (a “CFC”) with respect to each Fund, in which case a Fund will be required to take into account each year, as ordinary income, its share of certain portions of that issuer’s income, whether or not such amounts are distributed. A Fund may have to dispose of its portfolio securities (potentially resulting in the recognition of taxable gain or loss, and potentially under disadvantageous circumstances) to generate cash, or may have to borrow the cash, to meet its distribution requirements and avoid Fund-level taxes. In addition, some Fund gains on the disposition of interests in such an issuer may be treated as ordinary income. Each Fund may limit and/or manage its holdings in issuers that could be treated as CFCs in order to limit its tax liability or maximize its after-tax return from these investments.

In addition, if a Fund owned 10% or more of the voting power of a foreign entity treated as a corporation for U.S. federal income tax purposes for the last tax year of the foreign entity beginning before January 1, 2018, the Fund may have been required to include in its income its share of certain deferred foreign income of that foreign entity. Under those circumstances, the Fund may be able to make an election for such amounts to be included in income over eight years. Any income included under this rule may have to be distributed to satisfy the distribution requirements referred to above even though the Fund may receive no corresponding cash amounts, and even though shareholders derived no economic benefit from the foreign entity’s deferred income.

Non-U.S. persons are subject to U.S. tax on disposition of a “United States real property interest” (a “USRPI”). Gain on such a disposition is sometimes referred to as “FIRPTA gain.” The Code provides a look-through rule for distributions of “FIRPTA gain” if certain requirements are met. If the look-through rule applies, certain distributions attributable to income received by a Fund, e.g., from REITs, may be treated as gain from the disposition of a USRPI, causing distributions to be subject to U.S. withholding tax at rates of up to 21%, and require non-U.S. shareholders to file nonresident U.S. income tax returns.

The Funds are required to withhold (as “backup withholding”) a portion of reportable payments, including dividends, capital gain distributions and the proceeds of redemptions and exchanges or repurchases of Fund shares, paid to shareholders who have not complied with certain IRS regulations. The backup withholding rate is currently 24%. In order to avoid this withholding requirement, shareholders, other than certain exempt entities, must certify on IRS Forms W-9 or on certain other documents, that the Social Security Numbers or other Taxpayer Identification Numbers they provide are their correct numbers and that they are not currently subject to backup withholding, or that they are exempt from backup withholding. The Fund may nevertheless be required to backup withhold if it receives notice from the IRS

or a broker that a number provided is incorrect or that backup withholding is applicable as a result of previous underreporting of interest or dividend income.

Ordinary dividends and certain other payments made by a Fund to non-U.S. shareholders are generally subject to withholding tax at a 30% rate (or a lower rate as may be determined in accordance with any applicable treaty). In order to obtain a reduced rate of withholding, a non-U.S. shareholder will be required to provide an IRS Form W-8BEN or similar form certifying its entitlement to benefits under a treaty. The withholding tax does not apply to regular dividends paid to a non-U.S. shareholder who provides an IRS Form W-8ECI, certifying that the dividends are effectively connected with the non-U.S. shareholder's conduct of a trade or business within the United States. Instead, the effectively connected dividends will be subject to regular U.S. income tax as if the non-U.S. shareholder were a U.S. shareholder. A non-U.S. corporation receiving effectively connected dividends may also be subject to additional "branch profits tax" imposed at a rate of 30% (or a lower treaty rate).

The 30% withholding tax described in the preceding paragraph generally will not apply to distributions of net capital gain, to redemption proceeds, or to dividends that a Fund reports as (a) interest-related dividends, to the extent such dividends are derived from the Fund's "qualified net interest income," or (b) short-term capital gain dividends, to the extent such dividends are derived from the Fund's "qualified short-term gain." "Qualified net interest income" is the Fund's net income derived from U.S.-source interest and original issue discount, subject to certain exceptions and limitations. "Qualified short-term gain" generally means the excess of the net short-term capital gain of the Fund for the taxable year over its net long-term capital loss, if any. In order to qualify for an exemption from withholding, a non-U.S. shareholder will need to comply with applicable certification requirements relating to its non-U.S. status (including, in general, furnishing an IRS Form W-8BEN or other applicable form). Backup withholding will not be applied to payments that are subject to this 30% withholding tax.

Unless certain non-U.S. entities that hold Fund shares comply with IRS requirements that will generally require them to report information regarding U.S. persons investing in, or holding accounts with, such entities, a 30% withholding tax may apply to the Fund's dividends payable to such entities. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the United States and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of such agreement.

This discussion and the related discussion in the Prospectus have been prepared by management of the Funds, and counsel to the Trust has expressed no opinion in respect thereof.

Shareholders and prospective shareholders of the Funds should consult their own tax advisors concerning the effect of owning shares of a Fund in light of their particular tax situations.

DIVIDENDS AND DISTRIBUTIONS

Each Fund will receive income in the form of dividends and interest earned on its investments in securities. This income, less the expenses incurred in its operations, is the Fund's net investment income, substantially all of which will be declared as dividends to the Fund's shareholders.

The amount of income dividend payments by a Fund is dependent upon the amount of net investment income received by the Fund from its portfolio holdings, is not guaranteed and is subject to the discretion of the Board. The Funds do not pay "interest" or guarantee any fixed rate of return on an investment in its shares.

The Funds also may derive capital gains or losses in connection with sales or other dispositions of its portfolio securities. Any net gain a Fund may realize from transactions involving investments held for less than the period required for long-term capital gain or loss recognition or otherwise producing short-term capital gains and losses (taking into account any available carryover of capital losses), although a distribution from capital gains, will be distributed to shareholders with and as a part of the income dividends paid by the Fund and will generally be taxable to shareholders as ordinary income for federal income tax purposes. If during any year a Fund realizes a net gain on transactions involving investments held for more than the period required for long-term capital gain or loss recognition or otherwise producing long-term capital gains and losses, the Fund will have a net long-term capital gain. After deduction of the amount of any net short-term

capital loss, the balance (to the extent not offset by any capital losses available to be carried over) generally will be distributed and treated as long-term capital gains in the hands of the shareholders regardless of the length of time the Fund's shares may have been held by the shareholders. For more information concerning applicable capital gains tax rates, see your tax advisor.

Any dividend or distribution paid by a Fund reduces the Fund's NAV on the date paid by the amount of the dividend or distribution per share. Accordingly, a dividend or distribution paid shortly after a purchase of shares by a shareholder will generally be taxable, even if it effectively represents a partial return of the shareholder's capital.

Dividends and other distributions will be made in the form of additional shares of a Fund unless the shareholder has otherwise indicated. Investors have the right to change their elections with respect to the reinvestment of dividends and distributions by notifying the Transfer Agent in writing, but any such change will be effective only as to dividends and other distributions for which the record date is seven or more business days after the Transfer Agent has received the written request.

A Fund's investments in partnerships, if any, including in qualified publicly traded partnerships, may result in that Fund being subject to state, local or foreign income, franchise or withholding tax liabilities.

GENERAL INFORMATION

Investment Managers Series Trust II is an open-end management investment company organized as a Delaware statutory trust under the laws of the State of Delaware on August 20, 2013. The Trust has a number of outstanding series of shares of beneficial interest, each of which represents interests in a separate portfolio of securities.

The Trust's Declaration of Trust permits the Trustees to create additional series of shares, to issue an unlimited number of full and fractional shares of beneficial interest of each series, including the Fund, and to divide or combine the shares of any series into a greater or lesser number of shares without thereby changing the proportionate beneficial interest in the series. The assets belonging to a series are charged with the liabilities in respect of that series and all expenses, costs, charges and reserves attributable to that series only. Therefore, any creditor of any series may look only to the assets belonging to that series to satisfy the creditor's debt. Any general liabilities, expenses, costs, charges or reserves of the Trust which are not readily identifiable as pertaining to any particular series are allocated and charged by the Trustees to and among the existing series in the sole discretion of the Trustees. Each share of the Fund represents an interest in the Fund proportionately equal to the interest of each other share. Upon the Fund's liquidation, all shareholders would share pro rata in the net assets of the Fund available for distribution to shareholders.

The Trust may offer more than one class of shares of any series. Each share of a series or class represents an equal proportionate interest in that series or class with each other share of that series or class.

The shares of each series or class participate equally in the earnings, dividends and assets of the particular series or class. Expenses of the Trust which are not attributable to a specific series or class are allocated among all the series in a manner believed by management of the Trust to be fair and equitable. Shares issued do not have pre-emptive or conversion rights. Shares when issued are fully paid and non-assessable, except as set forth below. Shareholders are entitled to one vote for each share held. Shares of each series or class generally vote together, except when required under federal securities laws to vote separately on matters that only affect a particular series or class, such as the approval of distribution plans for a particular class.

The Trust is not required to hold annual meetings of shareholders but will hold special meetings of shareholders of a series or class when, in the judgment of the Board, it is necessary or desirable to submit matters for a shareholder vote. Shareholders have, under certain circumstances, the right to communicate with other shareholders in connection with requesting a meeting of shareholders for the purpose of removing one or more trustees. Shareholders also have, in certain circumstances, the right to remove one or more trustees without a meeting. No material amendment may be made to the Trust's Declaration of Trust without the affirmative vote of the holders of a majority of the outstanding shares of each portfolio affected by the amendment.

The Trust's Declaration of Trust provides that, at any meeting of shareholders of the Trust or of any series or class, a shareholder servicing agent may vote any shares as to which such shareholder servicing agent is the agent of record for shareholders who are not represented in person or by proxy at the meeting, proportionately in accordance with the votes cast by holders of all shares of that portfolio otherwise represented at the meeting in person or by proxy as to which such shareholder servicing agent is the agent of record. Any shares so voted by a shareholder servicing agent will be deemed represented at the meeting for purposes of quorum requirements. Any series or class may be terminated (i) upon the merger or consolidation with, or the sale or disposition of all or substantially all of its assets to, another entity, if approved by the vote of the holders of two-thirds of its outstanding shares, except that if the Board recommends such merger, consolidation or sale or disposition of assets, the approval by vote of the holders of a majority of the series' or class' outstanding shares will be sufficient, or (ii) by the vote of the holders of a majority of its outstanding shares, or (iii) by the Board by written notice to the series' or class' shareholders. Unless each series and class is so terminated, the Trust will continue indefinitely.

Shareholders may send communications to the Board. Shareholders should send communications intended for the Board by addressing the communications to the Board, in care of the Secretary of the Trust and sending the communication to 2220 E. Route 66, Suite 226, Glendora, California 91740. A shareholder communication must (i) be in writing and be signed by the shareholder, (ii) provide contact information for the shareholder, (iii) identify the Fund to which it relates, and (iv) identify the class and number of shares held by the shareholder. The Secretary of the Trust may, in good faith, determine that a shareholder communication should not be provided to the Board because it does not reasonably relate to the Trust or its operations, management, activities, policies, service providers, Board, officers, shareholders or other matters relating to an investment in the Fund or is otherwise immaterial in nature. Other shareholder communications received by the Funds not directly addressed and sent to the Board will be reviewed and generally responded to by management, and will be forwarded to the Board only at management's discretion based on the matters contained therein.

The Declaration of Trust provides that no Trustee or officer of the Trust shall be subject to any personal liability in connection with the assets or affairs of the Trust or any of its series except for losses in connection with his or her willful misfeasance, bad faith, gross negligence or reckless disregard of his or her duties. The Trust has also entered into an indemnification agreement with each Trustee which provides that the Trust shall advance expenses and indemnify and hold harmless the Trustee in certain circumstances against any expenses incurred by the Trustee in any proceeding arising out of or in connection with the Trustee's service to the Trust, to the maximum extent permitted by the Delaware Statutory Trust Act, the 1933 Act and the 1940 Act, and which provides for certain procedures in connection with such advancement of expenses and indemnification.

The Trust's Declaration of Trust also provides that the Trust shall maintain appropriate insurance (for example, fidelity bonding and errors and omissions insurance) for the protection of the Trust, its shareholders, trustees, officers, employees and agents covering possible tort and other liabilities.

The Declaration of Trust does not require the issuance of stock certificates. If stock certificates are issued, they must be returned by the registered owners prior to the transfer or redemption of shares represented by such certificates.

Rule 18f-2 under the 1940 Act provides that as to any investment company which has two or more series outstanding and as to any matter required to be submitted to shareholder vote, such matter is not deemed to have been effectively acted upon unless approved by the holders of a "majority" (as defined in the rule) of the voting securities of each series affected by the matter. Such separate voting requirements do not apply to the election of Trustees or the ratification of the selection of accountants. The Rule contains special provisions for cases in which an advisory contract is approved by one or more, but not all, series. A change in investment policy may go into effect as to one or more series whose holders so approve the change even though the required vote is not obtained as to the holders of other affected series.

The Trust, the Advisor and the Sub-Advisor each have adopted Codes of Ethics under Rule 17j-1 of the 1940 Act. These codes of ethics permit, subject to certain conditions, personnel of each of those entities to invest in securities that may be purchased or held by each Fund.

FINANCIAL STATEMENTS

The Trust's independent registered public accounting firm, Tait Weller, will audit and report on the Funds' annual financial statements. The financial statements include the "Portfolio of Investments", "Statement of Assets and Liabilities", "Statement of Operations", "Statements of Changes in Net Assets", "Financial Highlights" and "Notes to Financial Statements". Each Fund has adopted the financial statements of the Predecessor Fund. Those financial statements were audited by the Predecessor Funds' independent registered public accounting firm.

APPENDIX A DESCRIPTION OF SECURITIES RATINGS

Corporate Bonds (Including Convertible Bonds)

Moody's

Aaa Obligations rated Aaa are judged to be of the highest quality, with minimal credit risk.

Aa Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A Obligations rated A are considered upper-medium grade and are subject to low credit risk.

Baa Obligations rated Baa are subject to moderate credit risk. They are considered medium-grade and as such may possess certain speculative characteristics.

Ba Obligations rated Ba are judged to have speculative elements and are subject to substantial credit risk.

B Obligations rated B are considered speculative and are subject to high credit risk.

Caa Obligations rated Caa are judged to be of poor standing and are subject to very high credit risk.

Ca Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery.

C Obligations rated C are the lowest rated class of bonds and are typically in default, with little prospect for recovery of principal or interest.

Note Moody's applies numerical modifiers 1, 2, and 3 in each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

S&P

AAA An obligation rated AAA has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA An obligation rated AA differs from the highest-rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A An obligation rated A is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB An obligation rated BBB exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

Note Obligations rated BB, B, CCC, CC, and C are regarded as having significant speculative characteristics. BB indicates the least degree of speculation and C the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB An obligation rated BB is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial or economic conditions, which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B An obligation rated B is more vulnerable to nonpayment than obligations rated BB, but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC An obligation rated CCC is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC An obligation rated CC is currently highly vulnerable to nonpayment.

C The C rating may be used to cover a situation where a bankruptcy petition has been filed or similar action has been taken, but payments on this obligation are being continued.

D An obligation rated D is in payment default. The D rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The D rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

Note Plus (+) or minus (-). The ratings from AA to CCC may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories. The "r" symbol is attached to the ratings of instruments with significant noncredit risks. It highlights risks to principal or volatility of expected returns, which are not addressed in the credit rating. Examples include: obligations linked or indexed to equities, currencies, or commodities; obligations exposed to severe prepayment risk-such as interest-only or principal-only mortgage securities; and obligations with unusually risky interest terms, such as inverse floaters.

Preferred Stock

Moody's

Aaa An issue that is rated "Aaa" is considered to be a top-quality preferred stock. This rating indicates good asset protection and the least risk of dividend impairment within the universe of preferred stocks.

Aa An issue that is rated "Aa" is considered a high-grade preferred stock. This rating indicates that there is a reasonable assurance the earnings and asset protection will remain relatively well maintained in the foreseeable future.

A An issue that is rated "A" is considered to be an upper-medium grade preferred stock. While risks are judged to be somewhat greater than in the "Aaa" and "Aa" classification, earnings and asset protection are, nevertheless, expected to be maintained at adequate levels.

Baa An issue that is rated "Baa" is considered to be a medium-grade preferred stock, neither highly protected nor poorly secured. Earnings and asset protection appear adequate at present but may be questionable over any great length of time.

Ba An issue that is rated "Ba" is considered to have speculative elements and its future cannot be considered well assured. Earnings and asset protection may be very moderate and not well safeguarded during adverse periods. Uncertainty of position characterizes preferred stocks in this class.

B An issue that is rated "B" generally lacks the characteristics of a desirable investment. Assurance of dividend payments and maintenance of other terms of the issue over any long period of time may be small.

Caa An issue that is rated "Caa" is likely to be in arrears on dividend payments. This rating designation does not purport to indicate the future status of payments.

Ca An issue that is rated "Ca" is speculative in a high degree and is likely to be in arrears on dividends with little likelihood of eventual payments.

C This is the lowest rated class of preferred or preference stock. Issues so rated can thus be regarded as having extremely poor prospects of ever attaining any real investment standing.

Note Moody's applies numerical modifiers 1, 2, and 3 in each rating classification: the modifier 1 indicates that the security ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking and the modifier 3 indicates that the issue ranks in the lower end of its generic rating category.

S&P

AAA This is the highest rating that may be assigned by Standard & Poor's to a preferred stock issue and indicates an extremely strong capacity to pay the preferred stock obligations.

AA A preferred stock issue rated AA also qualifies as a high-quality, fixed-income security. The capacity to pay preferred stock obligations is very strong, although not as overwhelming as for issues rated AAA.

A An issue rated A is backed by a sound capacity to pay the preferred stock obligations, although it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions.

BBB An issue rated BBB is regarded as backed by an adequate capacity to pay the preferred stock obligations. Whereas it normally exhibits adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to make payments for a preferred stock in this category than for issues in the A category.

BB, B, CCC Preferred stock rated BB, B, and CCC is regarded, on balance, as predominantly speculative with respect to the issuer's capacity to pay preferred stock obligations. BB indicates the lowest degree of speculation and CCC the highest. While such issues will likely have some quality and protective characteristics, these are outweighed by large uncertainties or major risk exposures to adverse conditions.

CC The rating CC is reserved for a preferred stock issue that is in arrears on dividends or sinking fund payments, but that is currently paying.

C A preferred stock rated C is a nonpaying issue.

D A preferred stock rated D is a nonpaying issue with the issuer in default on debt instruments.

N.R. This indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that Standard & Poor's does not rate a particular type of obligation as a matter of policy.

Note Plus (+) or minus (-). To provide more detailed indications of preferred stock quality, ratings from AA to CCC may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

Short Term Ratings

Moody's

Moody's employs the following three designations, all judged to be investment grade, to indicate the relative repayment ability of rated issuers:

Prime-1 Issuers rated Prime-1 (or supporting institutions) have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will often be evidenced by many of the following characteristics:

- Leading market positions in well-established industries.
- High rates of return on funds employed.

- Conservative capitalization structure with moderate reliance on debt and ample asset protection.
- Broad margins in earnings coverage of fixed financial charges and high internal cash generation.
- Well-established access to a range of financial markets and assured sources of alternate liquidity.

Prime-2 Issuers rated Prime-2 (or supporting institutions) have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, may be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

Prime-3 Issuers rated Prime-3 (or supporting institutions) have an acceptable ability for repayment of senior short-term obligations. The effect of industry characteristics and market compositions may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and may require relatively high financial leverage. Adequate alternate liquidity is maintained.

Not Prime Issuers rated Not Prime do not fall within any of the Prime rating categories.

S&P

A-1 A short-term obligation rated A-1 is rated in the highest category by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

A-2 A short-term obligation rated A-2 is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

A-3 A short-term obligation rated A-3 exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B A short-term obligation rated B is regarded as having significant speculative characteristics. The obligor currently has the capacity to meet its financial commitment on the obligation; however, it faces major ongoing uncertainties, which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

C A short-term obligation rated C is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

D A short-term obligation rated D is in payment default. The D rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The D rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

APPENDIX B PROXY VOTING POLICIES AND PROCEDURES

INVESTMENT MANAGERS SERIES TRUST II PROXY VOTING POLICIES AND PROCEDURES

Investment Managers Series Trust II (the “Trust”) is registered as an open-end investment company under the Investment Company Act of 1940, as amended (“1940 Act”). The Trust offers multiple series (each, a “Fund” and, collectively, the “Funds”). Consistent with its fiduciary duties and pursuant to Rule 30b1-4 under the 1940 Act (the “Proxy Rule”), the Board of Trustees of the Trust (the “Board”) has adopted this proxy voting policy on behalf of the Trust (the “Policy”) to reflect its commitment to ensure that proxies are voted in a manner consistent with the best interests of the Funds’ shareholders.

Delegation of Proxy Voting Authority to Fund Advisors

The Board believes that the investment advisor of each Fund (each, an “Advisor” and, collectively, the “Advisors”), as the entity that selects the individual securities that comprise its Fund’s portfolio, is the most knowledgeable and best-suited to make decisions on how to vote proxies of portfolio companies held by that Fund. The Trust will therefore defer to, and rely on, the Advisor of each Fund to make decisions on how to cast proxy votes on behalf of such Fund. An Advisor may delegate this responsibility to a Fund’s sub-advisor.

The Trust hereby designates the Advisor of each Fund as the entity responsible for exercising proxy voting authority with regard to securities held in the Fund’s investment portfolio. Consistent with its duties under this Policy, each Advisor shall monitor and review corporate transactions of corporations in which the Fund has invested, obtain all information sufficient to allow an informed vote on all proxy solicitations, ensure that all proxy votes are cast in a timely fashion, and maintain all records required to be maintained by the Fund under the Proxy Rule and the 1940 Act. Each Advisor will perform these duties in accordance with the Advisor’s proxy voting policy, a copy of which will be presented to the Board for its review. Each Advisor will promptly provide to the Trust’s Chief Compliance Officer (“CCO”) updates to its proxy voting policy as they are adopted and implemented, and the Trust’s CCO will then report such updates to the Board.

Availability of Proxy Voting Policy and Records Available to Fund Shareholders

If a Fund or an Advisor has a website, a copy of the Advisor’s proxy voting policy and this Policy may be posted on such website. A copy of such policies and of each Fund’s proxy voting record shall also be made available, without charge, upon request of any shareholder of the Fund, by calling the applicable Fund’s toll-free telephone number as printed in the Fund’s prospectus. The Trust’s transfer agent will notify the Advisor of any such request of proxy voting procedures. The Advisor shall reply to any Fund shareholder request within three (3) business days of receipt of the request, by first-class mail or other means designed to ensure equally prompt delivery.

Each Advisor will provide a complete annual voting record, as required by the Proxy Rule, for each series of the Trust for which it acts as advisor, to the Trust’s co-administrator no later than July 31st of each year. The Trust’s co-administrator, MFAC, will file a report based on such record on Form N-PX on an annual basis with the Securities and Exchange Commission no later than August 31st of each year.

Each Advisor is responsible for providing its current proxy voting policies and procedures and any subsequent amendments to the Trust’s CCO. SEC Form N-PX is filed with respect to each Fund by MFAC (acting as filing agent), by no later than August 31st of each year. Each such filing details all proxies voted on behalf of the Fund for the prior twelve months ended June 30th. In connection with each filing on behalf of the Fund, the Advisor’s CCO must sign and return to MFAC no later than July 30th a Form N-PX Certification stating that the advisor has adopted proxy voting policies and procedures in compliance with the SEC’s Proxy Voting Rule.

AXS INVESTMENTS LLC
PROXY VOTING POLICIES AND PROCEDURES

A. PURPOSE AND GENERAL STATEMENT

The purpose of these proxy voting policies and procedures (the “Policy”) is to set forth the principles and procedures by which AXS votes with respect to securities held in Fund portfolios for which AXS exercises voting authority (generally where AXS has not delegated proxy voting discretion to a Fund’s subadviser). For purposes of this Policy, a “Vote” includes any proxy and any shareholder vote or consent for any security held by a client account for which AXS exercises voting authority.

This Policy been designed to help ensure that Votes are voted in the best interests of the applicable Fund in accordance with AXS’s fiduciary duties and Rule 206(4)-6 under the Act.

B. POLICY

Votes must be cast in the best interests of each Fund. AXS’s guiding principle in this regard is that it is generally in the best interest of the client to cast Votes in a manner designed to maximize the economic value of the Fund’s holdings, taking into account the Fund’s investment goals and objectives (as set forth in its current registration statement) and all other relevant circumstances at the time of the vote. AXS does not permit voting decisions to be influenced in any manner that is contrary to this principle. AXS recognizes that, in rare instances, the interest of one Fund with respect to a Vote may conflict with the interests of AXS or another Fund. Any conflicts of interest relating to the casting of Votes, regardless of whether actual or perceived, will be addressed in accordance with this Policy.

It is AXS’s general policy to vote or give consent on all matters presented to shareholders in any Vote, and these policies and procedures have been designed with this in mind. However, AXS reserves the right to abstain from any particular Vote or otherwise withhold its Vote or consent on any matter if, in the judgement of AXS’s CCO or the relevant AXS investment professional, the costs associated with voting such Vote outweigh the benefits to the applicable Fund, or if the circumstances make such an abstention or withholding otherwise advisable and in the best interests of the Fund.

C. GUIDELINES

The voting guidelines below summarize AXS’s general positions on various common issues, and provides a general indication of how Fund portfolio securities for which AXS has voting discretion will be voted on proposals dealing with particular issues.

These voting guidelines are just that – guidelines. The guidelines are not exhaustive and do not address all potential voting issues. Because the circumstances of individual companies are so varied, there may be instances when AXS does not cast Fund Votes in strict adherence to these guidelines.

1. Management Proposals

The majority of matters presented to shareholders are proposals made by an issuer's management, which have usually been approved and recommended by the issuer's board of directors. For routine matters (which generally means that such matter will not measurably change the structure, management, control or operation of the company and are consistent with customary industry standards and practices), AXS will typically vote in accordance with the recommendation of the company's management; unless, in AXS's opinion, such recommendation is not in the best interests of the Fund.

Generally, in the absence of any unusual or non-routine circumstances, the AXS supports the following items:

- Ratification of appointment of independent auditors;
- General updating/corrective amendments to charter;
- Increase in common share authorization for a stock split or share dividend;
- Stock option plans that are incentive based and not excessive; and
- Regular, uncontested elections of directors and payment of fees (unless such fees exceed market standards).

Non-routine matters may involve a variety of issues. Therefore, AXS will typically cast Votes on non-routine matters on a case-by-case basis, in each case casting Votes in a manner that AXS believes is in the best interests of the applicable client based on the considerations described above. The following will typically be considered "non-routine" matters requiring case-by-case analysis:

- Directors' liability and indemnity proposals;
- Executive compensation plans;
- Contested elections of directors;
- Mergers, acquisitions, and other restructurings submitted to a shareholder vote;
- Anti-takeover and related provisions.

AXS will generally Vote against proposals to classify a board, absent special circumstances indicating that shareholder interests would be better served by this structure.

2. Shareholder Proposals

In general, AXS casts Votes in accordance with the recommendation of the company's board of directors on all shareholder proposals. However, AXS will support shareholder proposals that it believes are in the best interests of the Fund based on the considerations described above. In addition:

Generally, shareholder proposals related to the following items are supported:

- Confidential voting;
- Declassifying a board, absent special circumstances indicating that shareholder interests would be better served by a classified board structure;
- Requiring director nominees to receive support from holders of a majority of votes cast or a majority of shares outstanding in order to be (re)elected.
- Bylaw and charter amendments only with shareholder approval;
- Eliminating supermajority vote requirements in the company's bylaws and charter documents; and
- Requiring a majority of independent directors on a board.

Generally, shareholder proposals related to the following items are not supported:

- Limitations on the tenure of directors;
- Cumulative voting;
- Restrictions related to social, political, or special interest issues that impact the ability of the company to do business or be competitive and that have a significant financial or vested interest impact; and
- Reports that are costly to provide or expenditures that are of a non-business in nature or would provide no pertinent information from a shareholder perspective.

D. CONFLICTS OF INTEREST

Due to the nature of AXS's business and its ownership, AXS believes it is unlikely that conflicts of interest will arise when casting Votes. Each Fund's investment team, however, is responsible for monitoring Votes for any actual or perceived conflicts of interest. If at any time any Supervised Person becomes aware of any potential, actual, or perceived conflict of interest regarding any particular Vote(s) to be cast, he or she is required to contact AXS's CCO immediately, who will review the Vote(s) in advance to ensure that AXS proposed Vote(s) is consistent with this Policy and AXS's duties to the applicable Fund.

If a conflict of interest is evident, the CCO will:

- advise IMST II's Chief Compliance Officer (or other relevant IMST II officer) of the conflict in advance of casting the Vote;
- use his or her best judgement to address the conflict and ensure that it is resolved in accordance with his or her independent assessment of the best interests of the Fund.

Where the CCO deems appropriate in his or her sole discretion, unaffiliated third parties (such as proxy voting services) may be used to help resolve conflicts. In this regard, the CCO shall have the power to retain independent fiduciaries, consultants, or professionals to assist with Voting decisions and/or to delegate voting or consent powers to such fiduciaries, consultants, or professionals.

E. VOTING PROCEDURES

All AXS personnel are responsible for promptly forwarding all proxy materials, consents or voting requests or notices, or materials related thereto, to the CCO and to the applicable investment professional(s) primarily responsible for managing the applicable Fund's portfolio. The CCO shall be responsible for ensuring that each Vote is voted in a timely manner and as otherwise required by the terms of such Vote.

All Voting decisions initially are to be referred to the appropriate investment professional for determination. In most cases, the most senior Portfolio Manager of the applicable Fund, or his or her designee, will make the decision as to the appropriate vote for any particular Vote.

The Portfolio Manager will inform the CCO of any such Voting decision, and if the CCO does not object to such decision as a result of his or her conflict of interest review, the Vote will be voted in such manner. If the Portfolio Manager and the CCO are unable to arrive at an agreement as to how to vote, then the CCO may consult with independent third-parties (including a proxy voting service) as to the appropriate vote.

F. RECORDKEEPING

In accordance with Rule 204-2 under the Act, AXS must retain (i) its proxy voting policies and procedures; (ii) proxy statements received regarding Fund/client securities; (iii) records of its votes on behalf of the Funds; (iv) records of Fund requests for proxy voting information; and (v) any documents prepared by AXS that were material to making a decision how to vote, or that memorialized the basis for the decision. AXS may rely on proxy statements filed on the SEC's EDGAR system (instead of keeping its own copies), and may rely on proxy statements and records of its votes cast that are maintained by a proxy voting service provider.

QUANTITATIVE VALUE TECHNOLOGIES LLC PROXY VOTING POLICIES AND PROCEDURES

OVERVIEW

The Adviser generally does not take any action or render any advice with respect to voting proxies solicited by, or with respect to, the issuers of any client securities, except to the extent otherwise required by law. It is the Adviser's policy not to vote proxies for standard SMA's. However, this policy does not apply to certain clients who signed investment management agreements prior to the revision of this policy in May 2014, as well as certain institutional accounts as articulated below. As the Adviser exercises voting authority with respect to certain clients' securities, the following Proxy Voting Policies and Procedures have been adopted pursuant to Rule 206(4)-6 of the Investment Advisers Act of 1940. These Proxy Voting Policies and Procedures are reasonably designed to ensure that the Adviser votes proxies in the best interests of its clients without regard to the Adviser's interest. The procedures also address material conflicts between the Adviser's interests and those of its clients. The Adviser will consider only those factors that relate to the client's investment, including how its vote will economically impact and affect the value of the client's investment.

RESPONSIBILITY

The Chief Executive Officer and Chief Operating Officer are responsible for ensuring that proxies are voted in a manner consistent with the interests of clients.

GENERAL POLICY

Generally, the Adviser will support company management teams which, in its opinion, have the intent and ability to maximize shareholder wealth over the long term, consistent with the Adviser's belief that long-term shareholder value need not be sacrificed in favor of short-term gains. Accordingly, it is the general policy of the Adviser to vote in accordance with management recommendations on proposals, with the following exceptions:

- (1) When proposals diminish rights of shareholders or diminish management or board accountability to shareholders to an extent that the Adviser determines is inconsistent with the long-term interests of shareholders; and
- (2) There may be times when refraining from voting a proxy is in the client's best interest, such as when the adviser determines that the cost of voting the proxy exceeds the expected benefit to the client. On occasion, votes may be withheld for certain directors to show the Adviser's disfavor with a company's Chief Executive Officer or other directors.

CONFLICTS OF INTEREST

For purposes of this policy, a "material conflict of interest" is defined as a non-routine relationship between the issuer of a security and the Adviser or an affiliate of which the Adviser has actual knowledge that may affect the Adviser's judgment in voting securities in the best interest of client accounts. Material conflicts of interest may arise when the Adviser or an affiliate serves as investment adviser or fiduciary for the issuer or when an affiliate has a significant relationship with the issuer. Immaterial conflicts of interest may arise when the Adviser or an affiliate has a relationship with an issuer (*e.g.*, a routine relationship such as a checking account) that does not affect the Adviser's judgment. When the Adviser votes proxies based on the General Policy described above, it demonstrates that the vote was not the product of a material conflict of interest because the policy requires minimal discretion on the part of the Adviser. However, in the event that the Adviser determines that there is a material conflict of interest with respect to the proxy vote, the Adviser will vote client securities based upon the recommendations of an independent third party.

DEVIATIONS FROM GENERAL POLICY

The Adviser will, at all times, make a best effort to vote all proxies in the best interest of its clients. However, there may be some instances in which the Adviser will choose not to vote or may not be able to vote a proxy. Issues that may affect the Adviser's ability to vote include extraordinary requirements such as share blocking or the requirement to vote the security in person. All votes in which the Adviser has chosen to override the General Policy will be reviewed on a quarterly basis by the Chief Compliance Officer or designee. The Chief Operating Officer is responsible for maintaining the documentation regarding any vote overrides and third-party recommendations.

ERISA PLANS

If the investment management agreement is entered into by a trustee or other fiduciary on behalf of an employee retirement income plan subject to the Employee Retirement Income Security Act (“ERISA”), including a person meeting the definition of “fiduciary” under ERISA, the trustee or other fiduciary generally retains the right and obligation to vote proxies. In such cases, the Adviser is generally precluded from voting proxies for the plan. Consistent with applicable rules and regulations of the securities exchanges relating to providing proxies by member organizations, under certain circumstances, with respect to separately managed accounts, the client may delegate to us the obligations to vote proxies on the client’s behalf. ERISA plans managed by the Adviser shall be administered consistent with the terms of the governing plan documents and applicable provisions of ERISA. In cases where the Adviser has been delegated sole proxy voting discretion, these policies and procedures will be followed subject to the fiduciary responsibility standards of ERISA. These standards generally require fiduciaries to act prudently and to discharge their duties solely in the interest of participants and beneficiaries. The Department of Labor has indicated that voting decisions of ERISA fiduciaries must generally focus on the course that would most likely increase the value of the stock being voted. The documents governing ERISA individual account plans may set forth various procedures for voting “employer securities” held by the plan. Where authority over the investment of plan assets is granted to plan participants, many individual account plans provide that proxies for employer securities will be voted in accordance with directions received from plan participants as to shares allocated to their plan accounts. In some cases, the governing plan documents may further provide that unallocated shares and/or allocated shares for which no participant directions are received will be voted in accordance with a proportional voting method in which such shares are voted proportionately in the same manner as are allocated shares for which directions from participants have been received.

MUTUAL FUND

Cognios is the investment adviser to the AXS Market Neutral Fund and the AXS Alternative Value Fund (the “Mutual Funds”). UMB Bank, N.A. is the custodian of the Mutual Funds. In conjunction with US Bank, the Fund Administrator, UMB Fund Services, Inc. and Mutual Fund Administration, LLC, will prepare and file Form N-PX in accordance with the Mutual Funds proxy votes.

All proxies will be voted in accordance with any applicable investment restrictions of the Mutual Funds and, to the extent applicable, any resolutions or other instructions approved by an authorized person of the Mutual Funds. The Adviser shall provide the Mutual Fund’s Compliance Departments with information regarding any identified conflicts of interest, documentation as to how the vote was cast and who cast the vote.

INSTITUTIONAL CLIENTS

Cognios is the investment adviser for a number of institutional clients. The Adviser will provide proxy voting services for institutional clients that meet the following criteria:

- The client must be an institutional investor (i.e. no retail and/or high-net-worth clients)
- The client must have greater than \$5M in AUM with Cognios

The proxy votes will be cast “For” Management proposals, “Against” Shareholder proposals, and “Abstain” on all others. Accommodations cannot be made for voting requests that fall outside of those parameters.

PROCEDURES

The Adviser is responsible for voting the proxies related to certain legacy SMA and institutional accounts, the Mutual Funds, and/or the Private Fund. The Adviser has engaged an independent proxy voting service which is responsible for receipt of proxy ballots, vote execution, vote record maintenance, and vote reporting. The votes will be cast according to the General Policy noted above. If new accounts are added, the Adviser will work with the voting service and the custodian to get the accounts set up in the voting services’ system to allow for automated voting. Upon request, the Adviser will provide copies of its Proxy Voting Policies and Procedures to clients, as well as information regarding how proxies were voted. The Chief Compliance Officer or designee will periodically review the Proxy Voting Policies and Procedures.

BOOKS AND RECORDS

Pursuant to Rule 204-2 of the Investment Advisers Act of 1940, the Adviser will retain the following items in its books and records:

- (1) proxy voting policies and procedures;
- (2) proxy statements received regarding client securities;
- (3) records of votes cast on behalf of clients;
- (4) records of client requests for proxy voting information; and
- (5) any documents prepared by the Adviser that were material to making a decision how to vote, or that memorialized the basis for the decision.

The Adviser may rely on proxy statements filed on the EDGAR system instead of keeping its own copies. The Adviser may also rely on proxy statements and records of proxy votes cast by the Adviser that are maintained with a proxy voting service, if the Adviser has obtained an understanding from the proxy voting service to provide a copy of the documents promptly upon request.
